NO.1 Download App

You can download the App by searching "Tuya Smart" in mobile app stores or scanning the following QR code.

NO.2 Register/Log in/Change Account/Forgot Password

Register

1. Click "Sign Up" and read the Privacy Policy after it pops up. Click "Agree" and enter the registration page.

NO.2 Register/Log in/Change Account/Forgot Password

The image displays three sequential screenshots of the Tuya mobile application's registration process.

Register Screenshot: Shows the initial registration screen. At the top, the time is 19:14. The title is "Register". Below the title, there is a dropdown menu for "China" with a right arrow. Underneath is a text input field for "Mobile Number/Email". A large grey button labeled "Get Verification Code" is positioned below the input field. At the bottom, there is a checkbox labeled "I Agree" followed by links to "User Agreement" and "Privacy Policy".

Enter Verification Code Screenshot: Shows the screen for entering a verification code. The time is 10:49. The title is "Enter Verification Code". Below the title is a text input field for the code. A message states: "Verification code has been sent to your mobile phone: 86-13809334456, Resend (58s)".

Set Password Screenshot: Shows the screen for setting a password. The time is 10:49. The title is "Set Password". Below the title is a text input field for the password. A red error message reads: "Password contains 6 to 20 characters, including letters and digits". A large grey button labeled "Done" is at the bottom.

At the bottom of the three screenshots, a numeric keypad is visible, featuring digits 1-9, 0, and a backspace icon. To the left of the keypad are three social media icons: WeChat, WhatsApp, and Apple.

2.You can use email or mobile number as your account to register. The country/region of the APP will be the same as the phone's. You can also change it by yourself when registering. (**You cannot change the country/region after the registration**). Enter mobile number/email and click "Get Verification Code" ;

3.Enter the verification code and turn to the password setting page. Set your password as required and click "Done" .

NO.2 Register/Log in/Change Account/Forgot Password

Log in

If you already have an account, choose “Register with Existing Account” and enter the log in page.

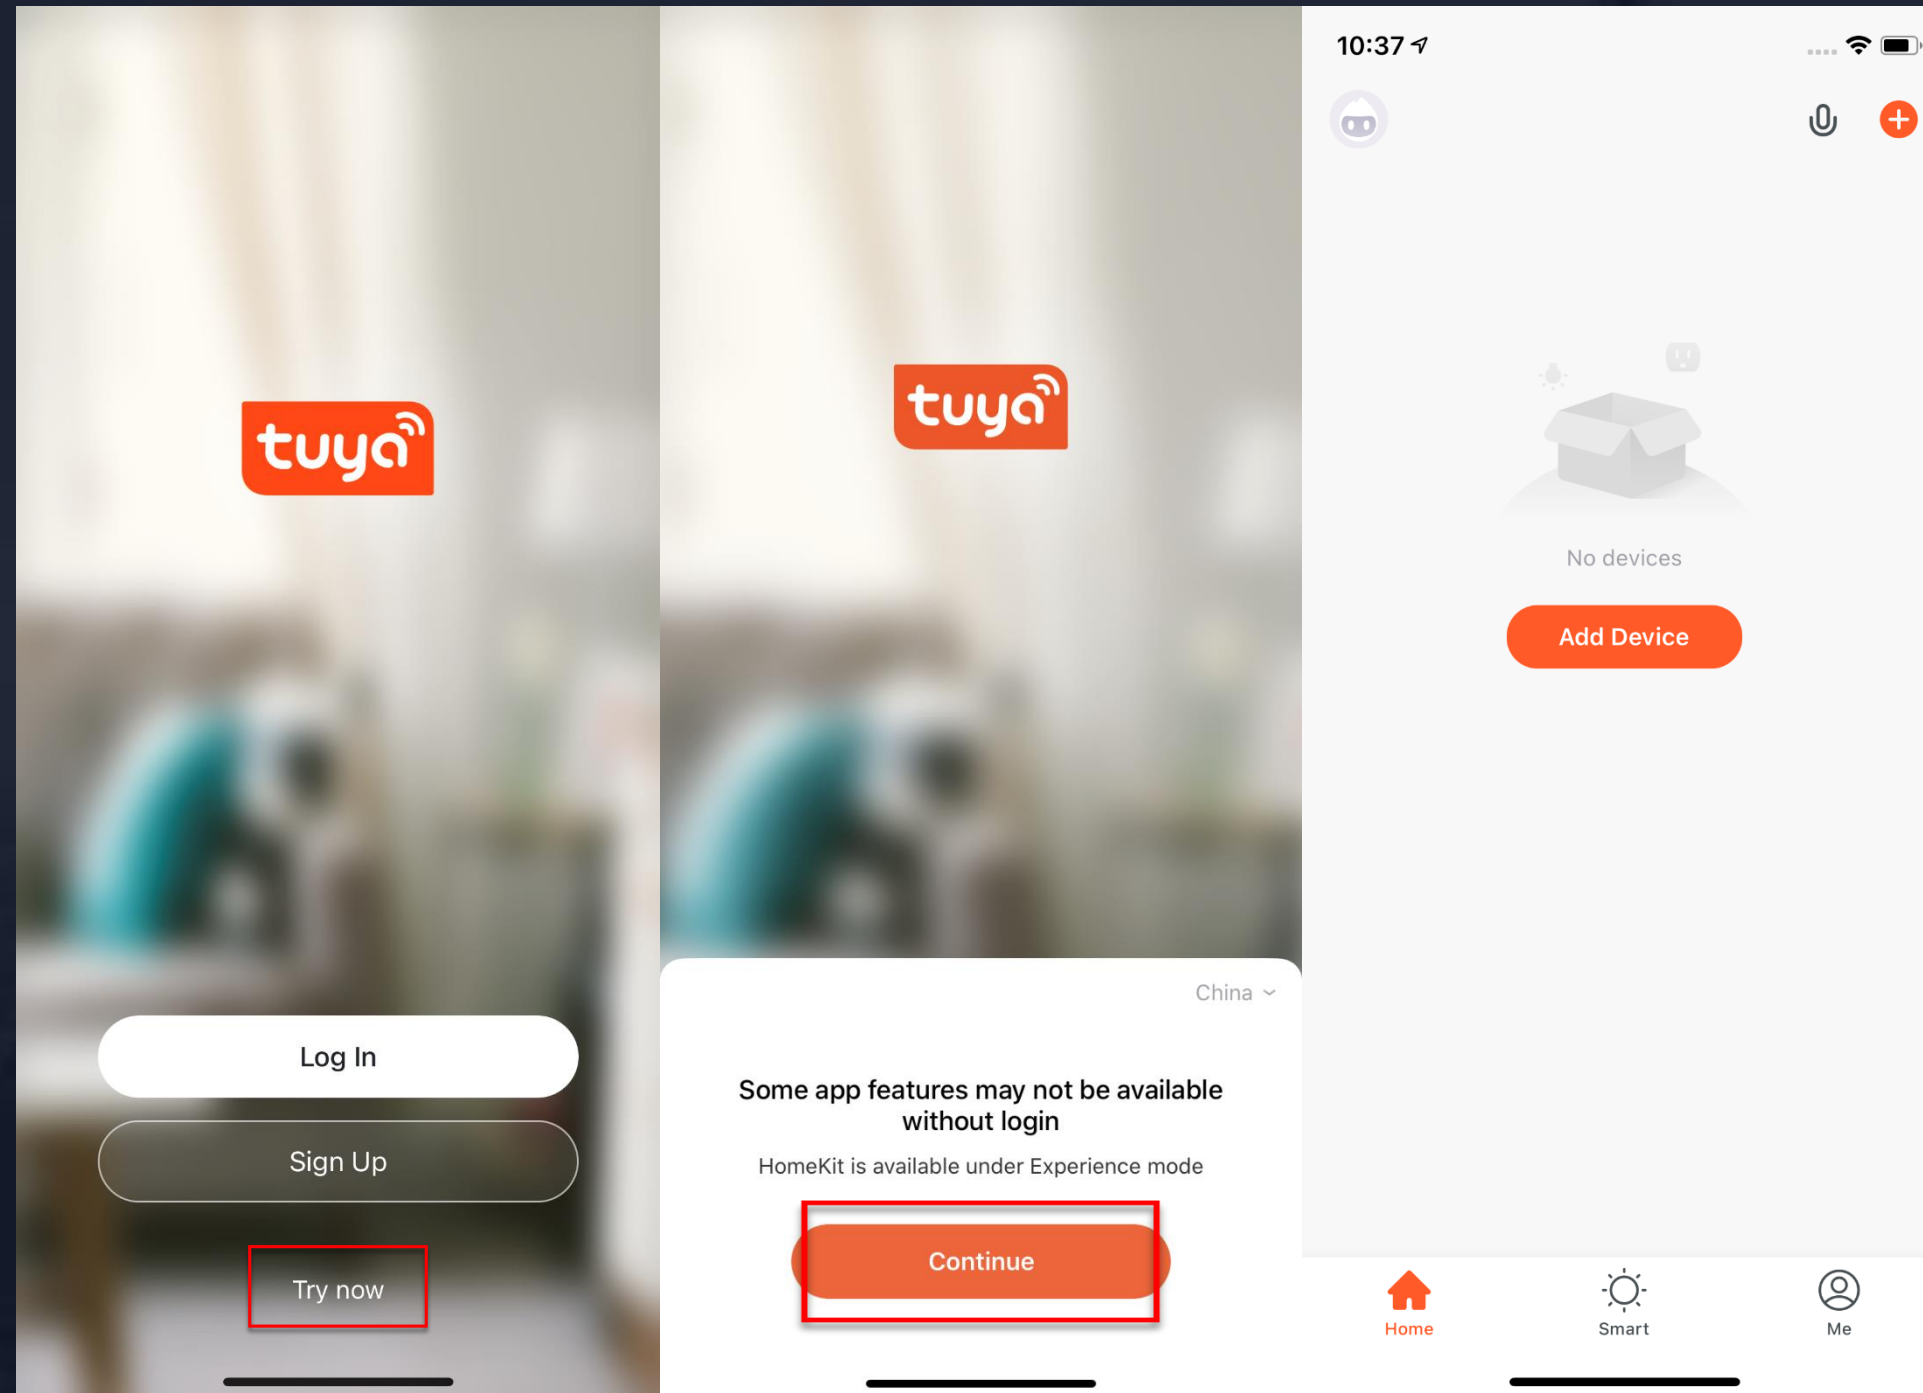

1. The system will automatically locate the current country/region you are in. Or you can choose the country/region by yourself.

2. Enter mobile number/ email and password.

Third-party Social Account Log in

If you have downloaded WeChat or QQ on your phone, you can click the WeChat/QQ icon in the log in page. You can log in using your WeChat/QQ account after authorizing it. If you are using iPhone, you can also log in with Apple ID.

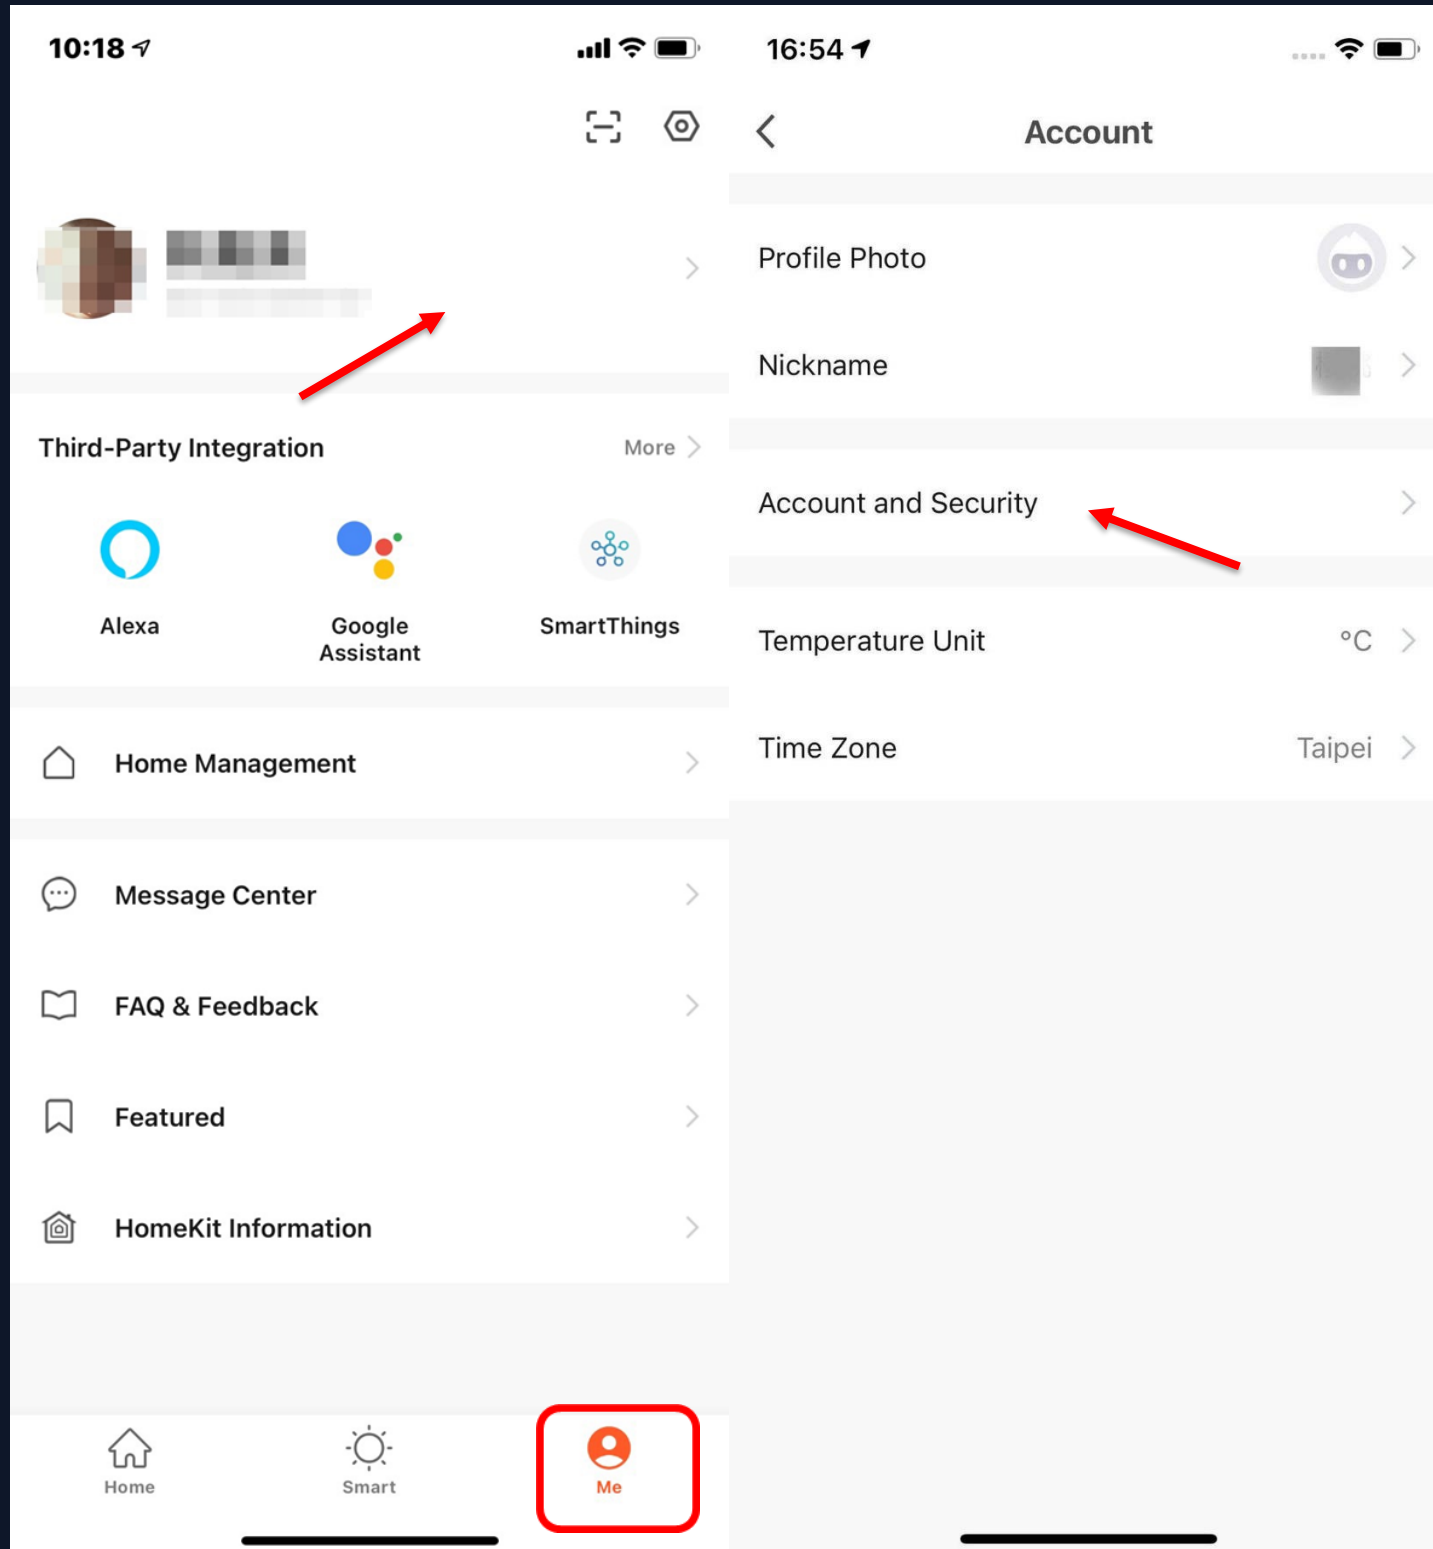

NO.2 Register/Log in/Change Account/Forgot Password

Experience Mode

1. Click “Try now” , a prompt page will appear.
2. In Experience mode , the following functions are not be supported : Cloud storage, Third-party voice control, and Device sharing.
3. Click “Continue” to accept the experience mode notices , and you will enter the home page.

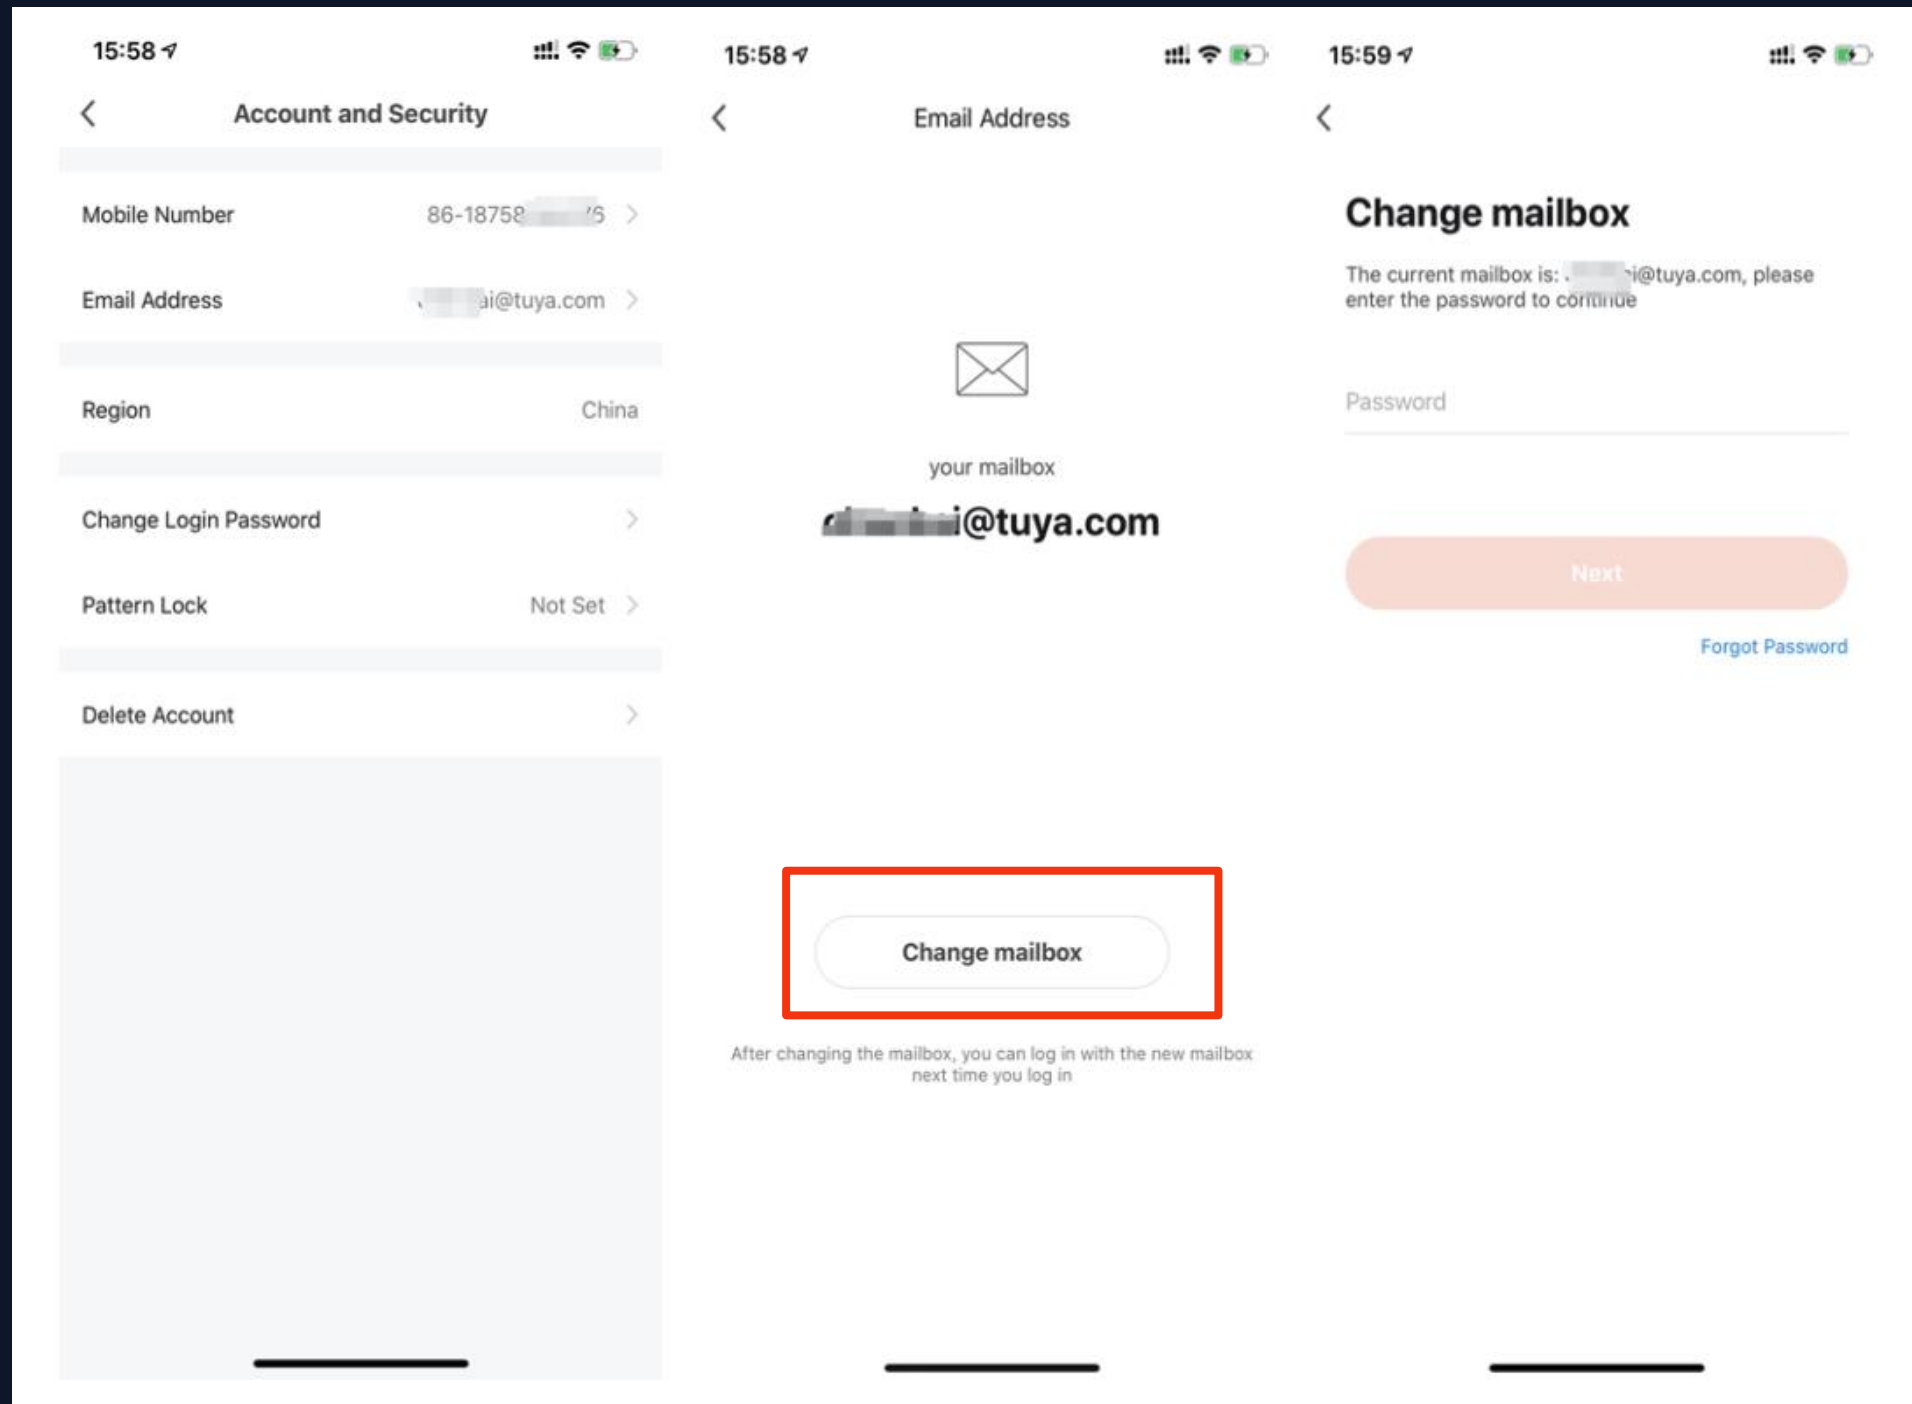

NO.2 Register/Log in/Change Account/Forgot Password

Change Account

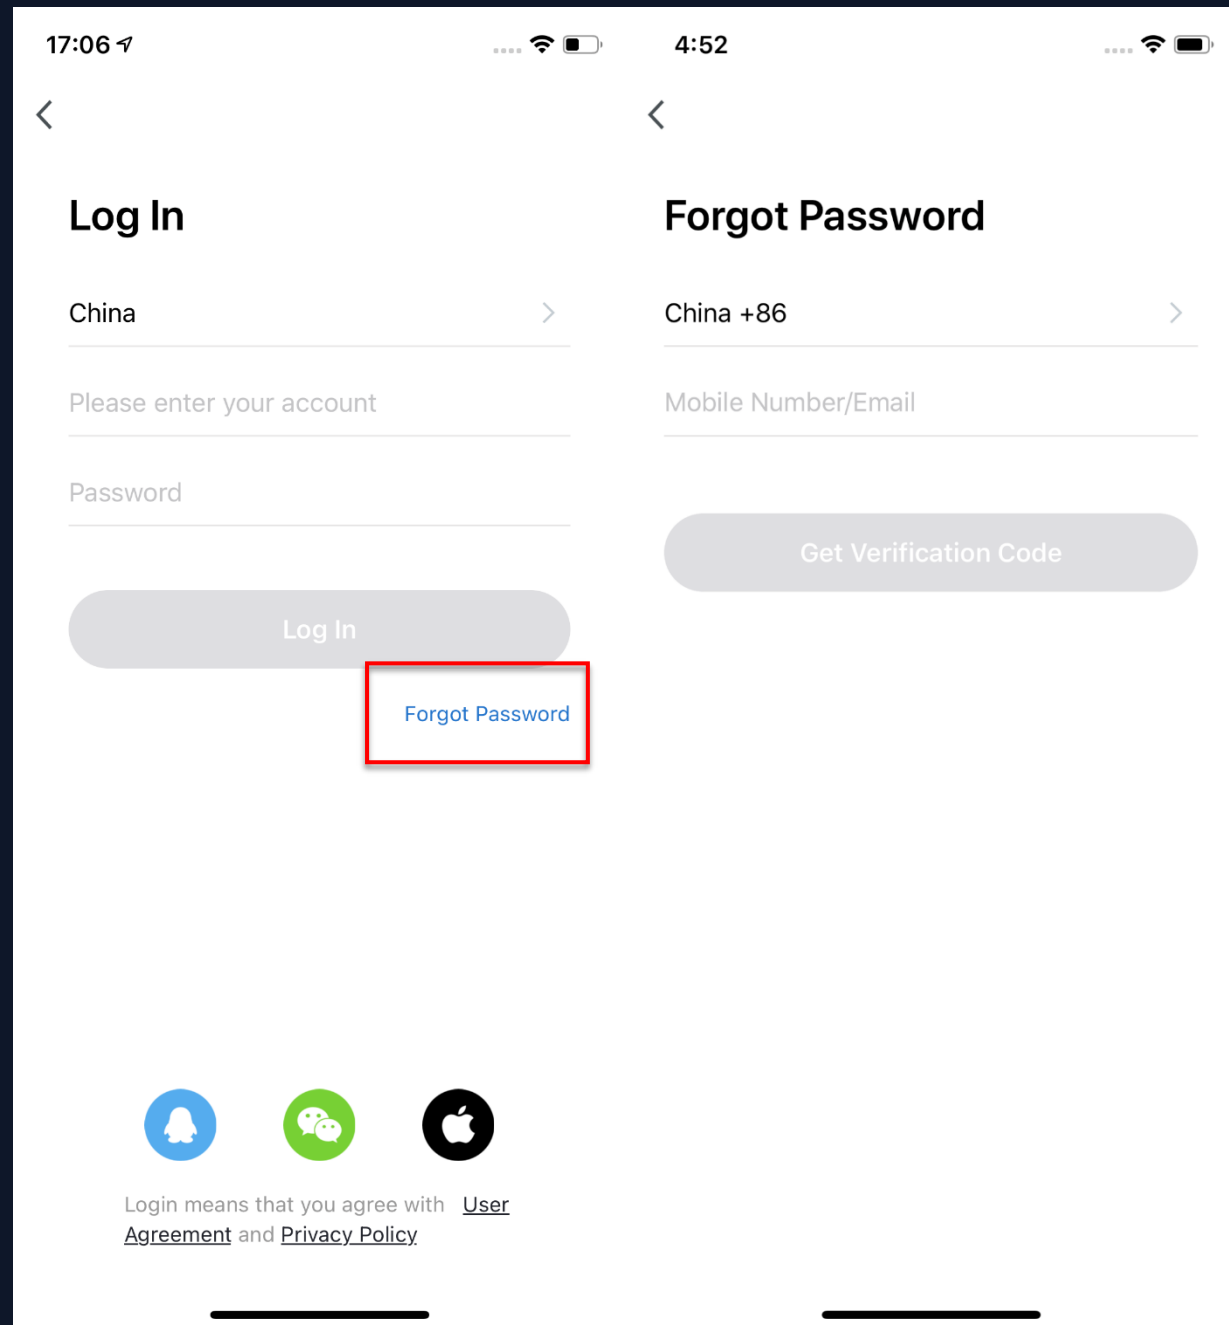

1. Click "Me" and then click the account picture
2. Click "Account and Security" to enter the account management page.

NO.2 Register/Log in/Change Account/Forgot Password

3. If you need to change your mobile phone number, click "Mobile Number", if you need to change your email number, click "Email Address". The following is an example of changing your email number
4. Click "Change mailbox"
5. Enter the account password set to change it.

NO.2 Register/Log in/Change Account/Forgot Password

Forgot Password

If you forget your password, you can follow the procedures and retrieve it.

1. Click "Forgot Password" ;
2. The system will automatically locate the current country/region you are in. You can also choose the country/region by yourself.
3. Enter the mobile number/email that you use to register and click "Get Verification Code" .

NO.2 Register/Log in/Change Account/Forgot Password

The image displays two mobile application screens side-by-side, illustrating the registration or password reset process.

Left Screen (4:55): Titled "Enter Verification Code". It features a numeric keypad at the bottom with digits 1-9, 0, and a backspace icon. Above the keypad, a message states: "Verification code has been sent to your email box: 316063723@qq.com, Resend (53s)".

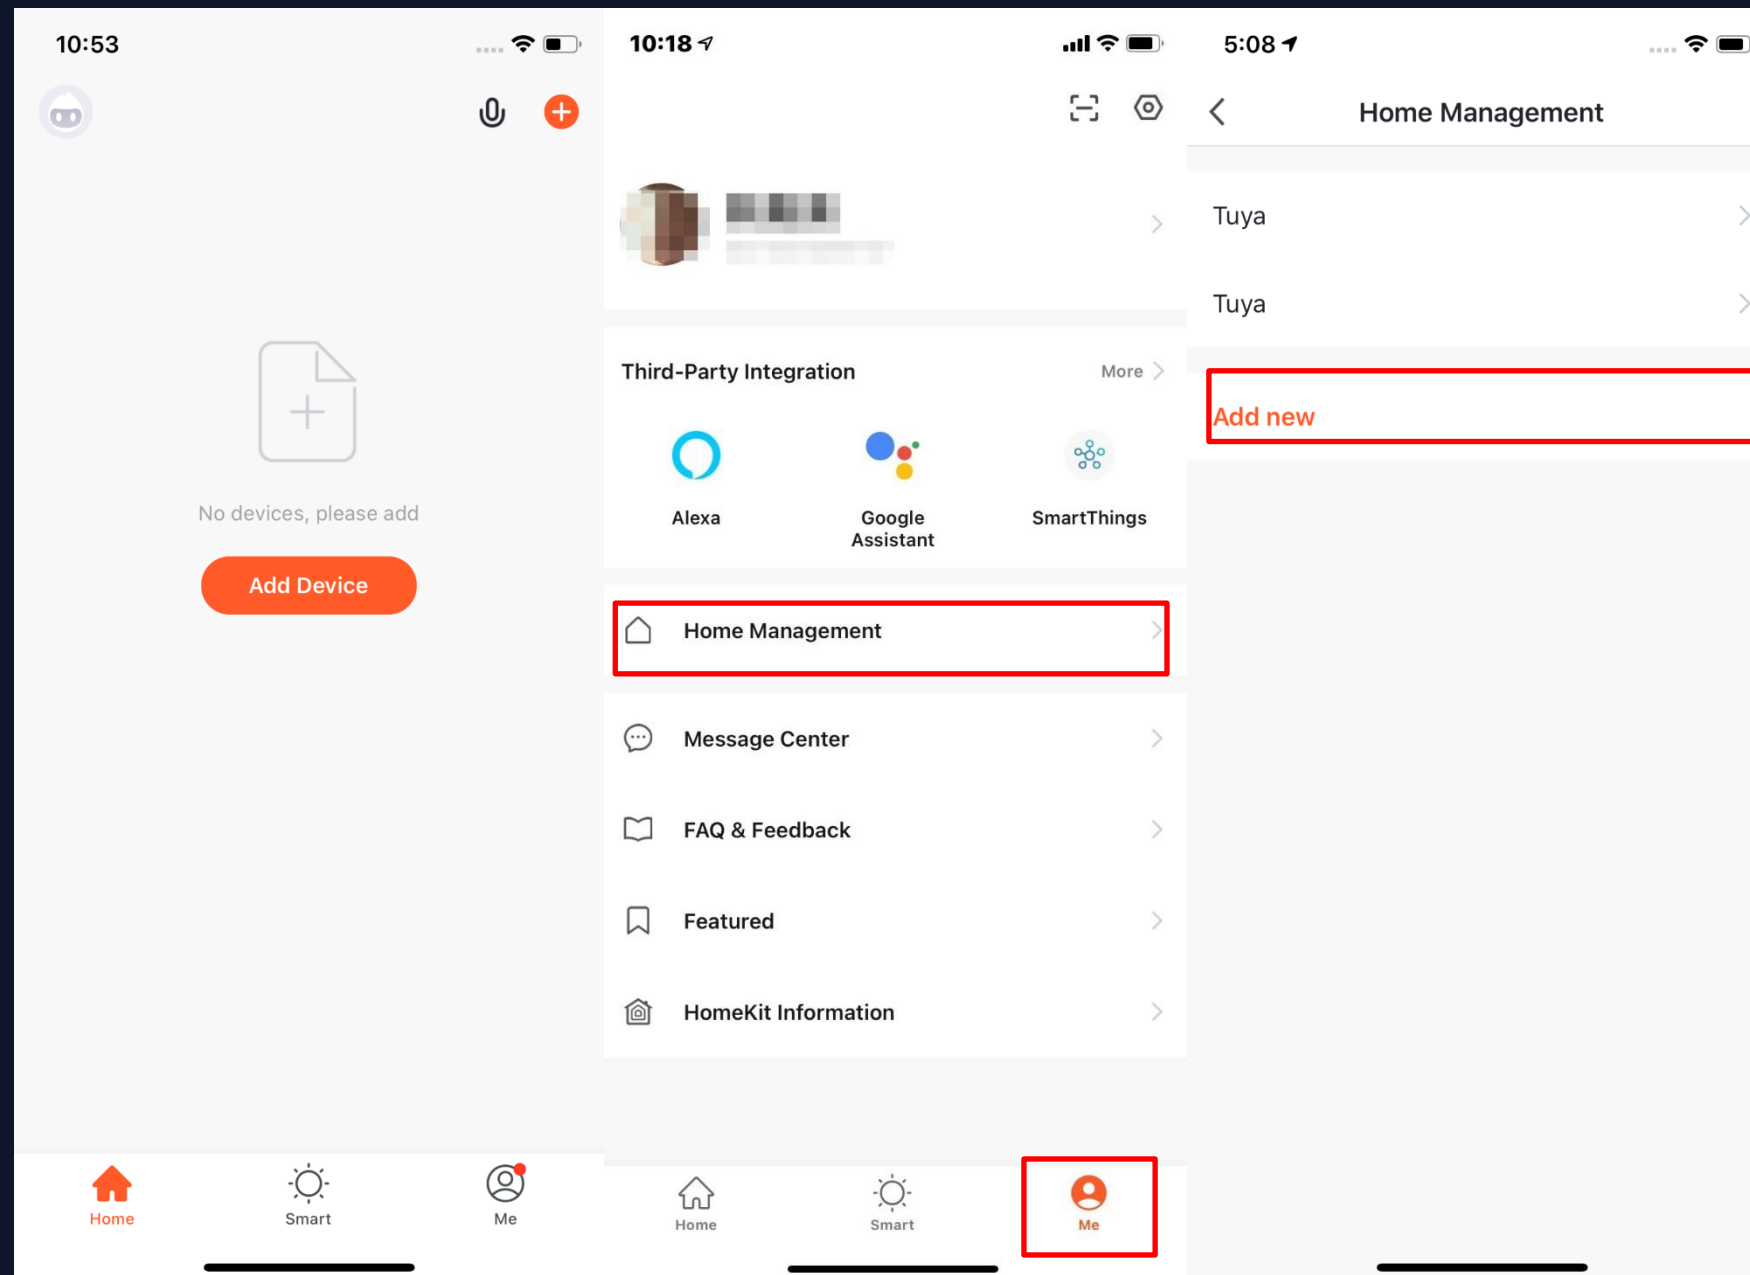

Right Screen (4:56): Titled "Set Password". It shows a password input field with a red error message: "Password contains 6 to 20 characters, including letters and digits". Below the input field is a "Done" button.

4. Enter the verification code you receive in SMS or email ;

5. Enter your new password, click "Done" to reset the password. The app will automatically log in using your new password.

6. For security concerns, the APP will detect risks in the phone system when logging in. If it detects root or jailbreaking risk, it will pop up "Security Reminder" and you can choose whether to exit the app or not. (**If you do not choose anything, the app will exit automatically.**)

NO.3 Use APP

1. When new users enter the app, they will see the home page where the devices are listed. The user profile will be shown in the top left corner. There will be room and environment information before you complete the home information.

2. Click "Me" in the lower right corner and choose "Home Management" to enter the page.

3. If you are a new user, when you click "Home Management", the app will directly turn to the page where you can add new homes and edit home information.

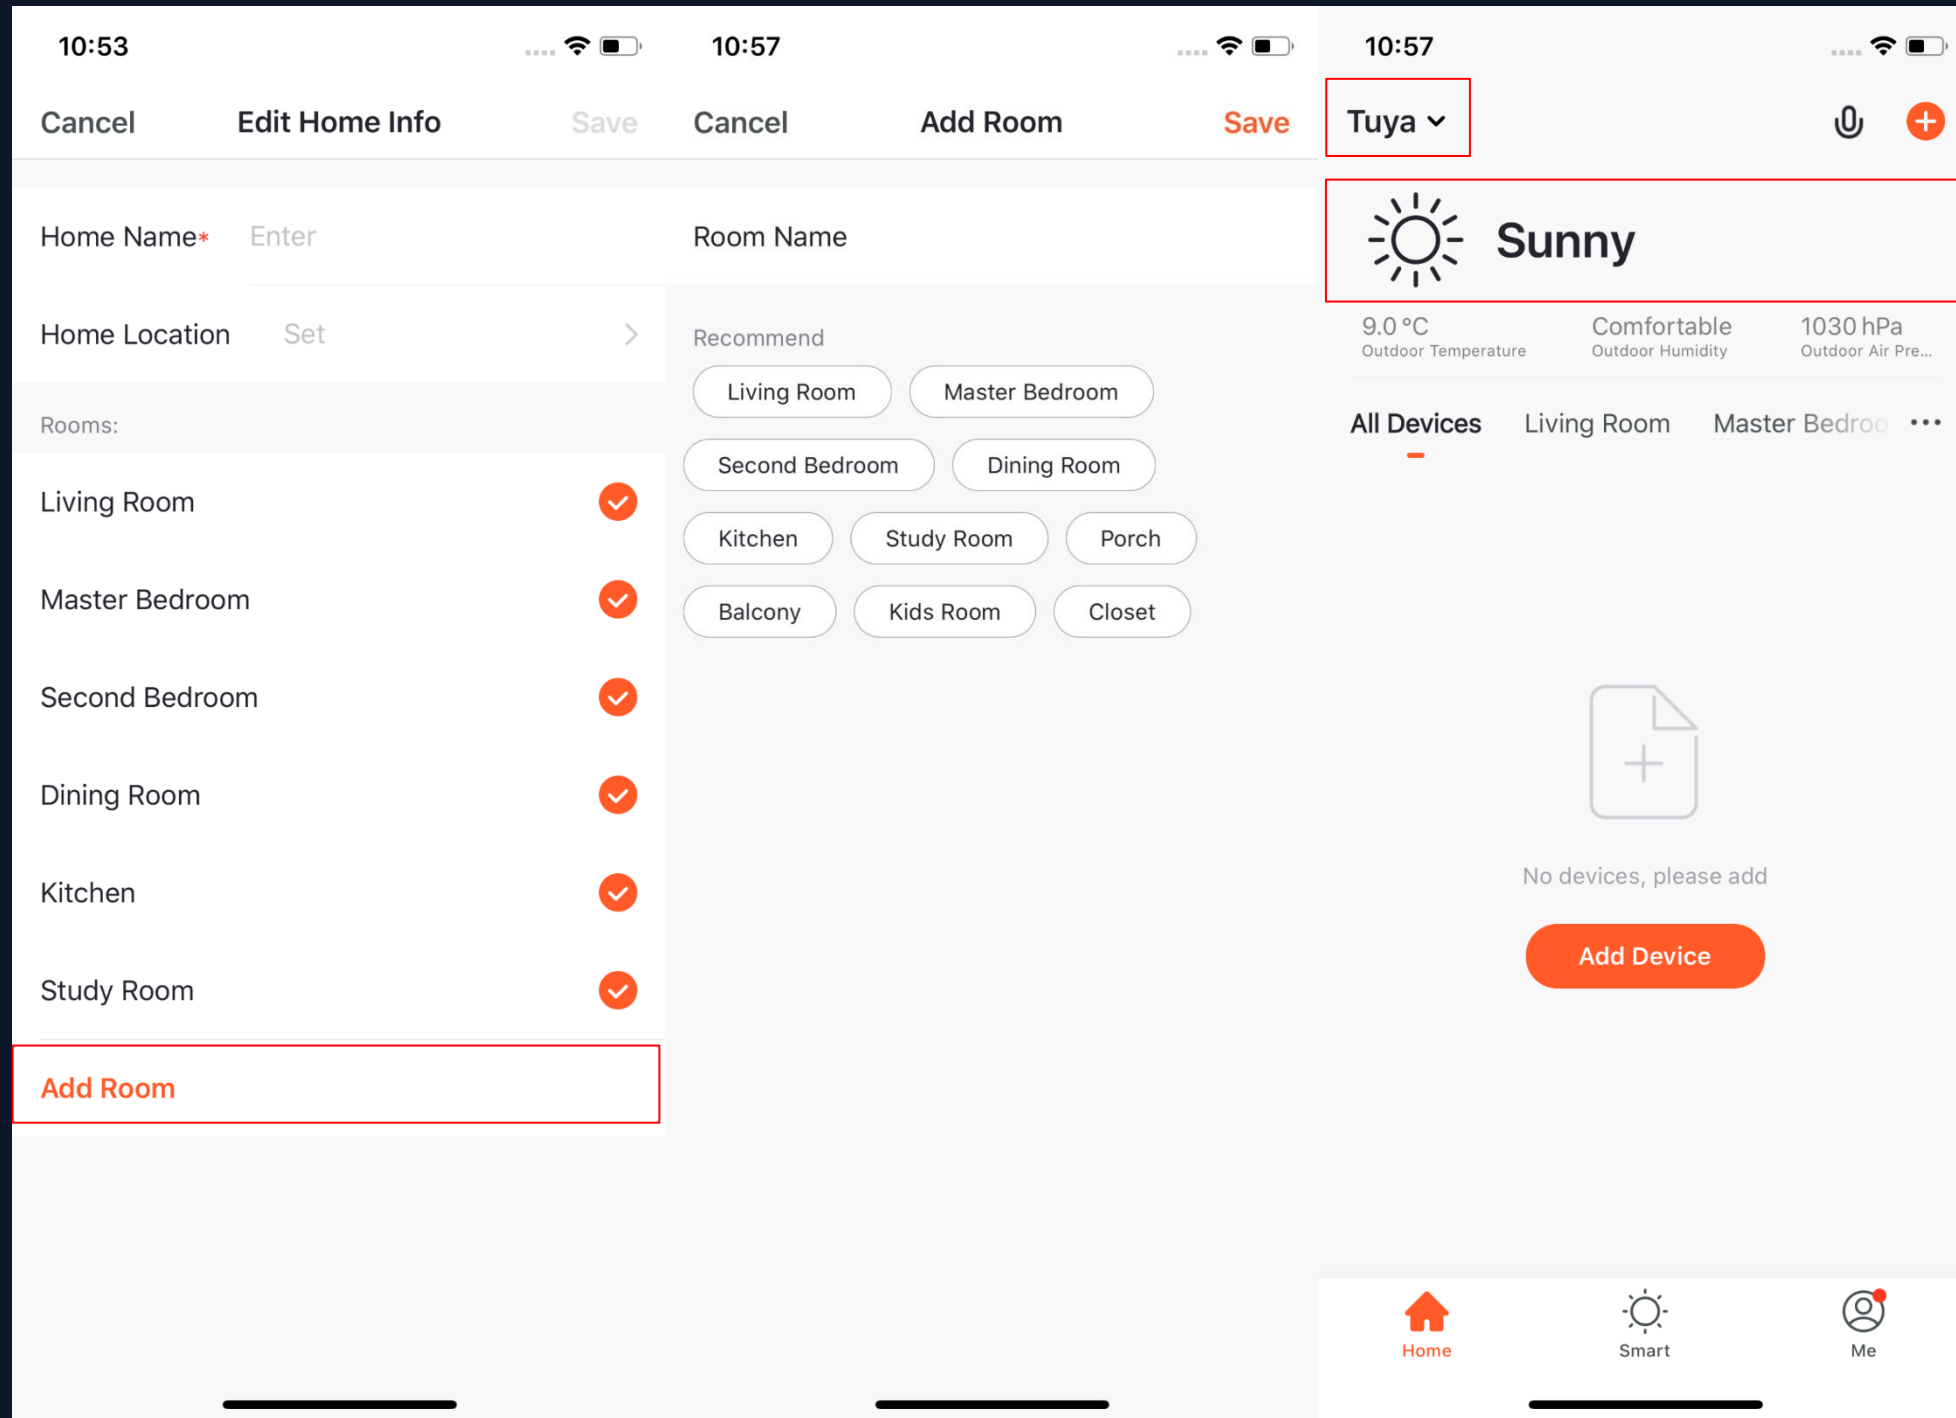

4. If you have already added homes before, you can click "Add new" to enter the page.

NO.3.1 Home/Member Management

5. You can change the "Home Name" as you like. (25 characters maximum) ;
6. "Home Location" will change with your phone location. You can also change the home location by setting the home coordinate. Click "Confirm" after making sure the location is correct.

NO.3.1 Home/Member Management

7. You can choose the room name given by the system. Or click “Add Room” to customize the room names (**25 characters maximum**).

8. After you complete the home information and turn to the home page, you will see information such as weather, humidity level and room names. If you have added more than one homes, click the button on the upper left to switch and manage other homes.

NO.3.1 Home/Member Management

9. In “Home” page, you can click the button in the upper left to switch to other homes.

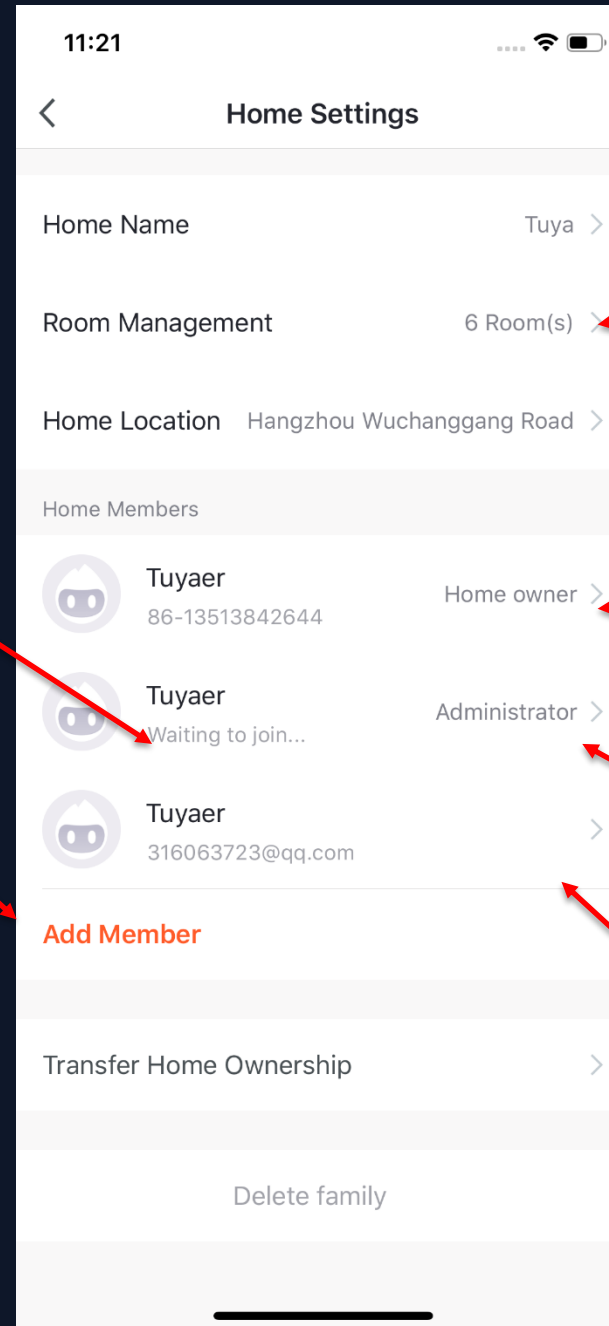

10. In “Home Management” ,you can edit the existing homes and add new homes. An account can control multiple homes, and the smart devices in different homes will not interfere with each other when using.

NO.3.1 Home/Member Management

After the invitation is sent, it will show "waiting to join" before the user agree to join.

Administrators can click here to invite other people to join this home.

11. Click "Tuya" to enter Home Settings page, as shown in the pictures

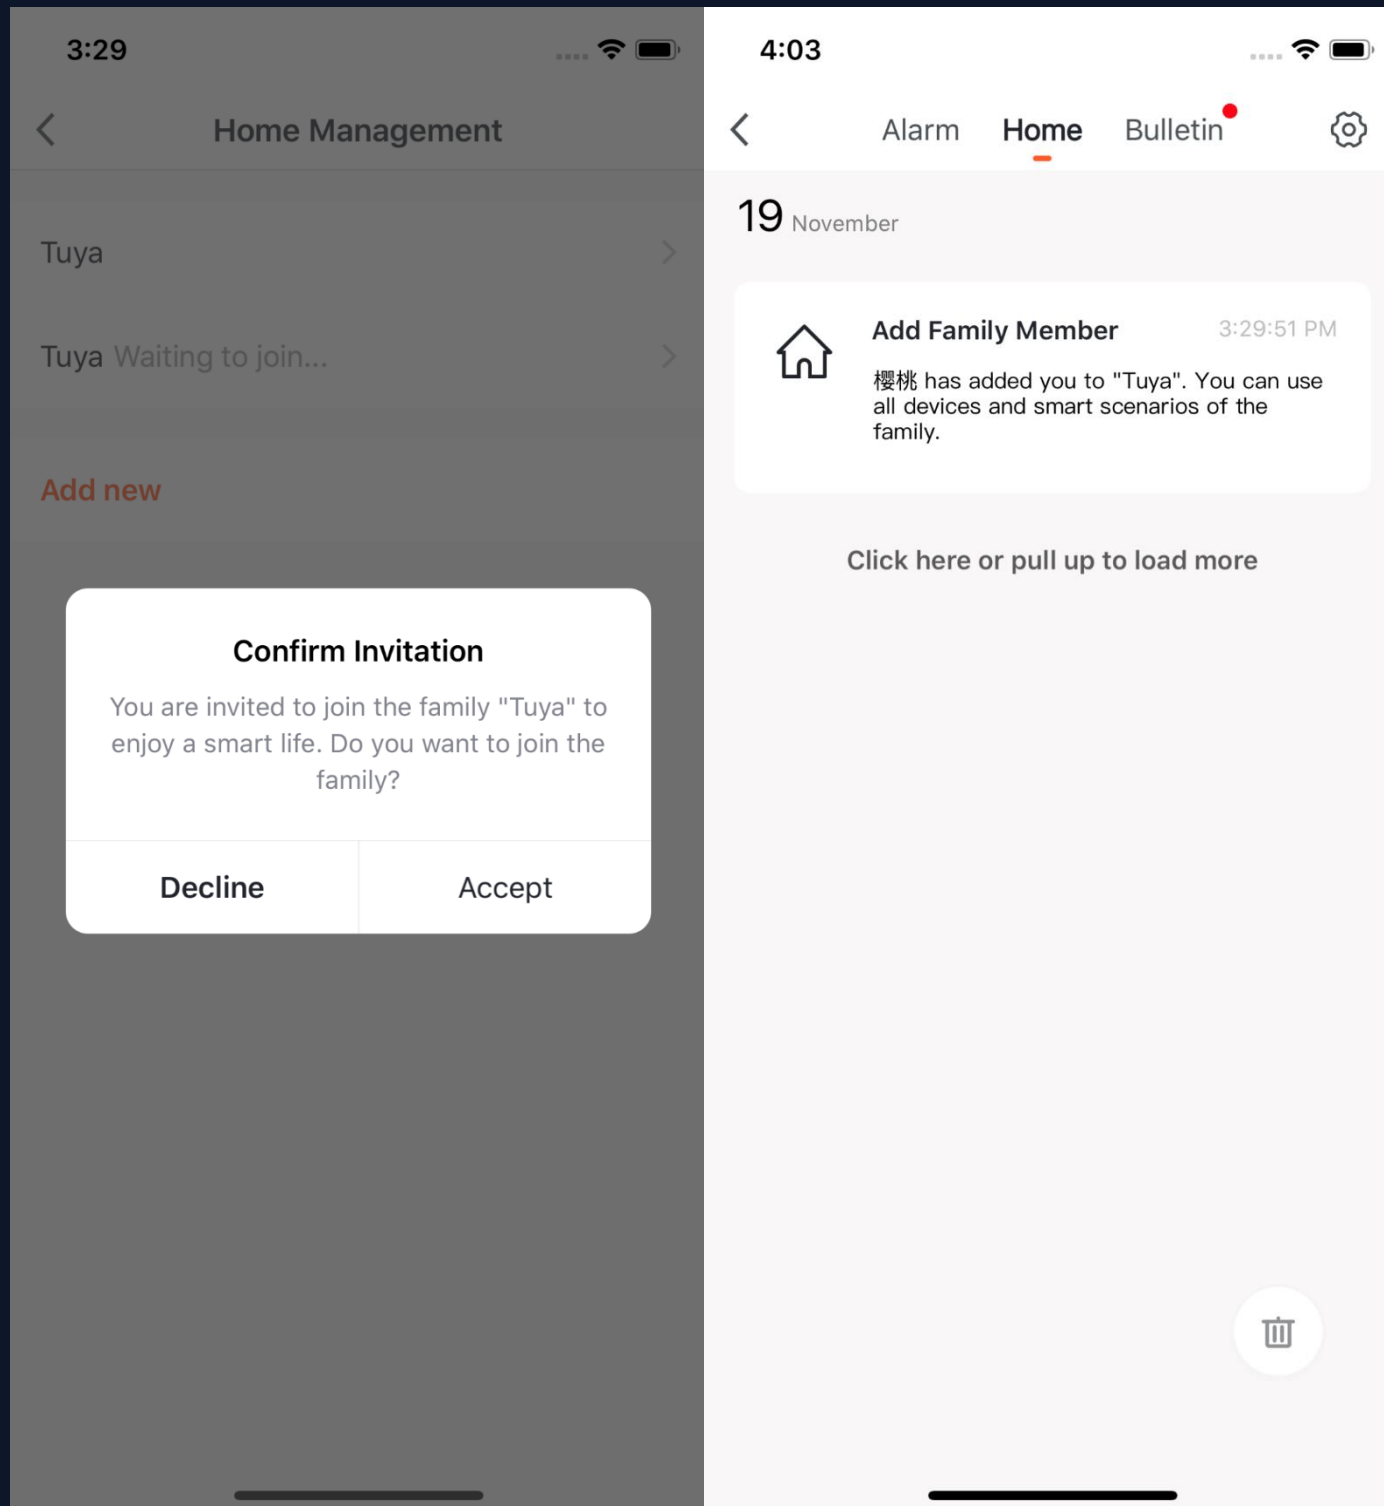

Edit the rooms in homes and manage the devices in the rooms.

Home owner has the highest access. It can manage all the devices, rooms, smarts, administrators and members in the home.

Administrator can manage devices, rooms, smarts and members.

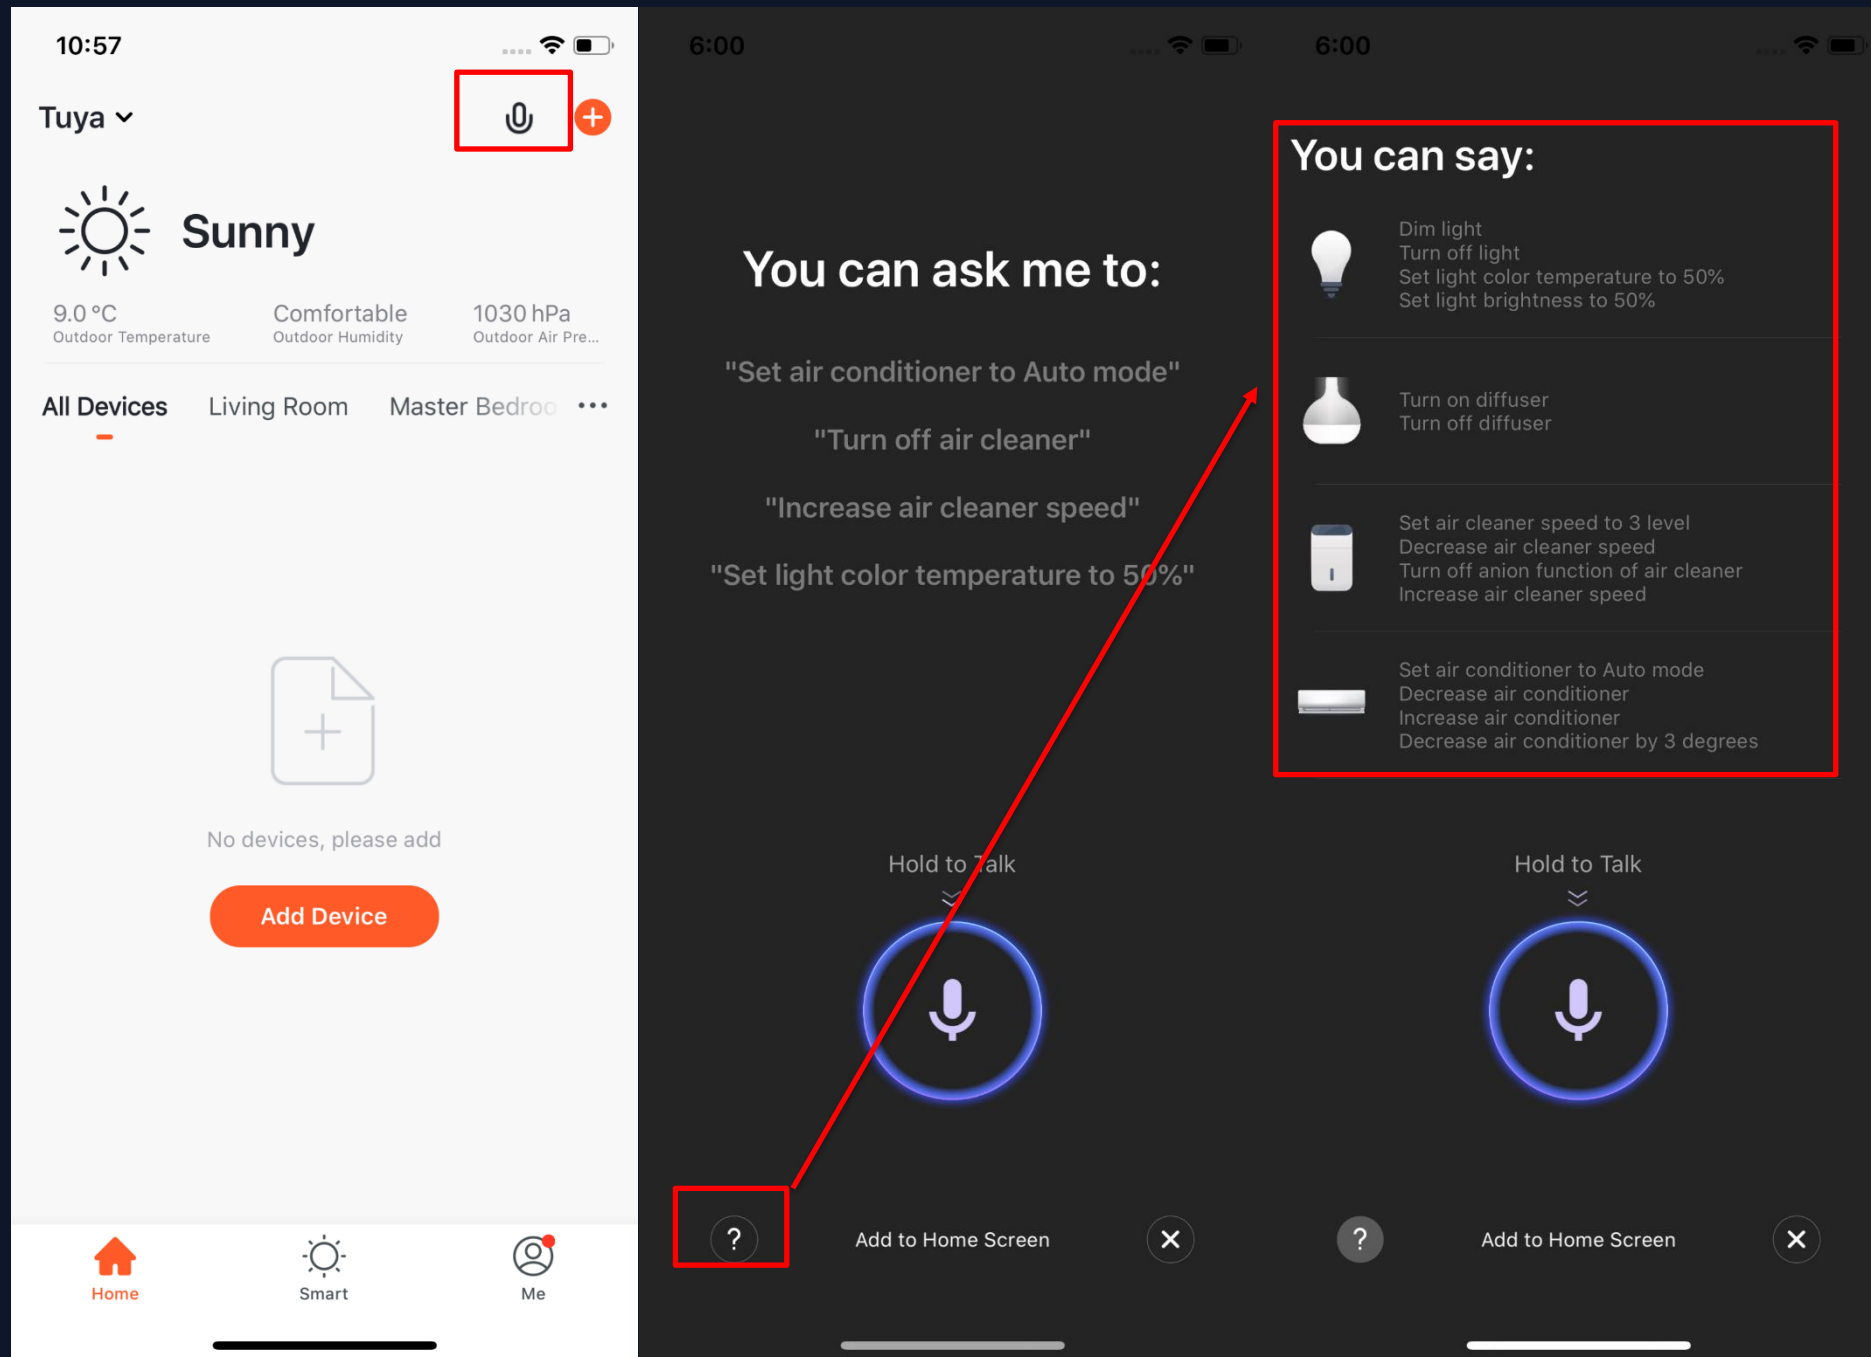

Member can only use devices and smarts.

NO.3.1 Home/Member Management

12. If you are invited to a home, you will receive pop-up notification in the APP. You can choose decline or accept. You will also receive notification in the message center.

NO.3.2 Voice Assistant

1. Click the mic icon in the top right corner and enter the voice assistant page.
2. If you do not know how to use it, you can click "?" on the bottom left and check for instruction.

NO.3.2 Voice Assistant

3. You can give command to the voice assistant according to the instruction. When giving instruction, please press the mic icon.
4. If you want to do this in a more convenient way, you can click "Add to Home Screen" and create shortcut in the phone home page.

NO.3.2 Voice Assistant

5. You can create Voice Assistant shortcut to the phone home page according to the instructions. (The pictures shown in the left are instructions for iOS user. If you are an android phone user, you only need to enable the access to create shortcut in the home page.)

NO.3.3 Environment Information

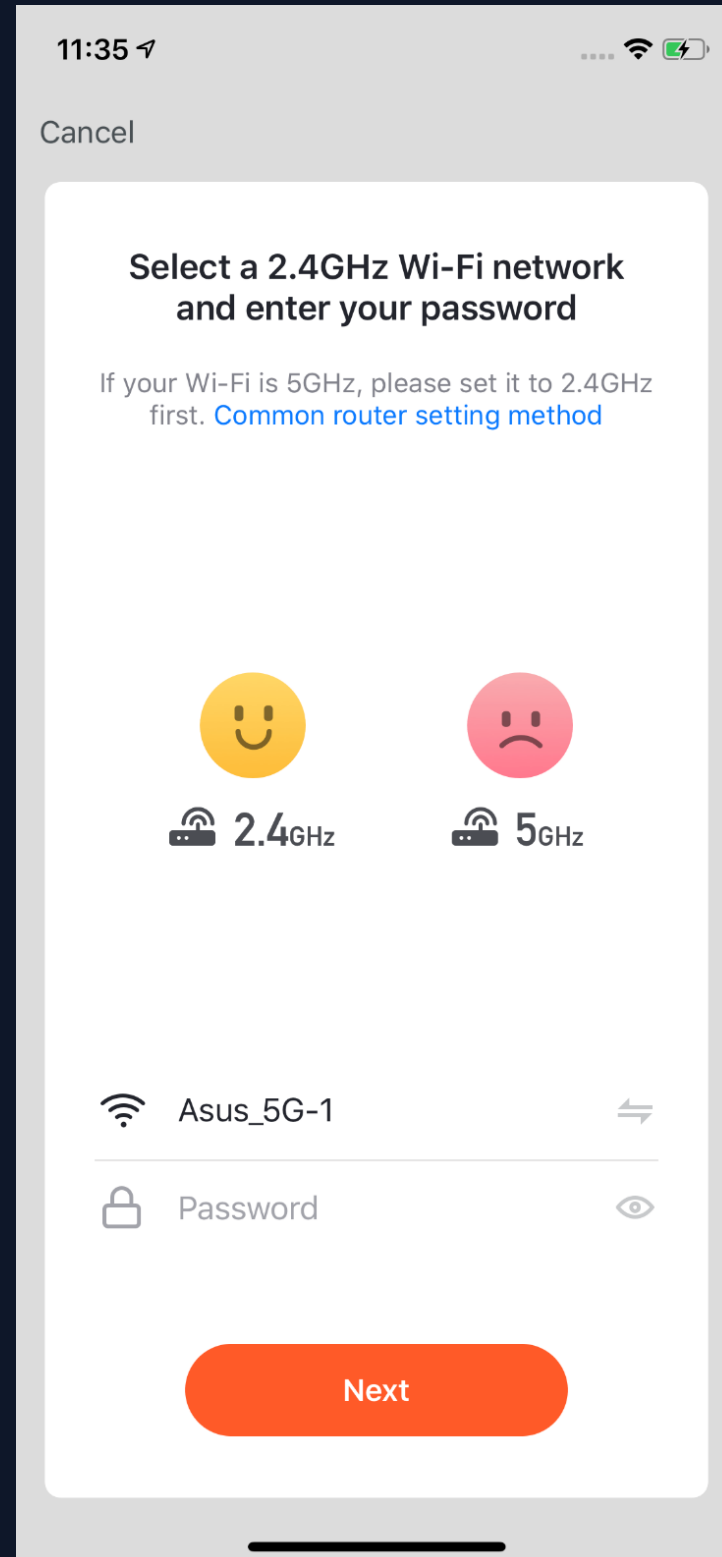

1. After you complete the home information and location, you can see weather and environment information in the home page. You can also click it to see more details.
2. If you have connected sensors devices with the APP(For example:air purifier, thermometer,hygrometer etc),it will show the environment information detected by these devices.
3. You can press the item and drag the information to adjust the orders.(Only home owners and administrators have the access to control this).

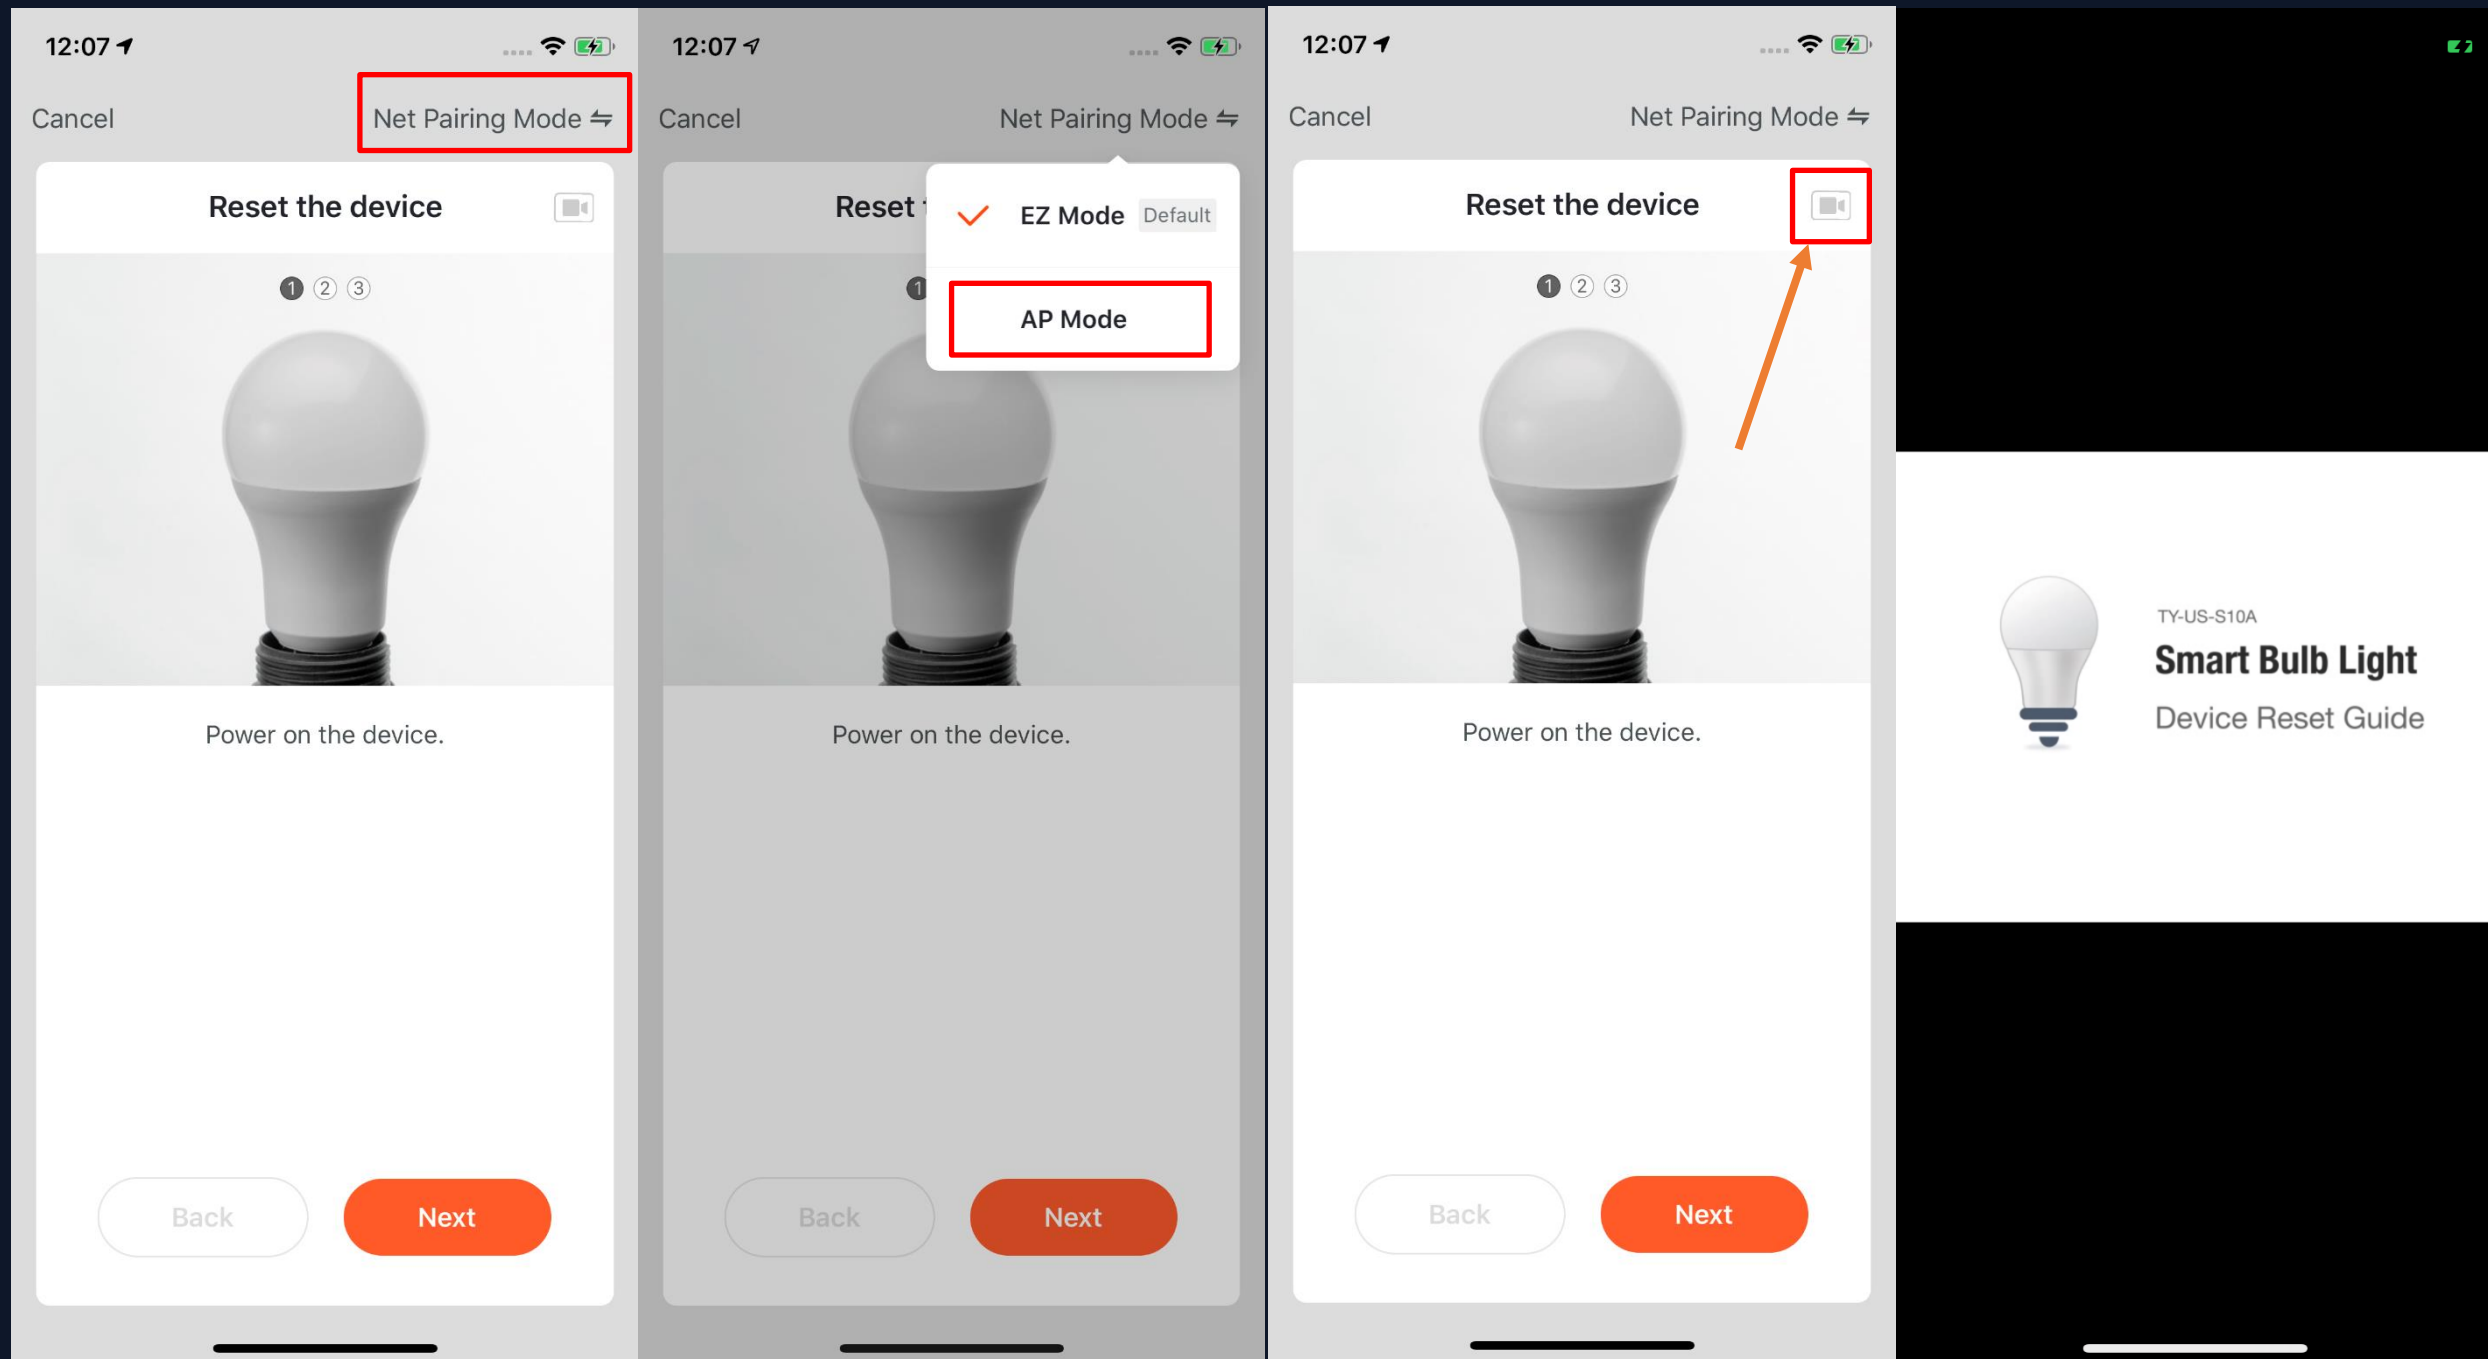

Click “Add Devices” or “+” in the top right corner to enter add device page. There are two ways of adding devices, which are “Add Manually” and “Auto Scan” . (If you use “Auto Scan” , you need to allow the APP to use Wi-Fi and Bluetooth)

NO.3.4.1 Add Manually- Wi-Fi Devices-Connect to Wi-Fi

1. Firstly , you will turn to the page where you need to enter your Wi-Fi password. (**Only 2.4G Wi-Fi can be supported.**)

NO.3.4.1 Add Manually-Wi-Fi Devices

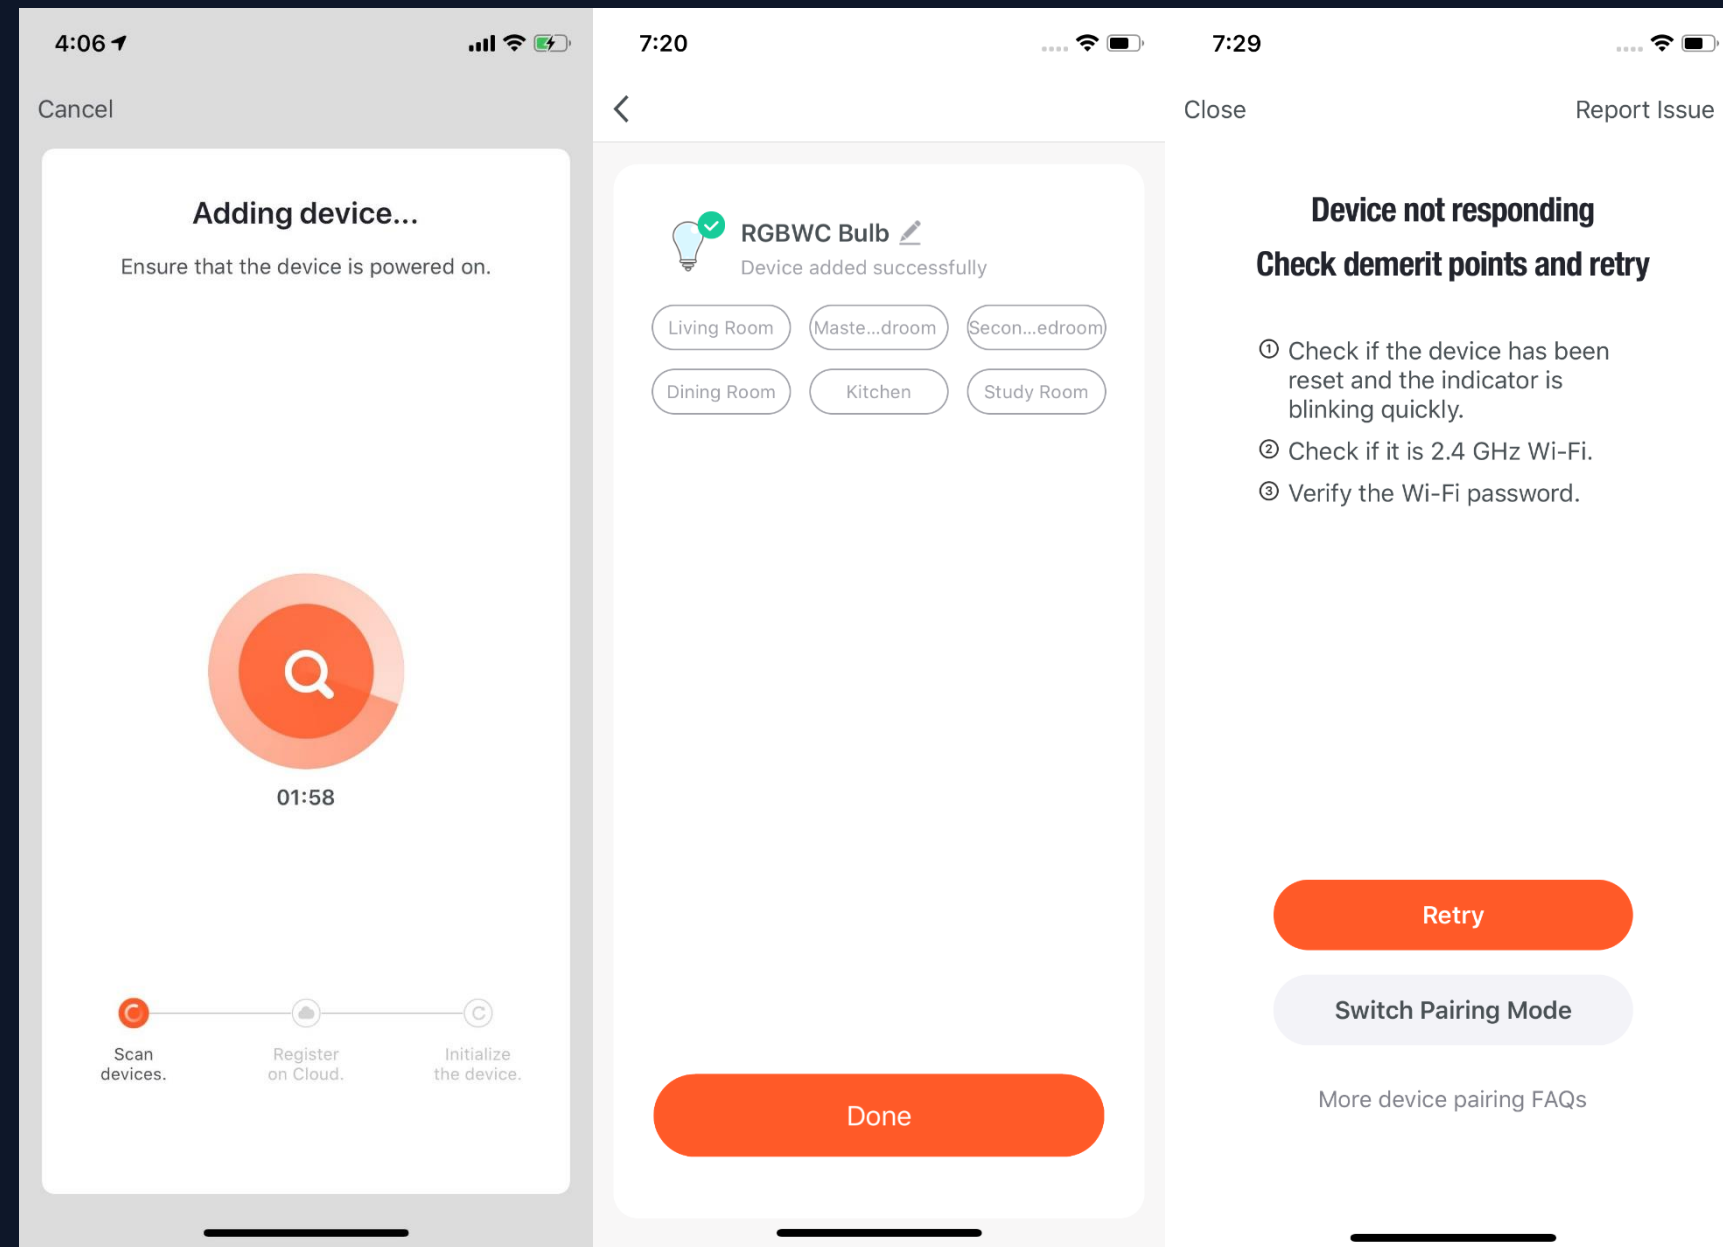

2. After click the "The indicator is not flashing" option, it will jump to the guide page. There are two network configuration modes for devices (except IPC devices and NB devices). They are EZ mode and AP mode. You can switch mode by clicking "Other Mode" in the top right corner. (There is a Guide Video available)

NO.3.4.1 Add Manually- Wi-Fi-EZ Mode

1. If you use EZ Mode to connect devices, you need to follow the three steps and set the indicator light to fast blinking.

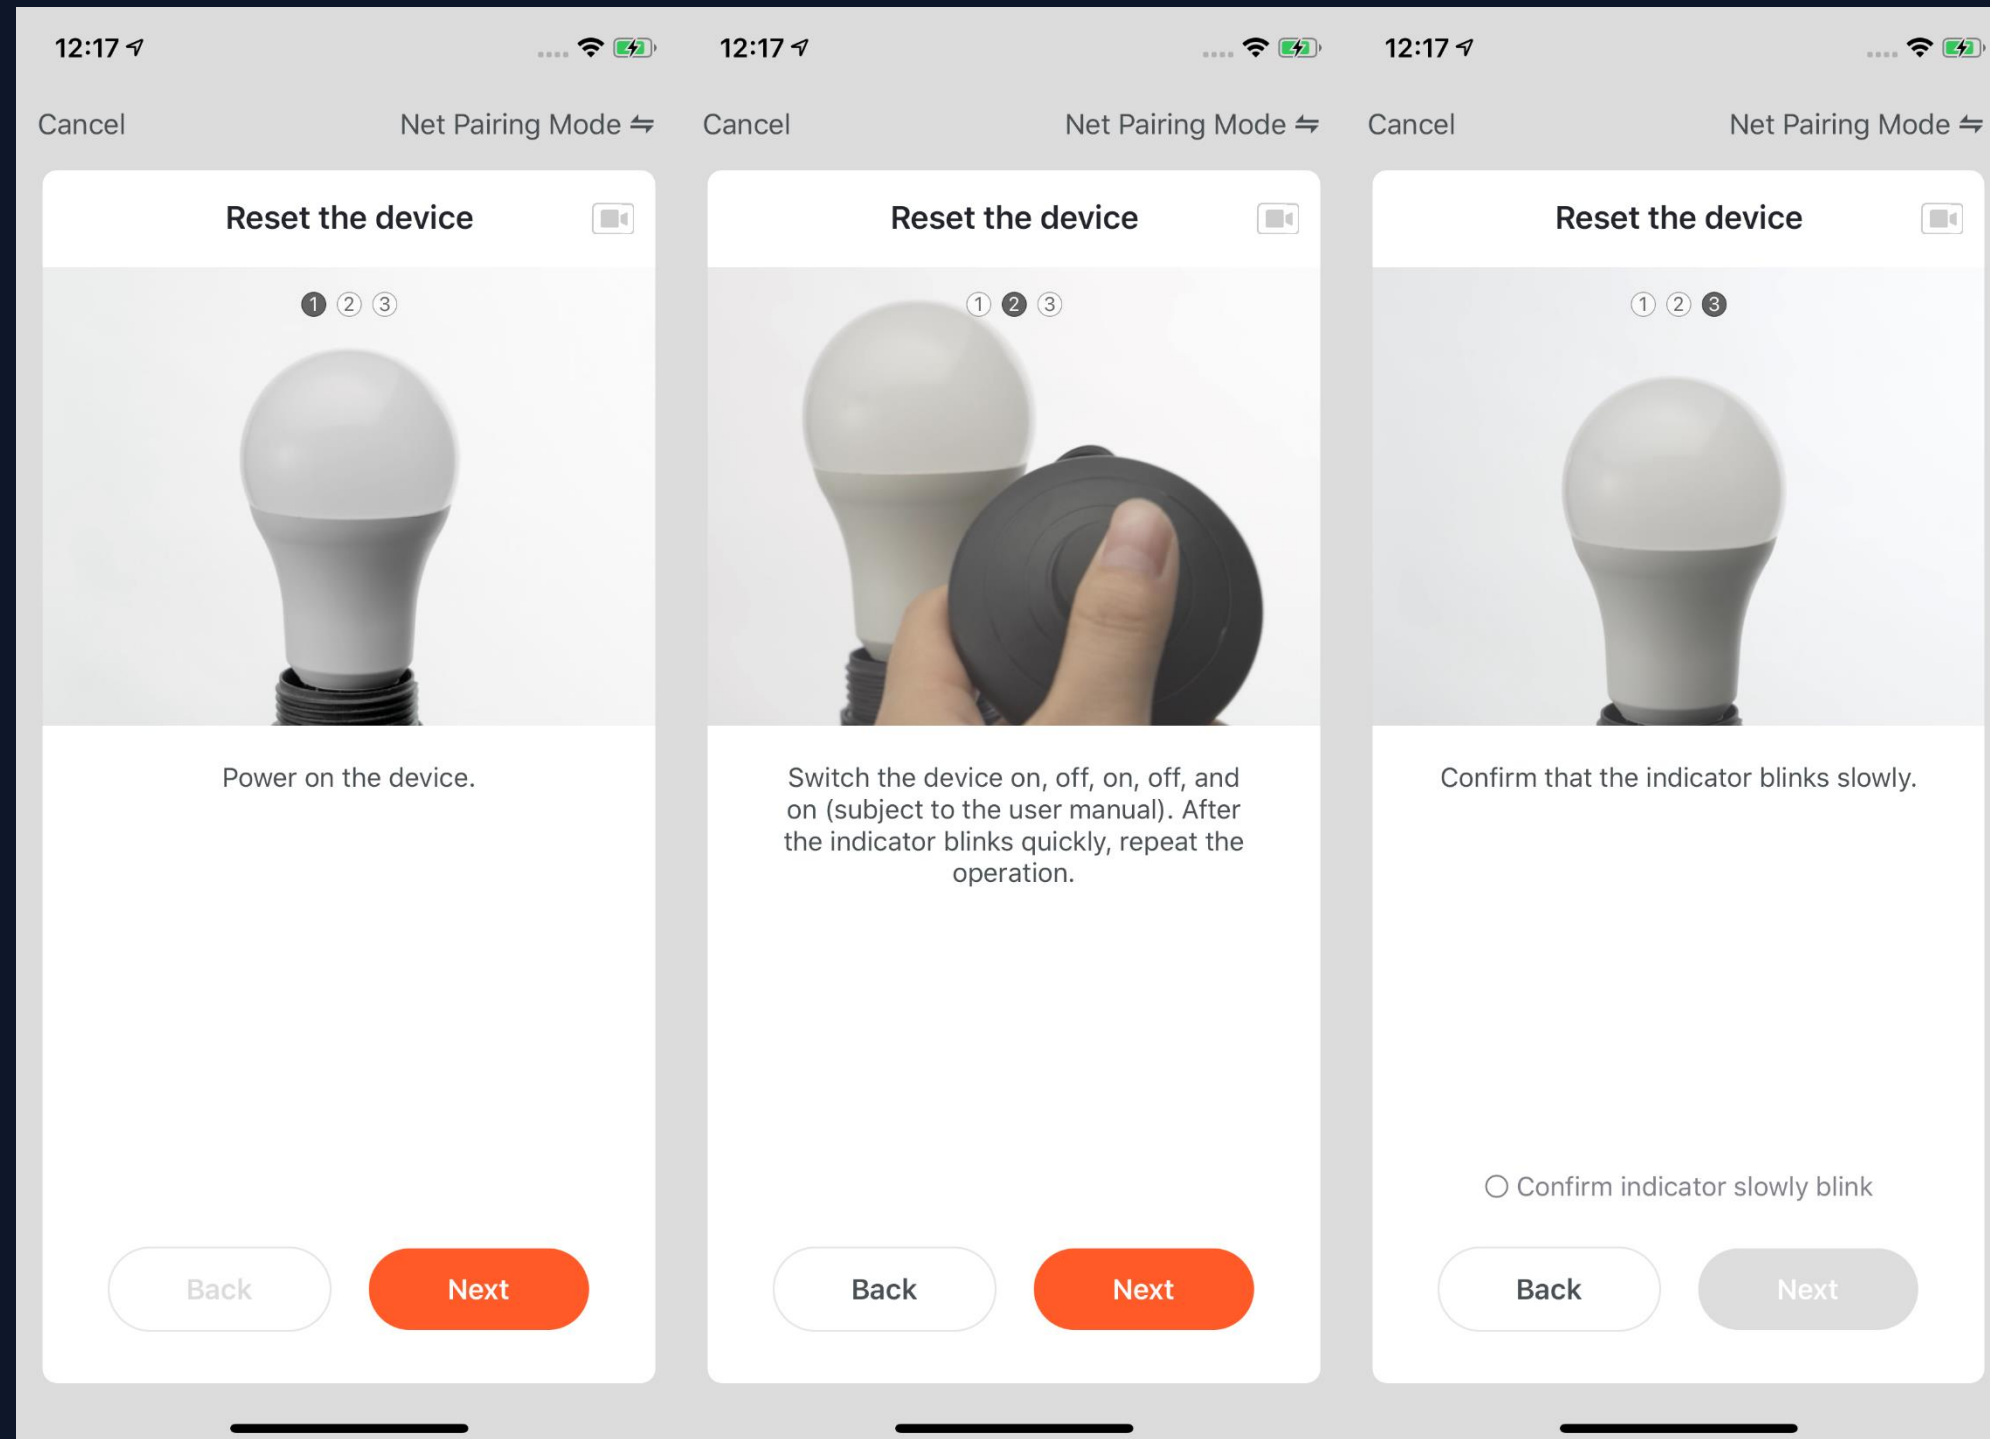

NO.3.4.1 Add Manually - Wi-Fi Devices-Network Configuration

2. If you use EZ mode to connect devices, the process is presented in the first two pictures in the left. You can customize the names of the devices (64 characters maximum) and assign rooms for the devices.

3. If it fails to connect the device, the APP will show the third page in the left. You can follow the instructions to solve the problems.

NO.3.4.1 Add Manually- Wi-Fi-AP Mode

1. If the network in your home is 2.4Ghz and 5Ghz mixed, you can use AP mode (compatibility mode).

2. If you use AP mode to connect devices, you need to follow the three steps in the page to set the indicator light to blinking slowly.

NO.3.4.1 Add Manually-Wi-Fi Devices-Network Configuration

3. If you use AP mode to connect the device, you need to connect your phone to a Wi-Fi that starts with the name "SmartLife" .

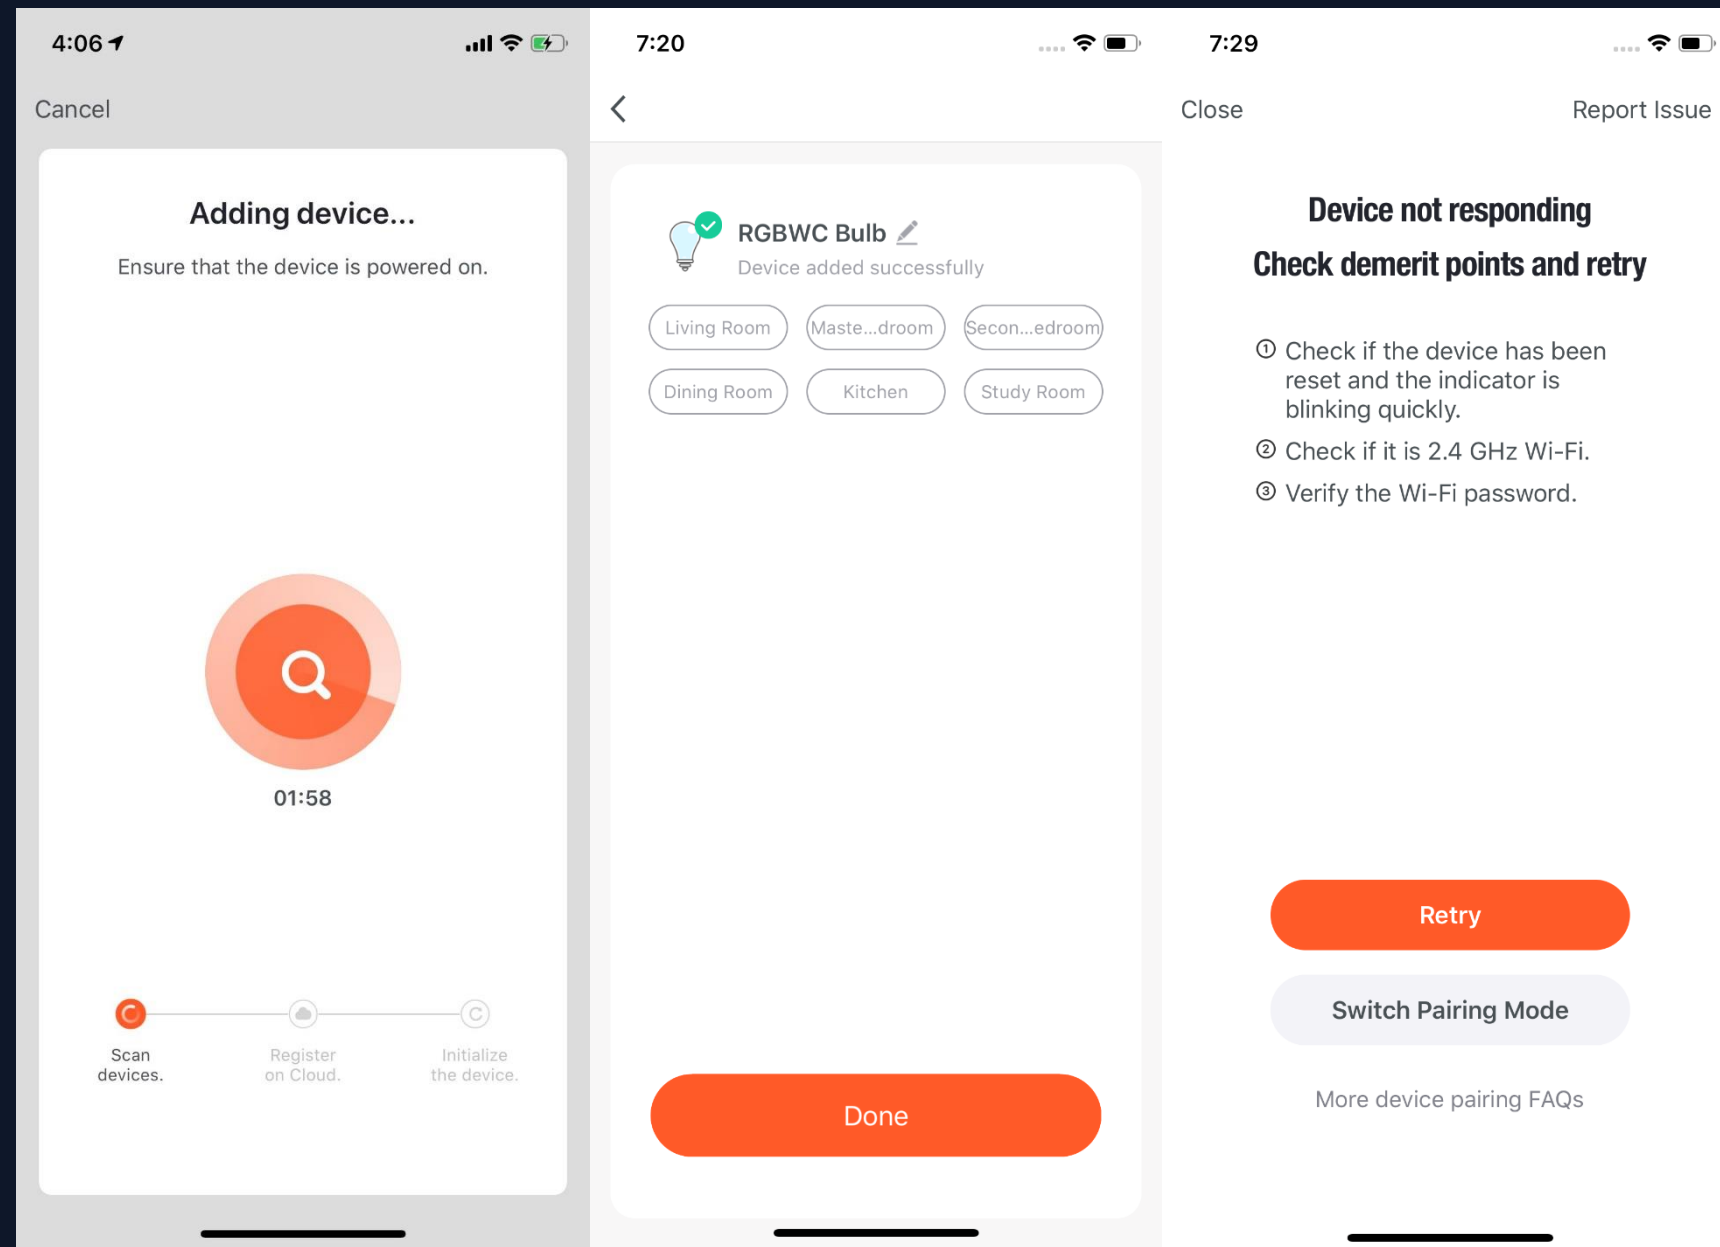

NO.3.4.1 Add Manually-Wi-Fi Devices-Network Configuration

4. Open the Wi-Fi set up page in the phone and find hotspots that starts with "SmartLife" , click it to connect.

5. After successfully connecting to the Wi-Fi, return the APP and start the network configuration. (The Wi-Fi needs to be 2.4G. Some names of device's hotspots may not necessarily start with "SmartLife" . It could be customized names.)

NO.3.4.1 Add Manually-Wi-Fi Devices-Network Configuration

6. Connect to the device's hotspot and return to the network configuration page in the APP to continue the process. The page will be shown as the left pictures.

After the devices are successfully connected, you can customize the devices' names(64 characters maximum) and assign rooms for the devices.

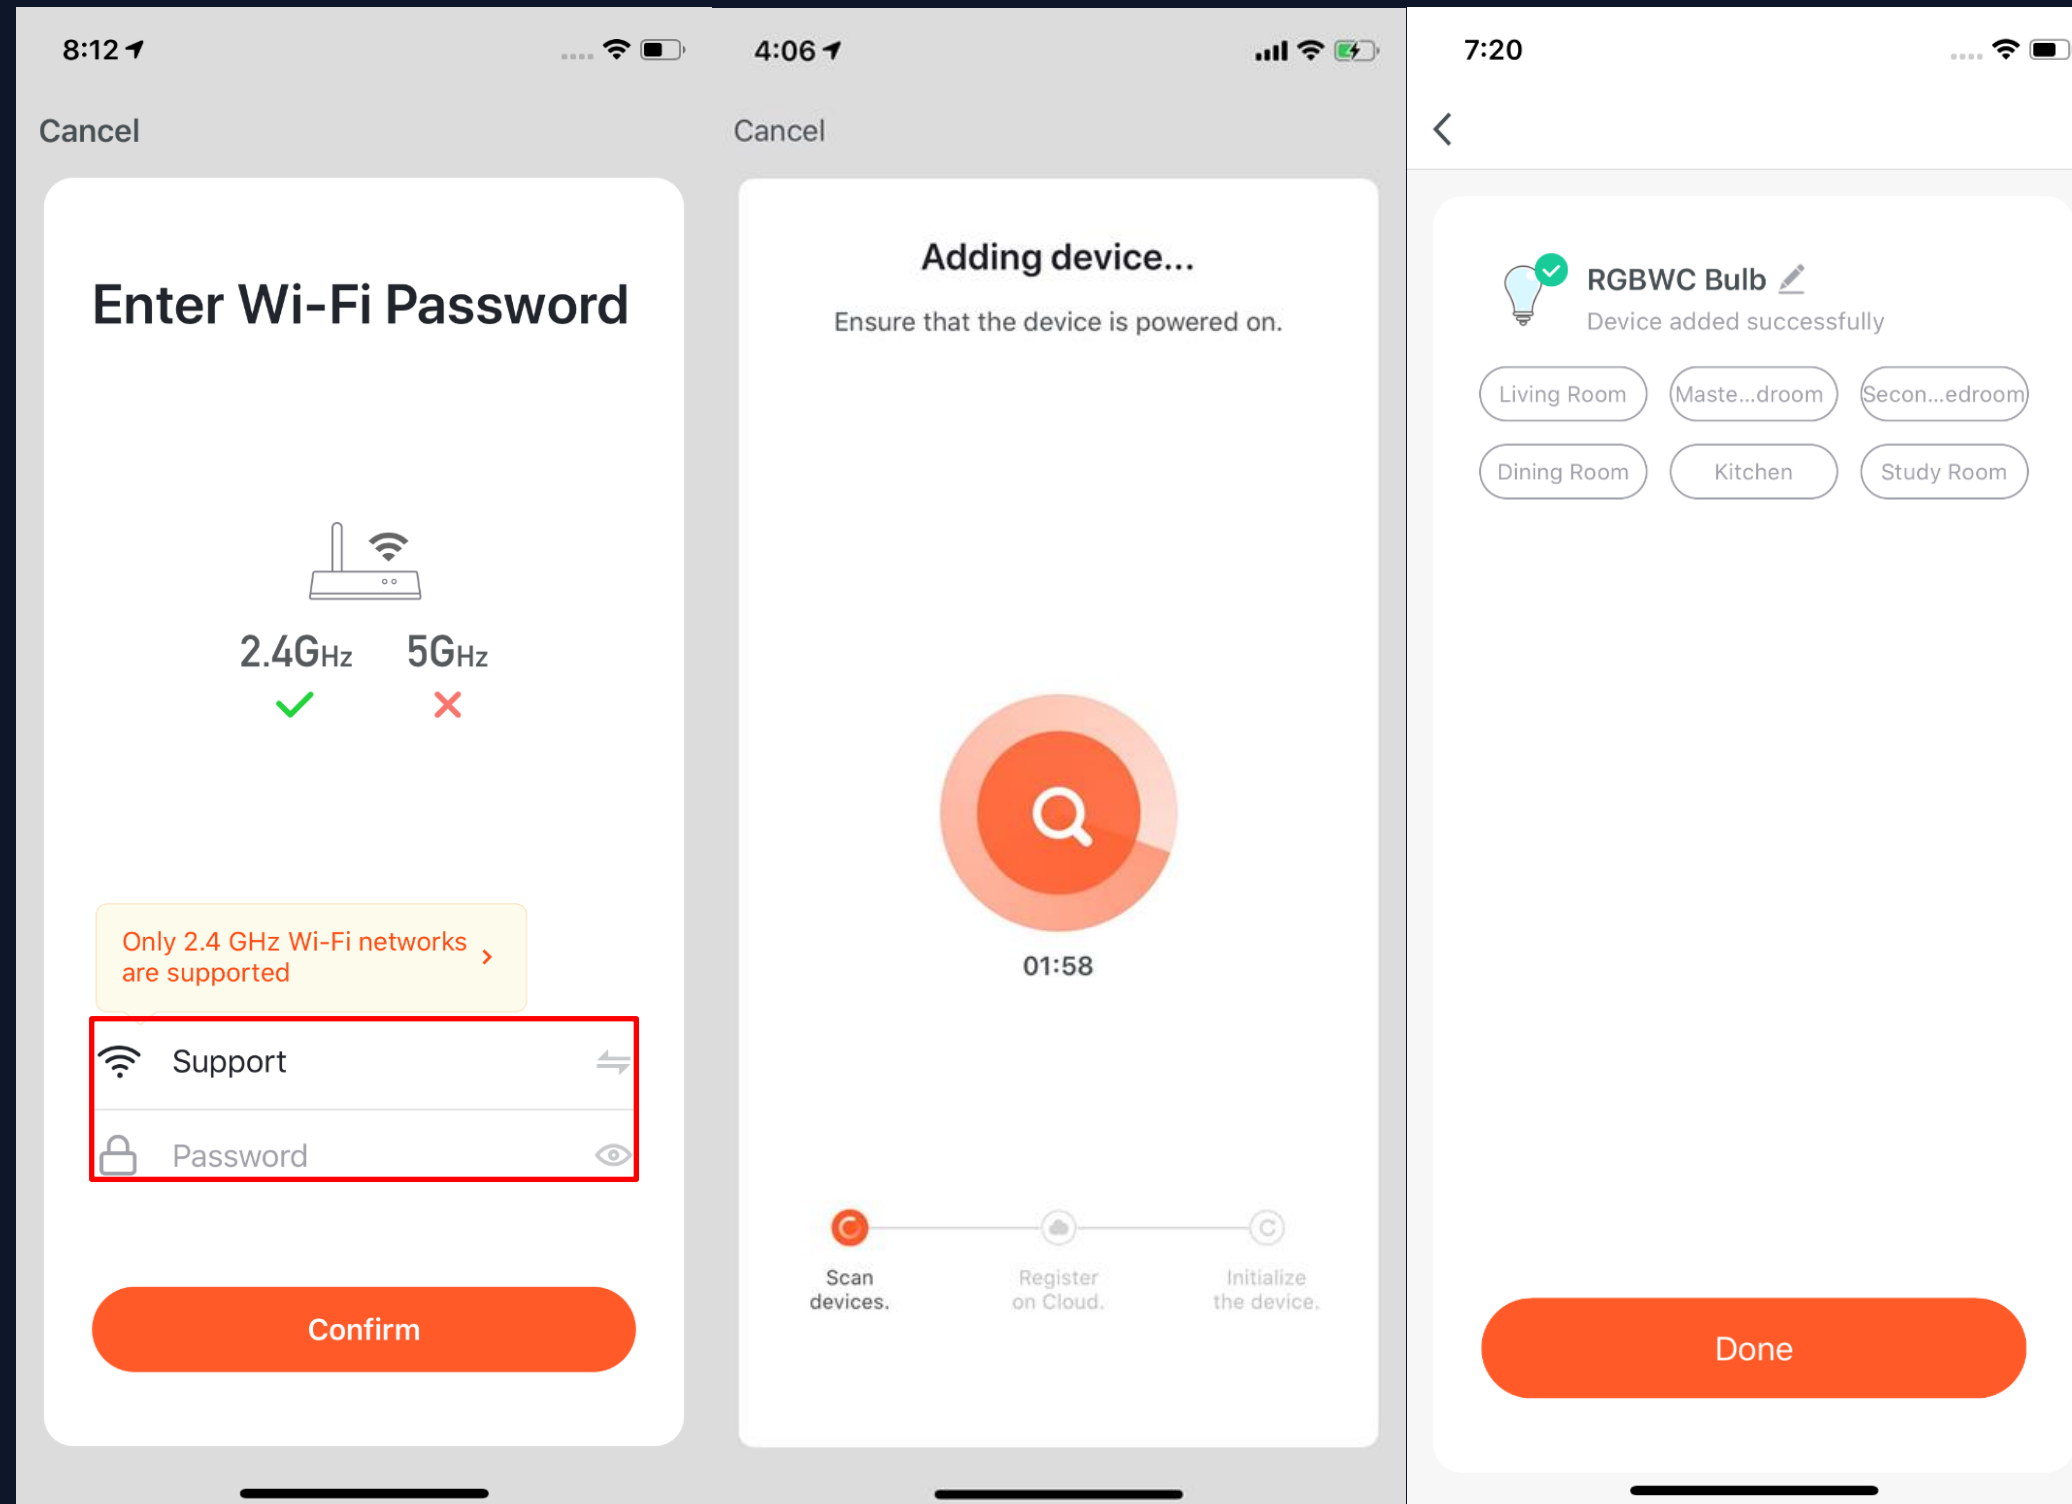

7. If it fails to connect the device, the APP will show the third page in the left. You can follow the instructions to solve the problems.

NO.3.4.1 Add Manually-Wi-fi bluetooth dual mode network

1. When you use the WiFi and bluetooth membrane dual distribution network product, you can connect the device to the power supply first, and the App home page will automatically pop up the device to be connected. If there are multiple devices to be connected, choose the device you need.

NO.3.4.1 Add Manually-Wi-fi bluetooth dual mode network

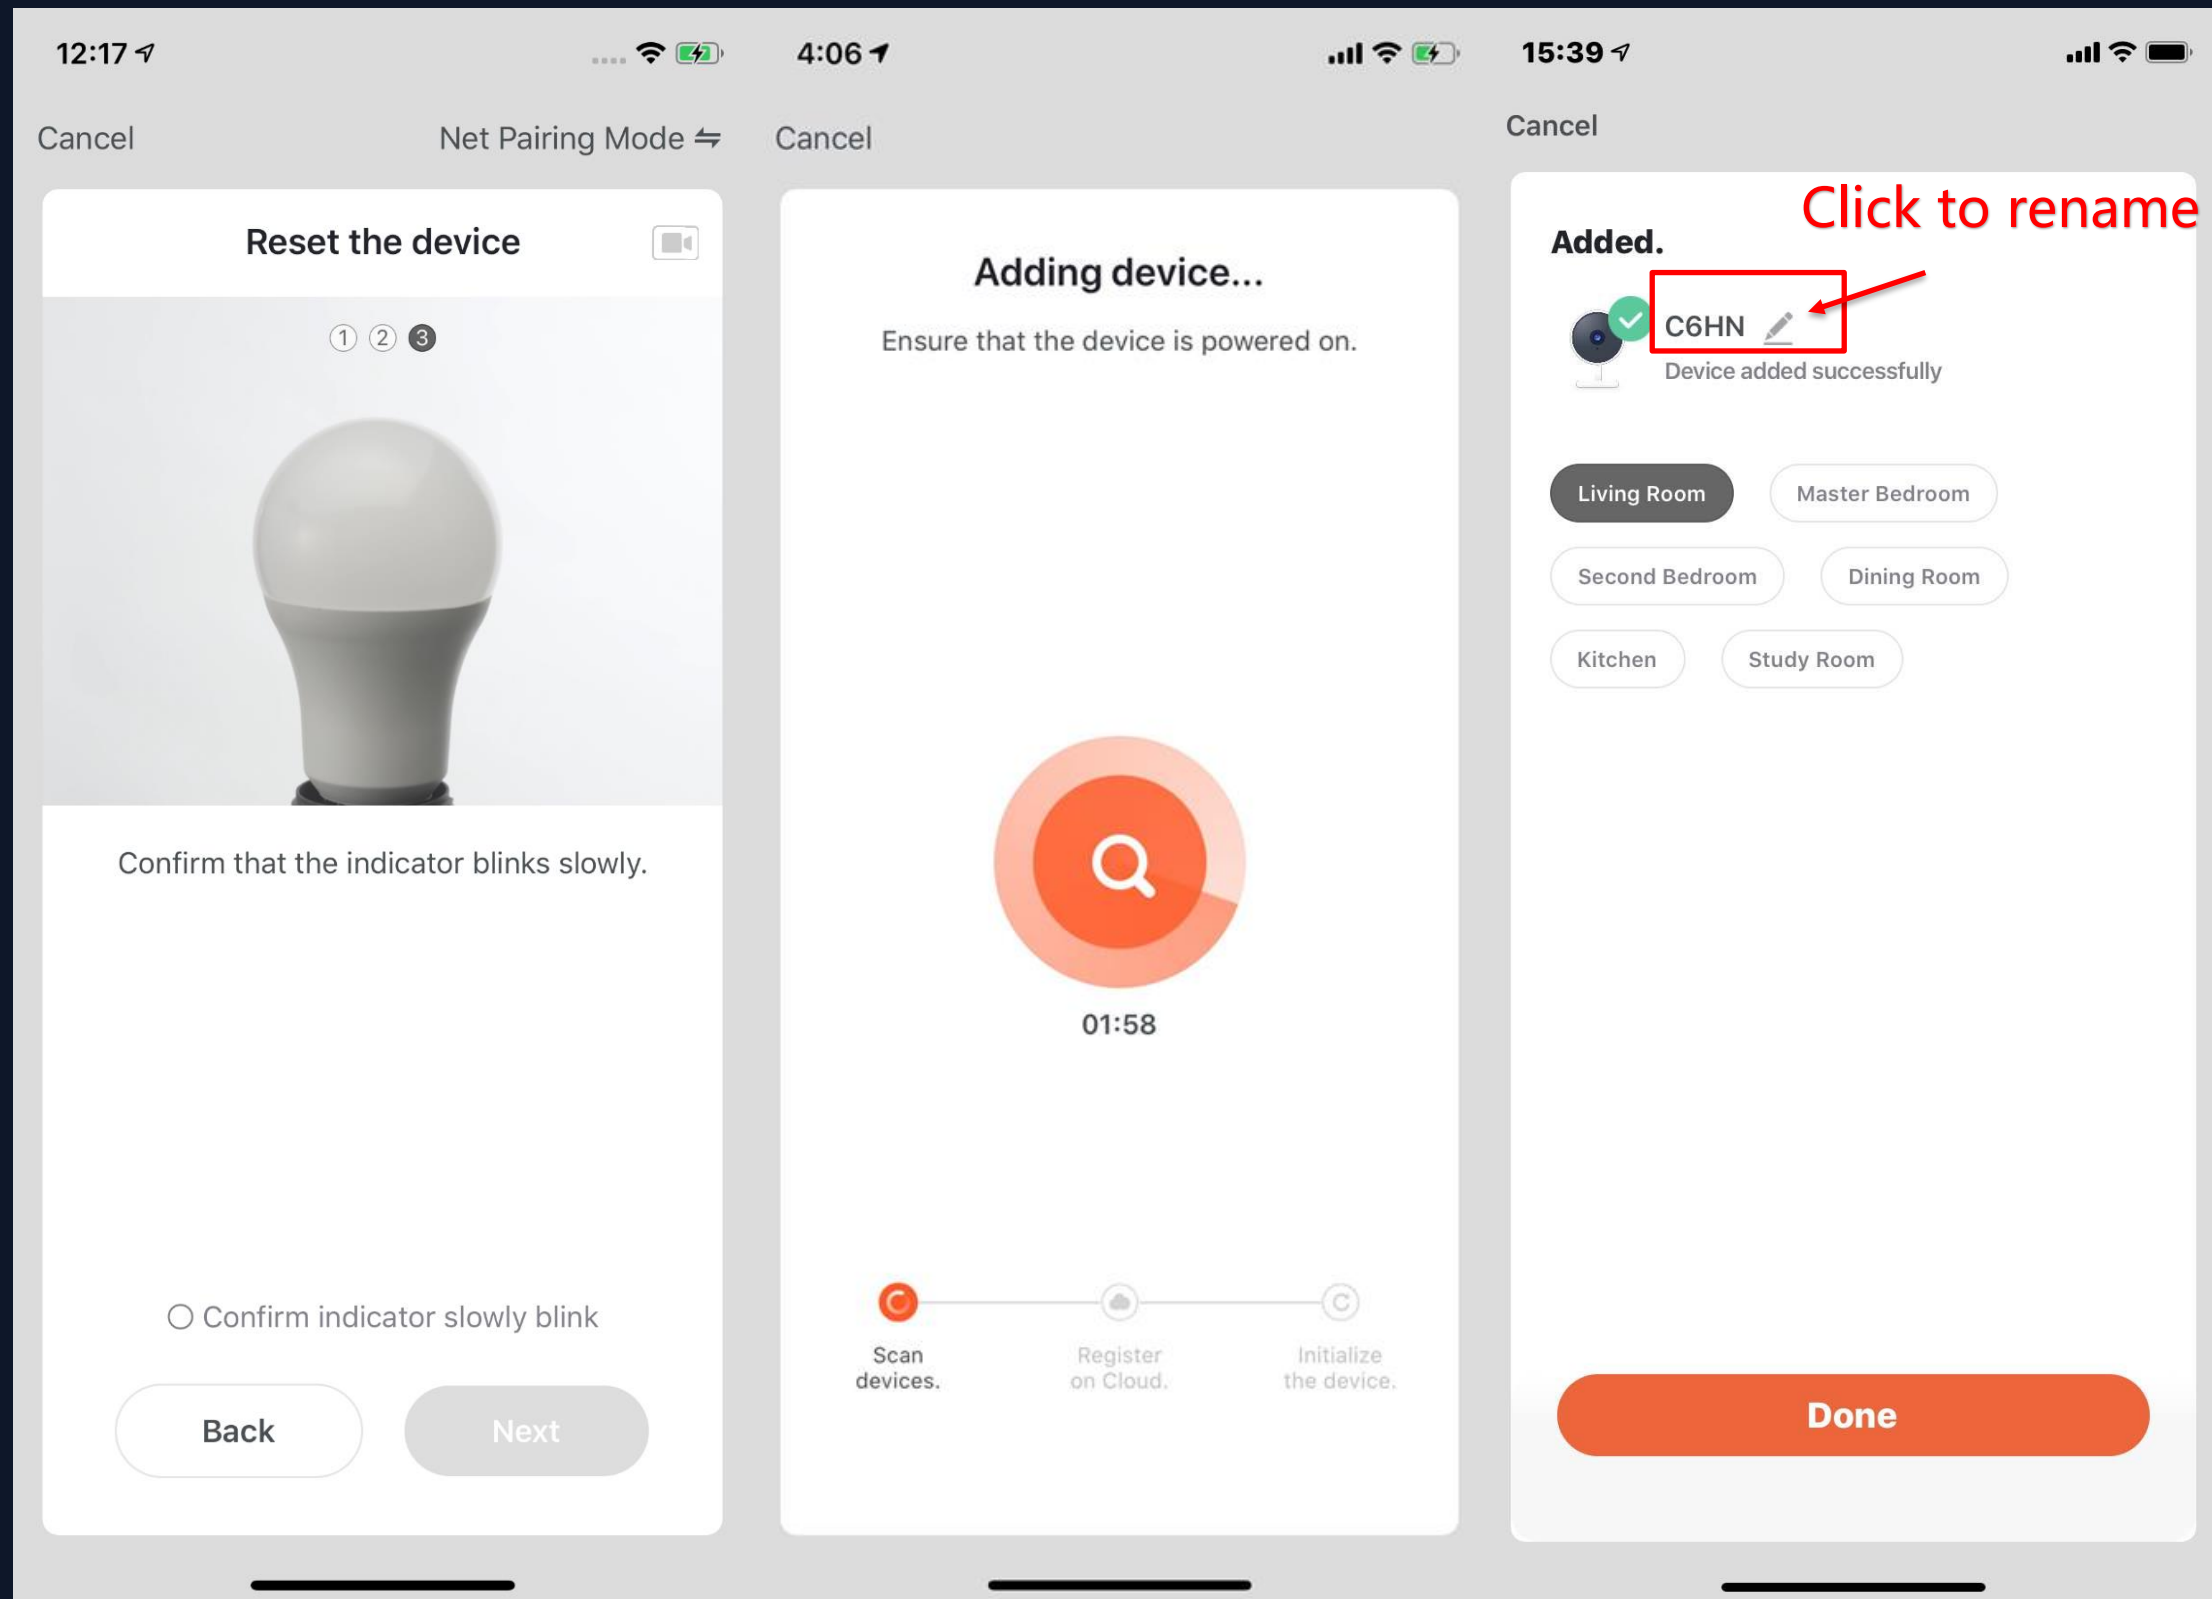

2. Connect to the WiFi at home and wait for the device to connect to complete the connection.

NO.3.4.1 Add Manually-Wi-fi bluetooth dual mode network

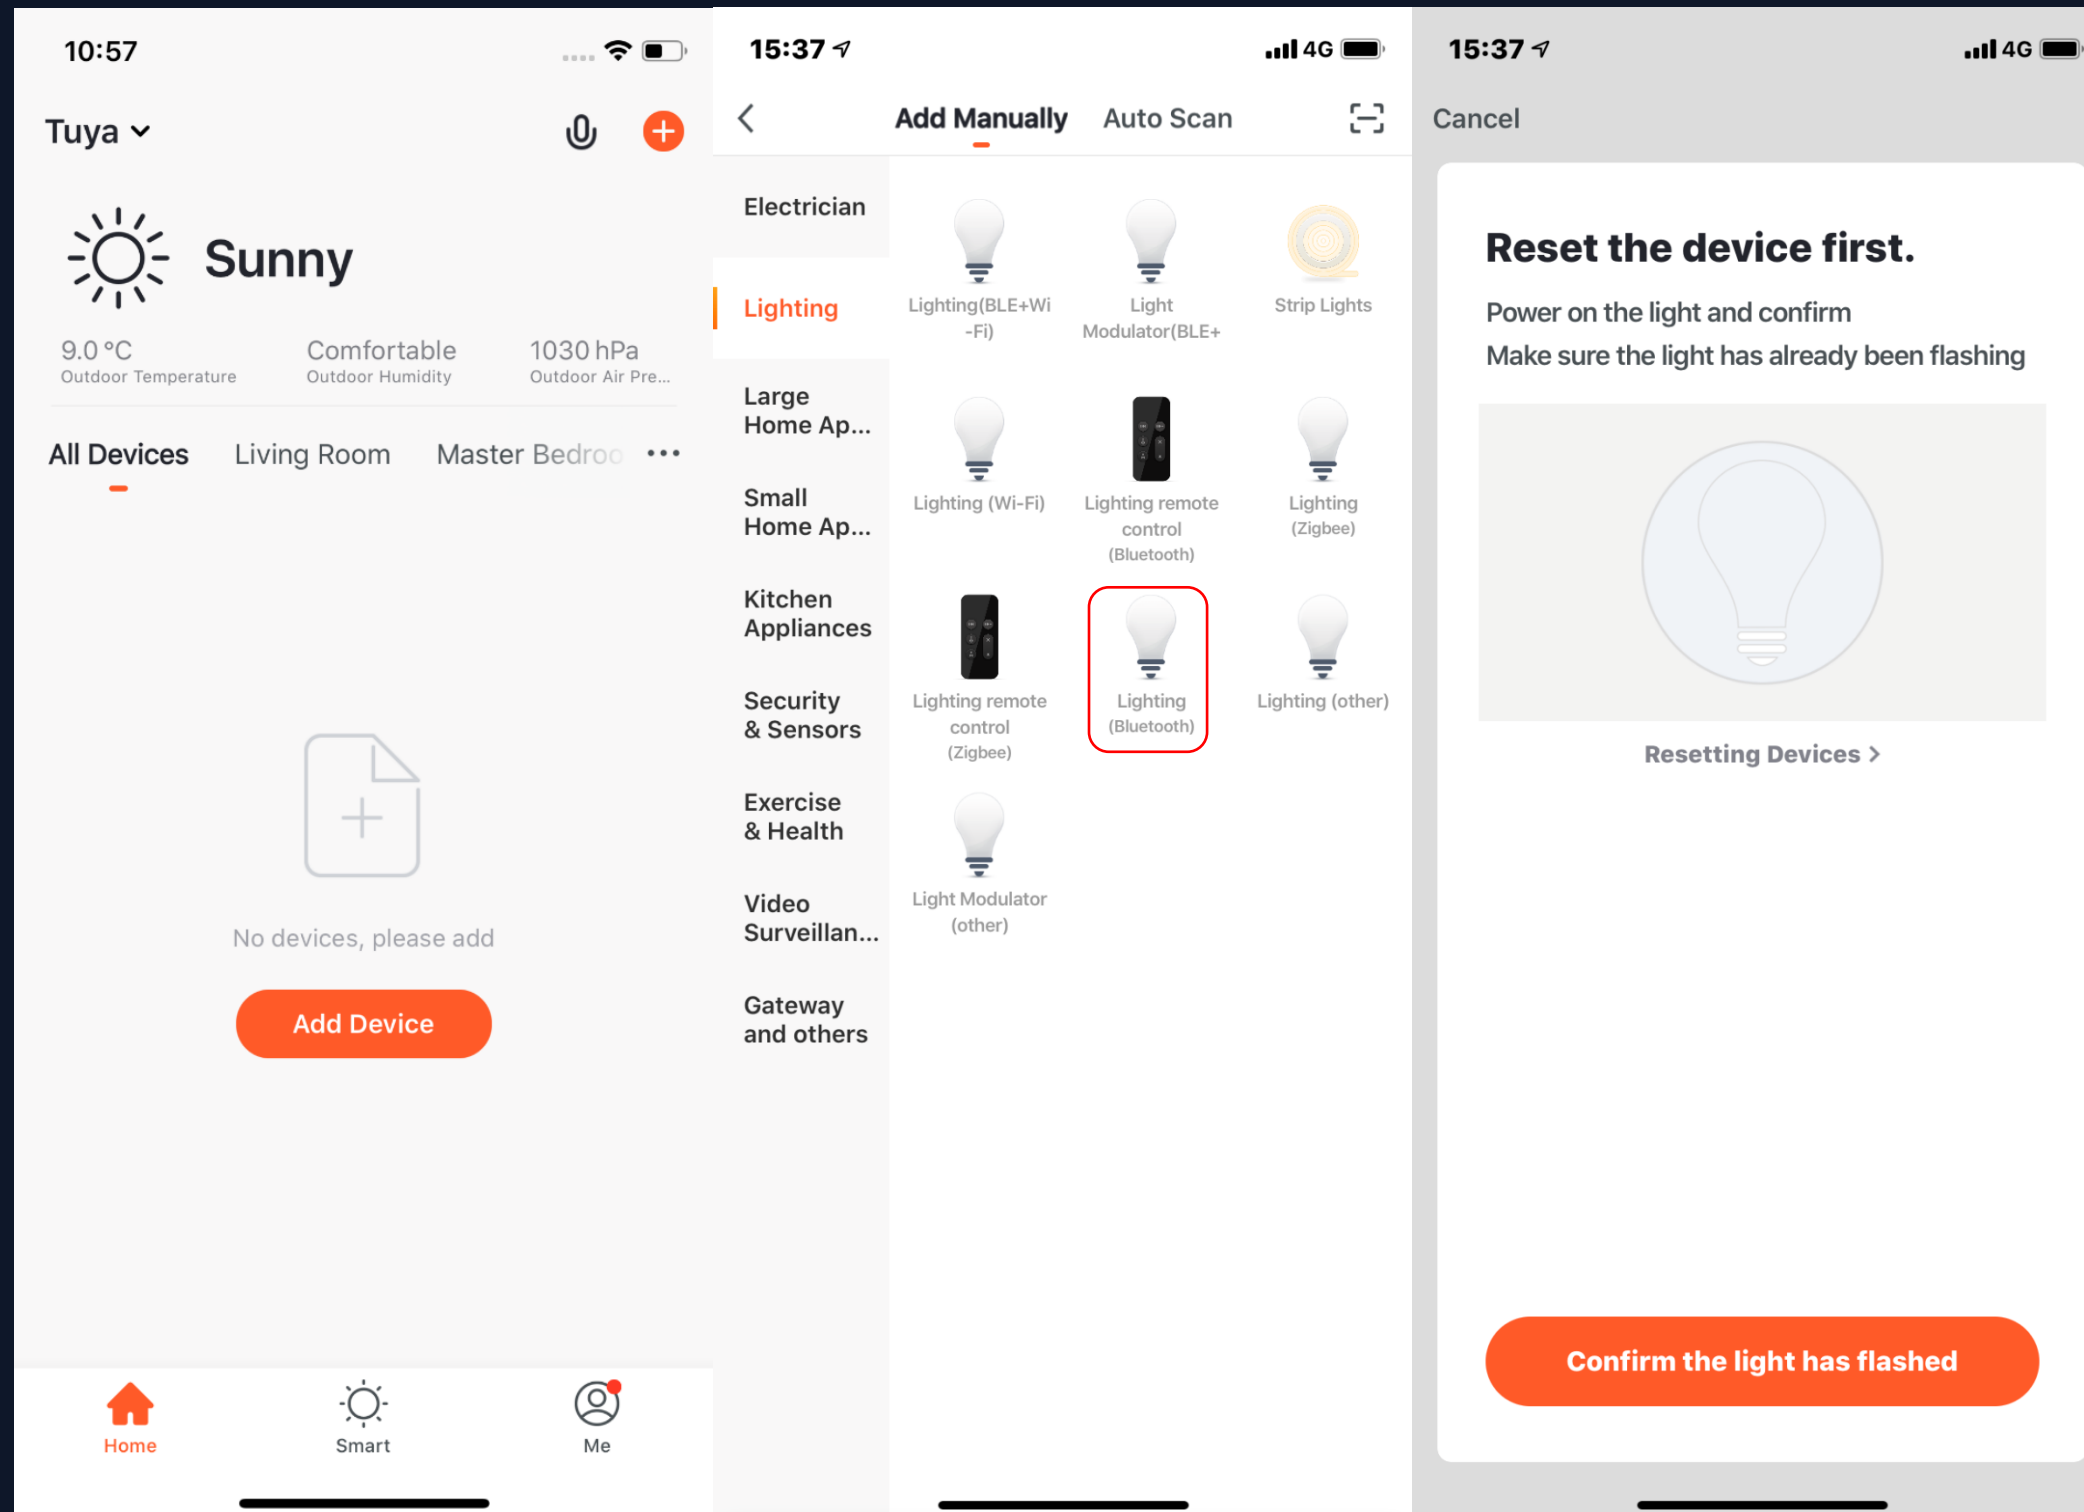

1. Of course, if you are not willing to use bluetooth connection, you can also choose WiFi connection. First you can select the corresponding device type. To set the indicator light to the flash state, please follow the three steps in the figure to complete the setting.

NO.3.4.1 Add Manually-Wi-fi bluetooth dual mode network

2. After completing the three steps, wait for the device to connect. After successful connection, the device can be renamed and room classification.

NO.3.4.1 Add Manually-Wi-fi bluetooth dual mode network

1. You can also connect the device via bluetooth by clicking the "add device" button in the center of the device list page or clicking the "+" button at the top right.

2. You can enter the "add device" page, select the device you want to add and power the bulb, and reset the device according to the tutorial.

NO.3.4.1 Add Manually-Wi-fi bluetooth dual mode network

3. Wait for the system to search the device and connect the device, and click "complete" after the step.

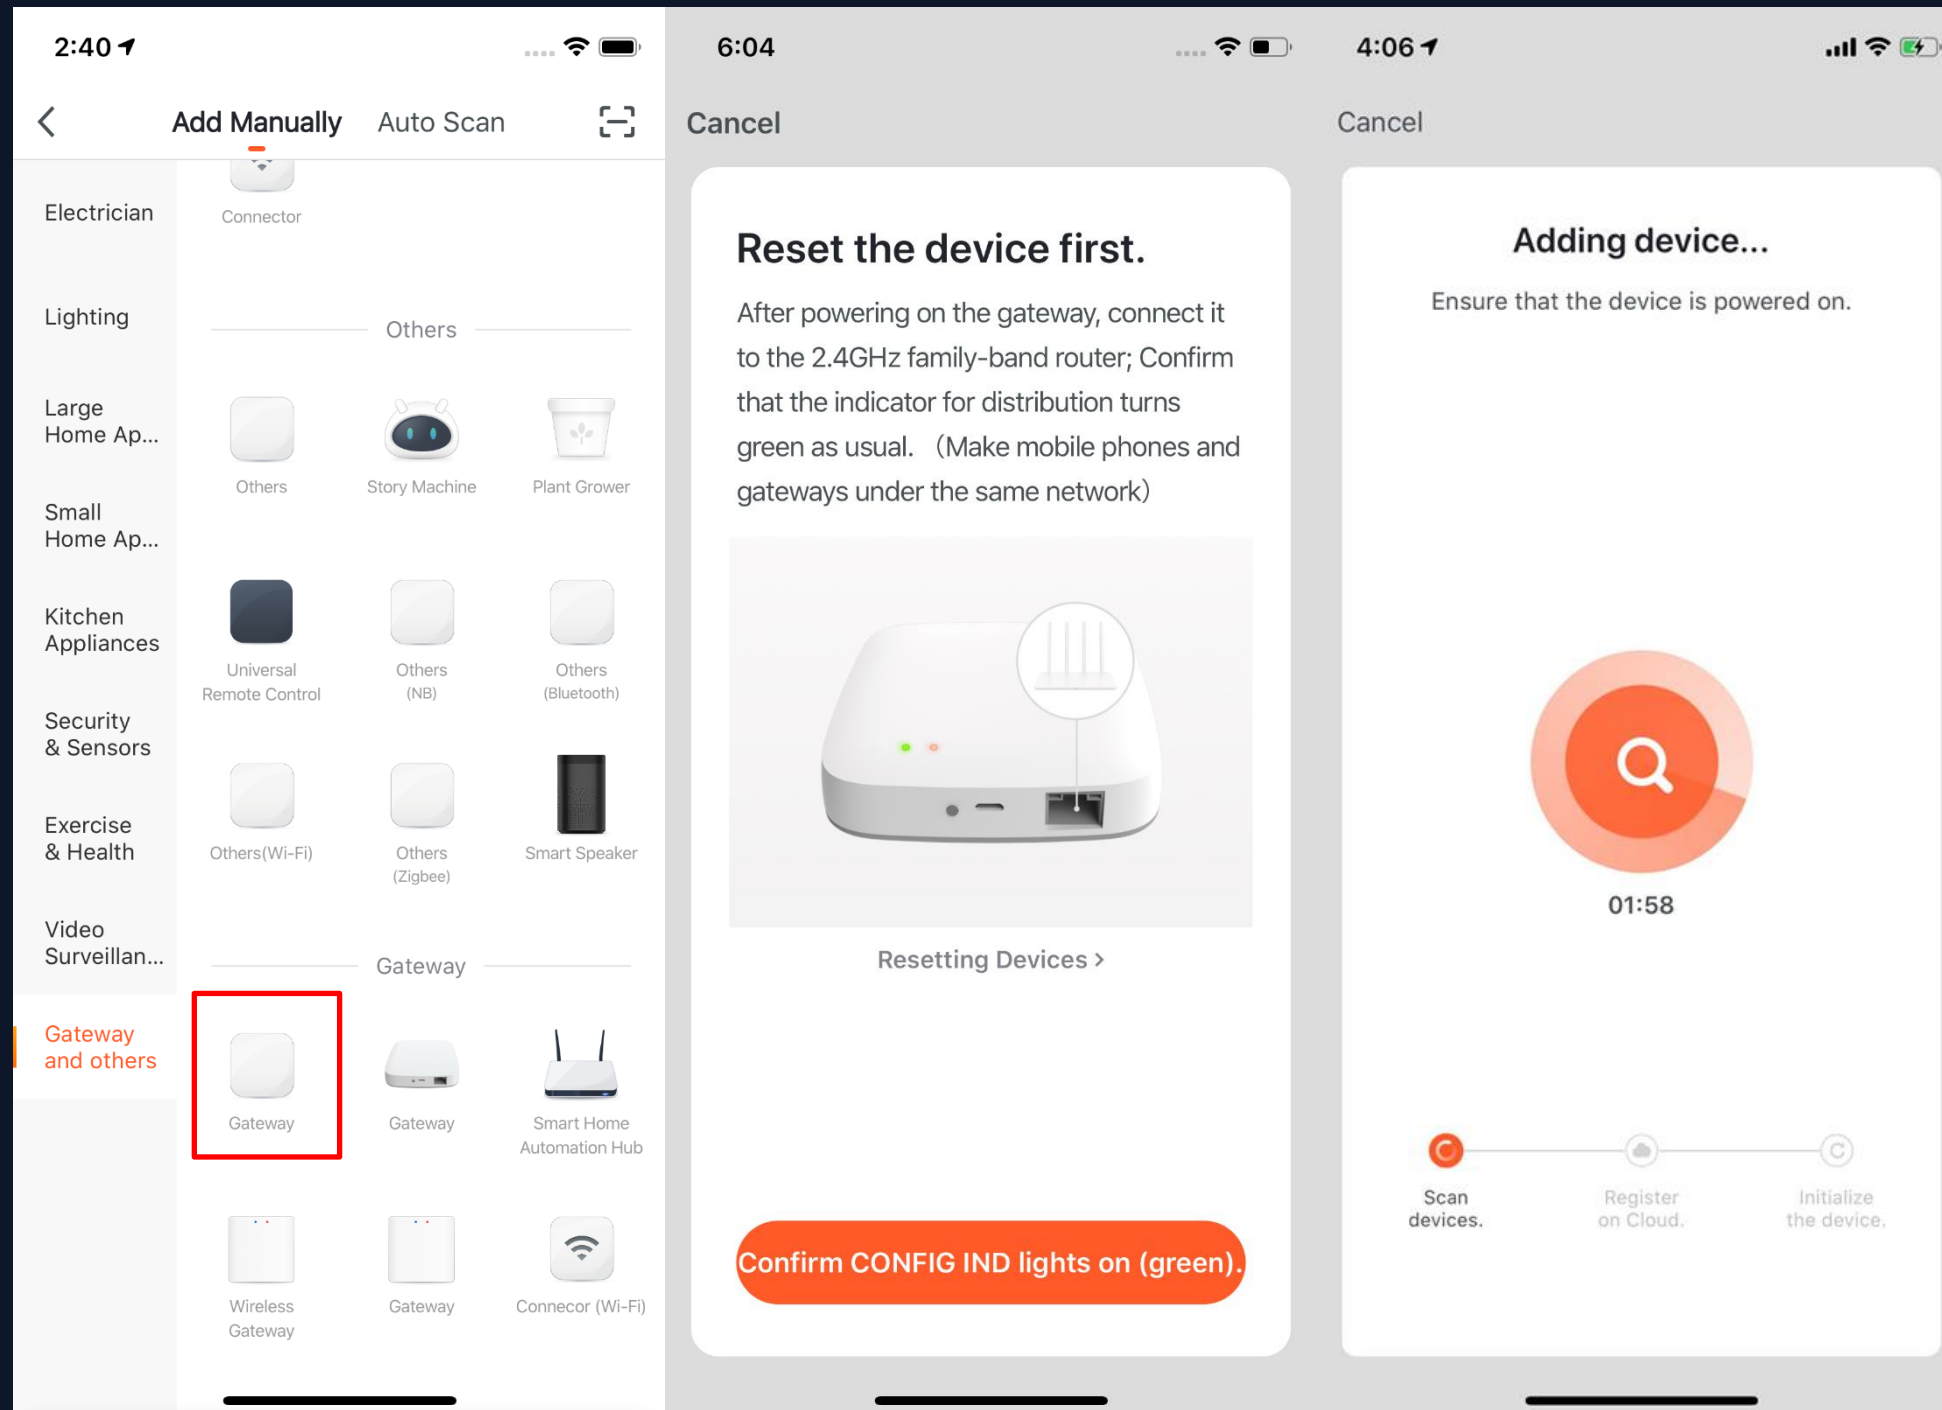

NO.3.4.1 Add Manually- Wi-Fi-AP Mode

1. If the network in your home is 2.4Ghz and 5Ghz mixed, you can use AP mode (compatibility mode).

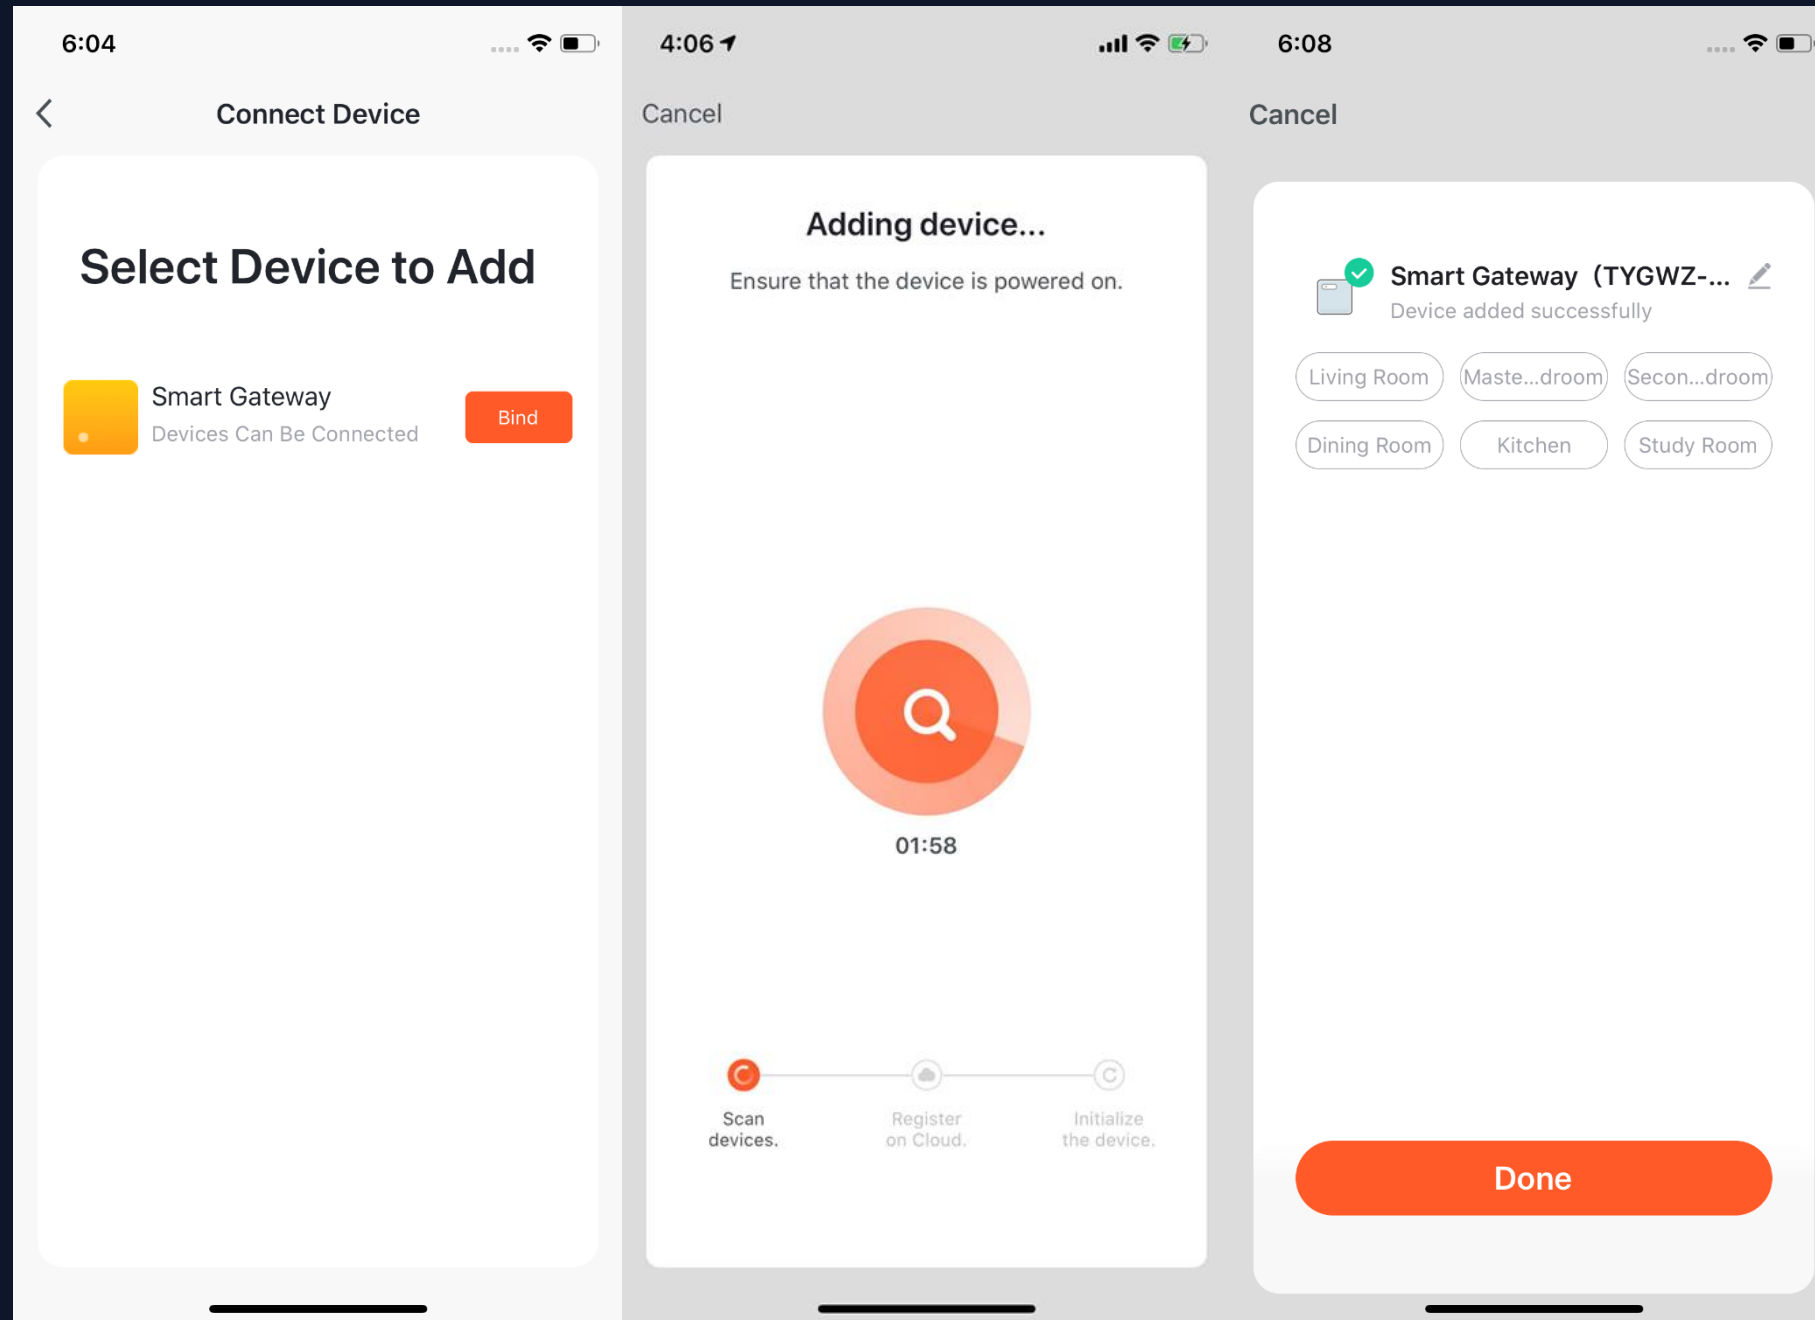

2. If you use AP mode to connect devices, you need to follow the three steps in the page to set the indicator light to blinking slowly.

NO.3.4.2 Add Manually--ZigBee Devices

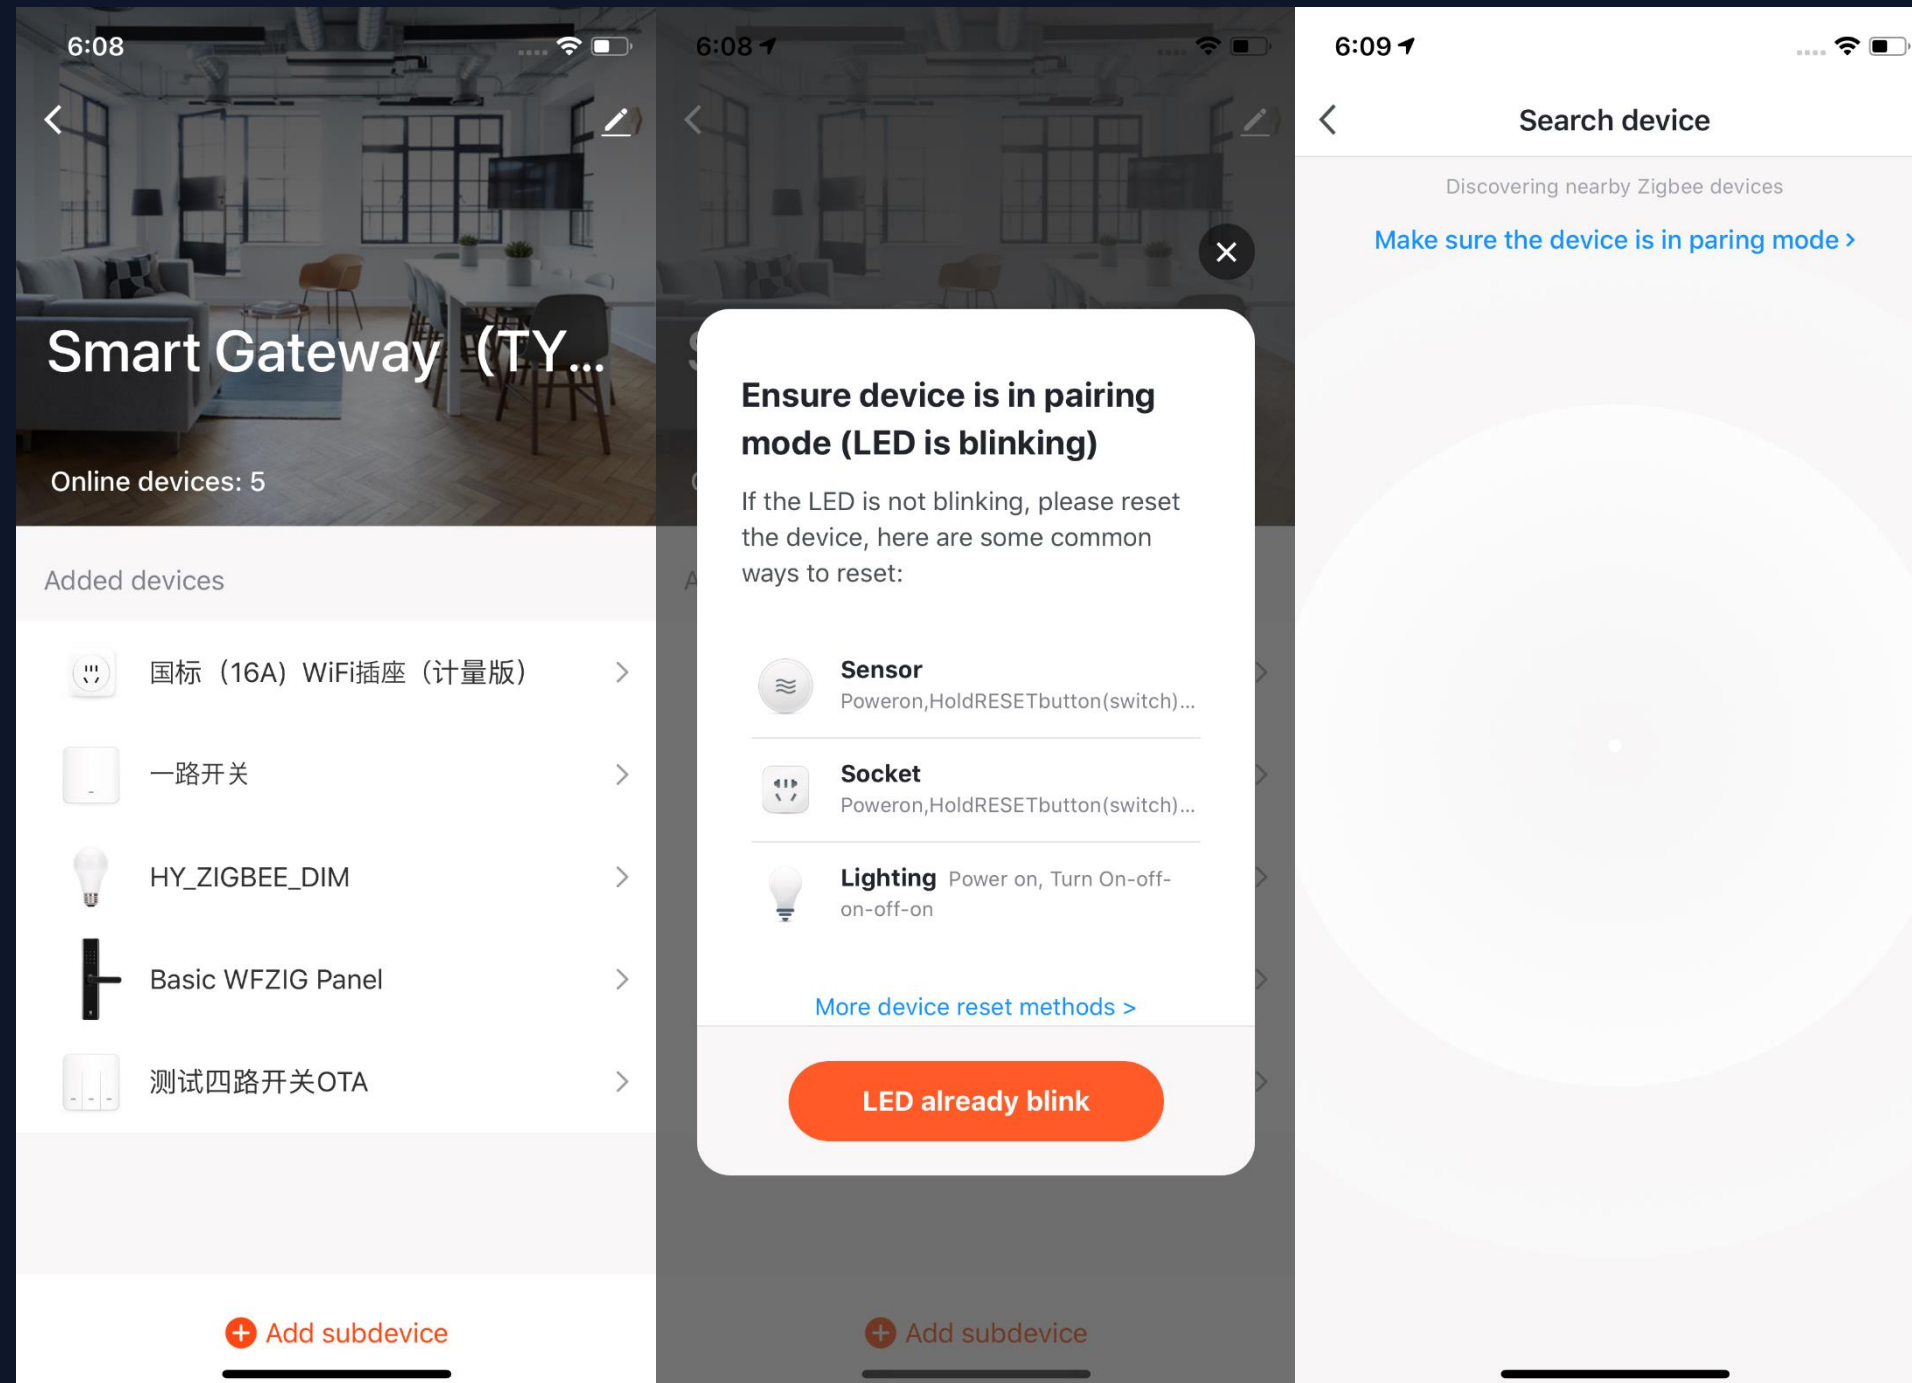

1. You will have to connect gateway first before connecting ZigBee devices. Therefore, please click "Add Manually >> Others" and choose a gateway.
2. Power on the gateway and connect it to the router through.
3. Please make sure the phone and the gateway connects to the same LAN. (The Wi-Fi needs to be 2.4G.)

NO.3.4.2 Add Manually--ZigBee Devices

4. After successfully adding the gateway as instructed, you can then start to connect the relevant ZigBee devices.

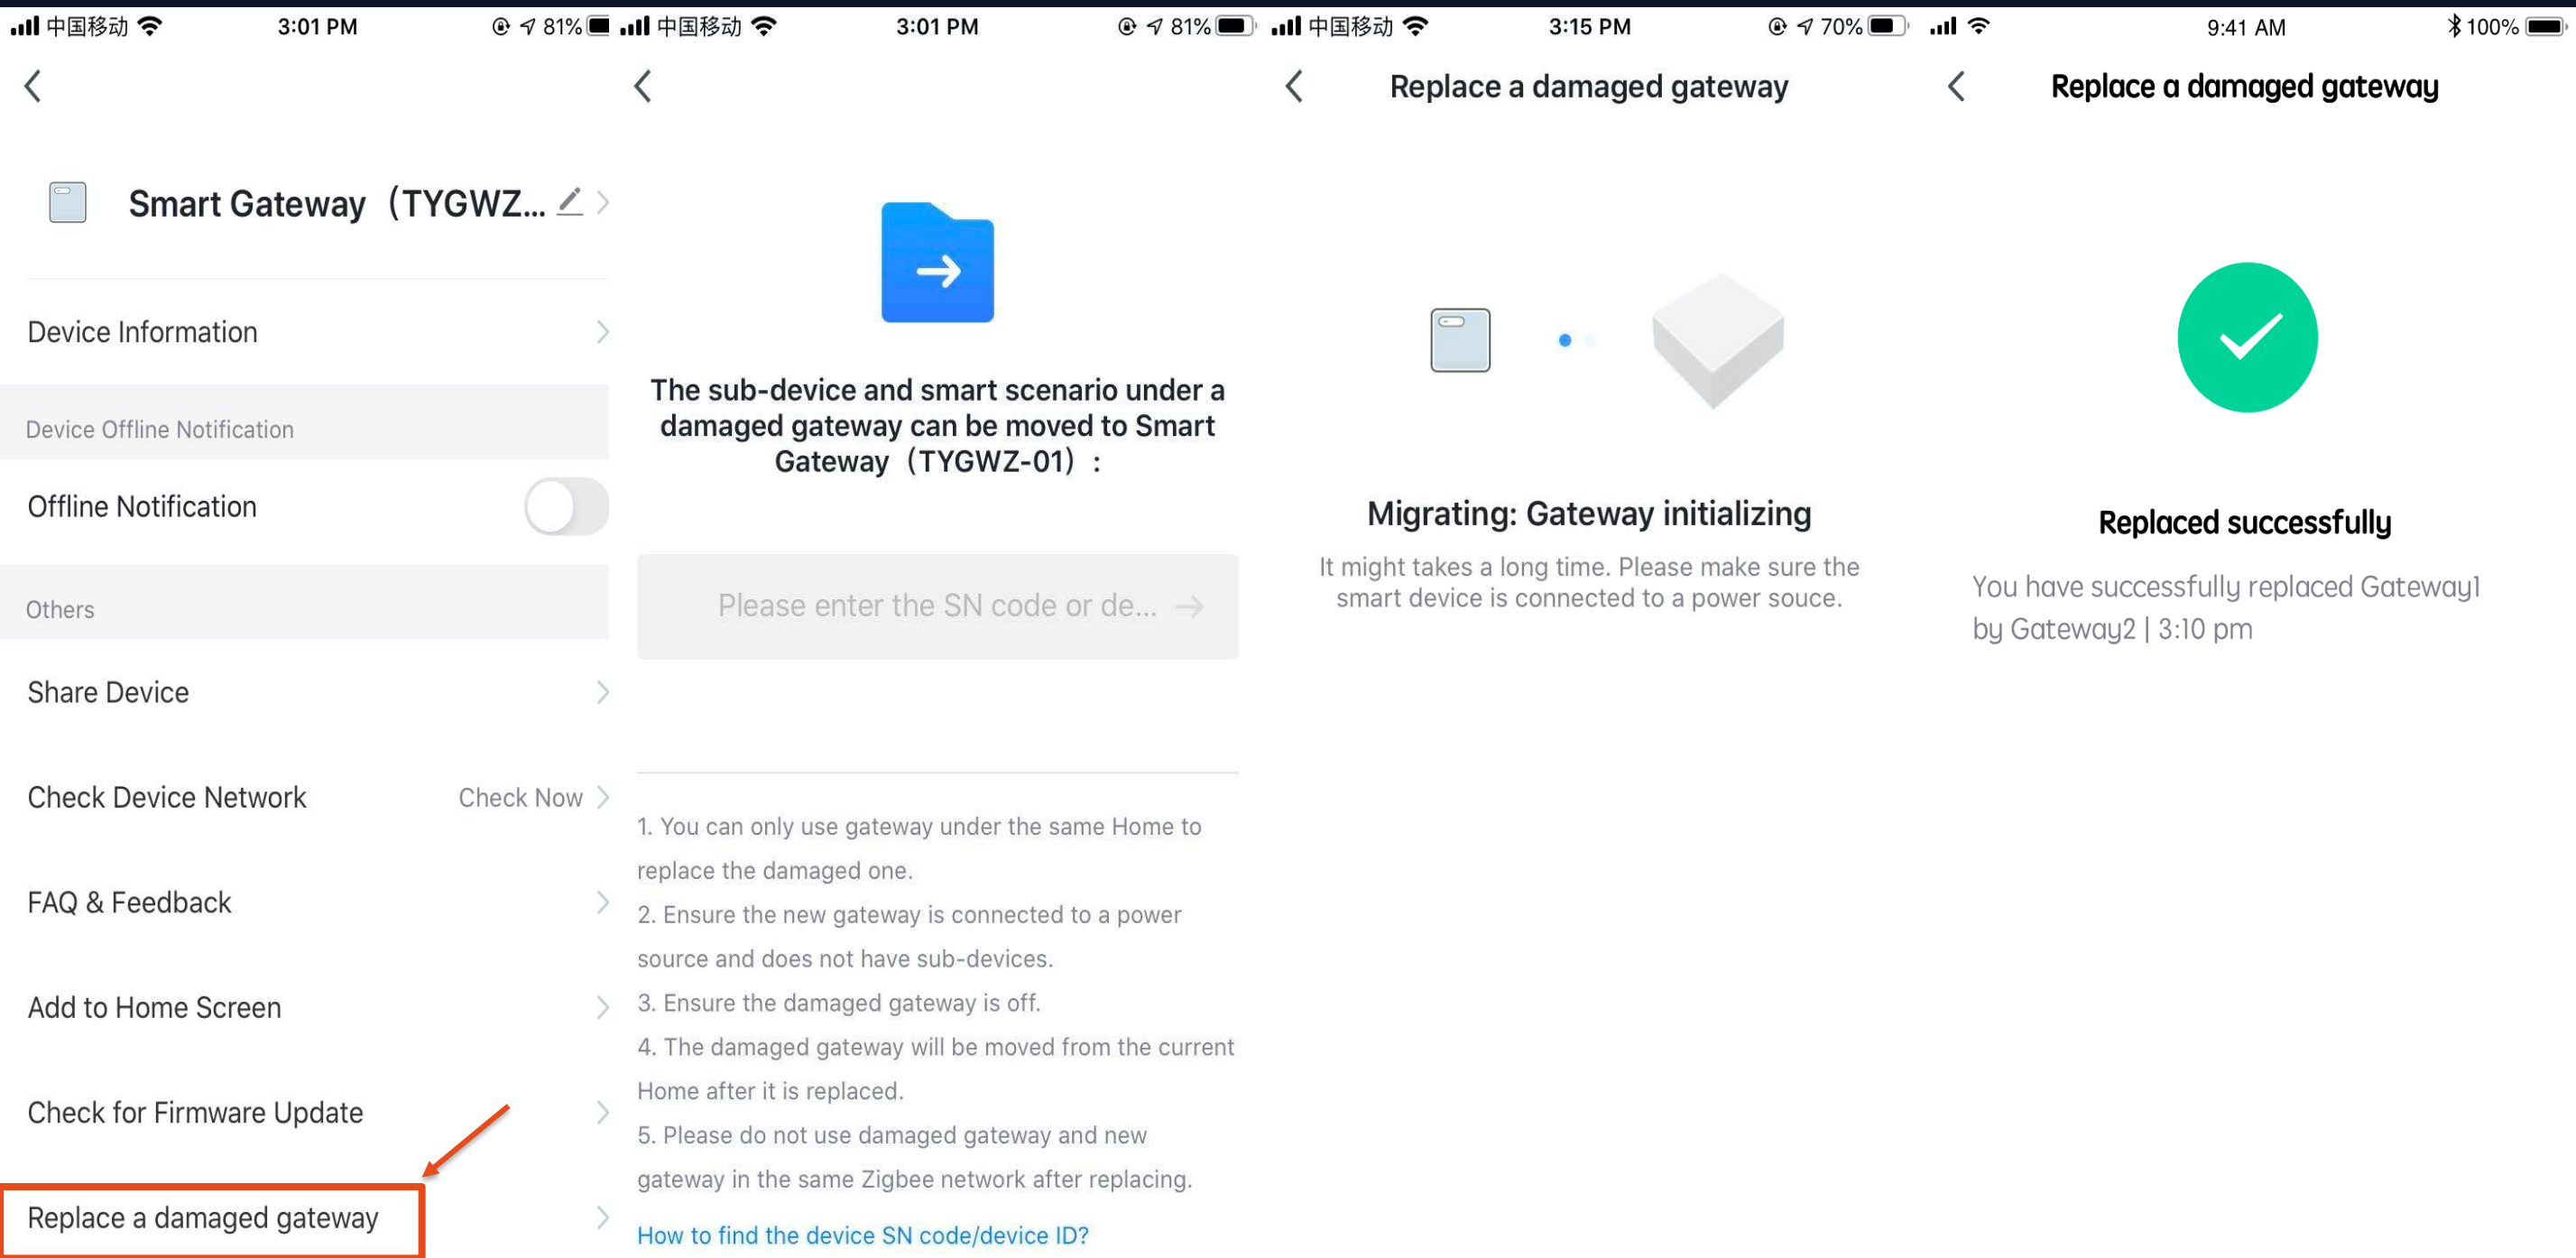

NO.3.4.2 Add Manually--ZigBee Devices

5. After adding the gateway, you can turn to the gateway page and click "Add Devices". You will see other devices that have already connected to this gateway. You can also add them to your account.

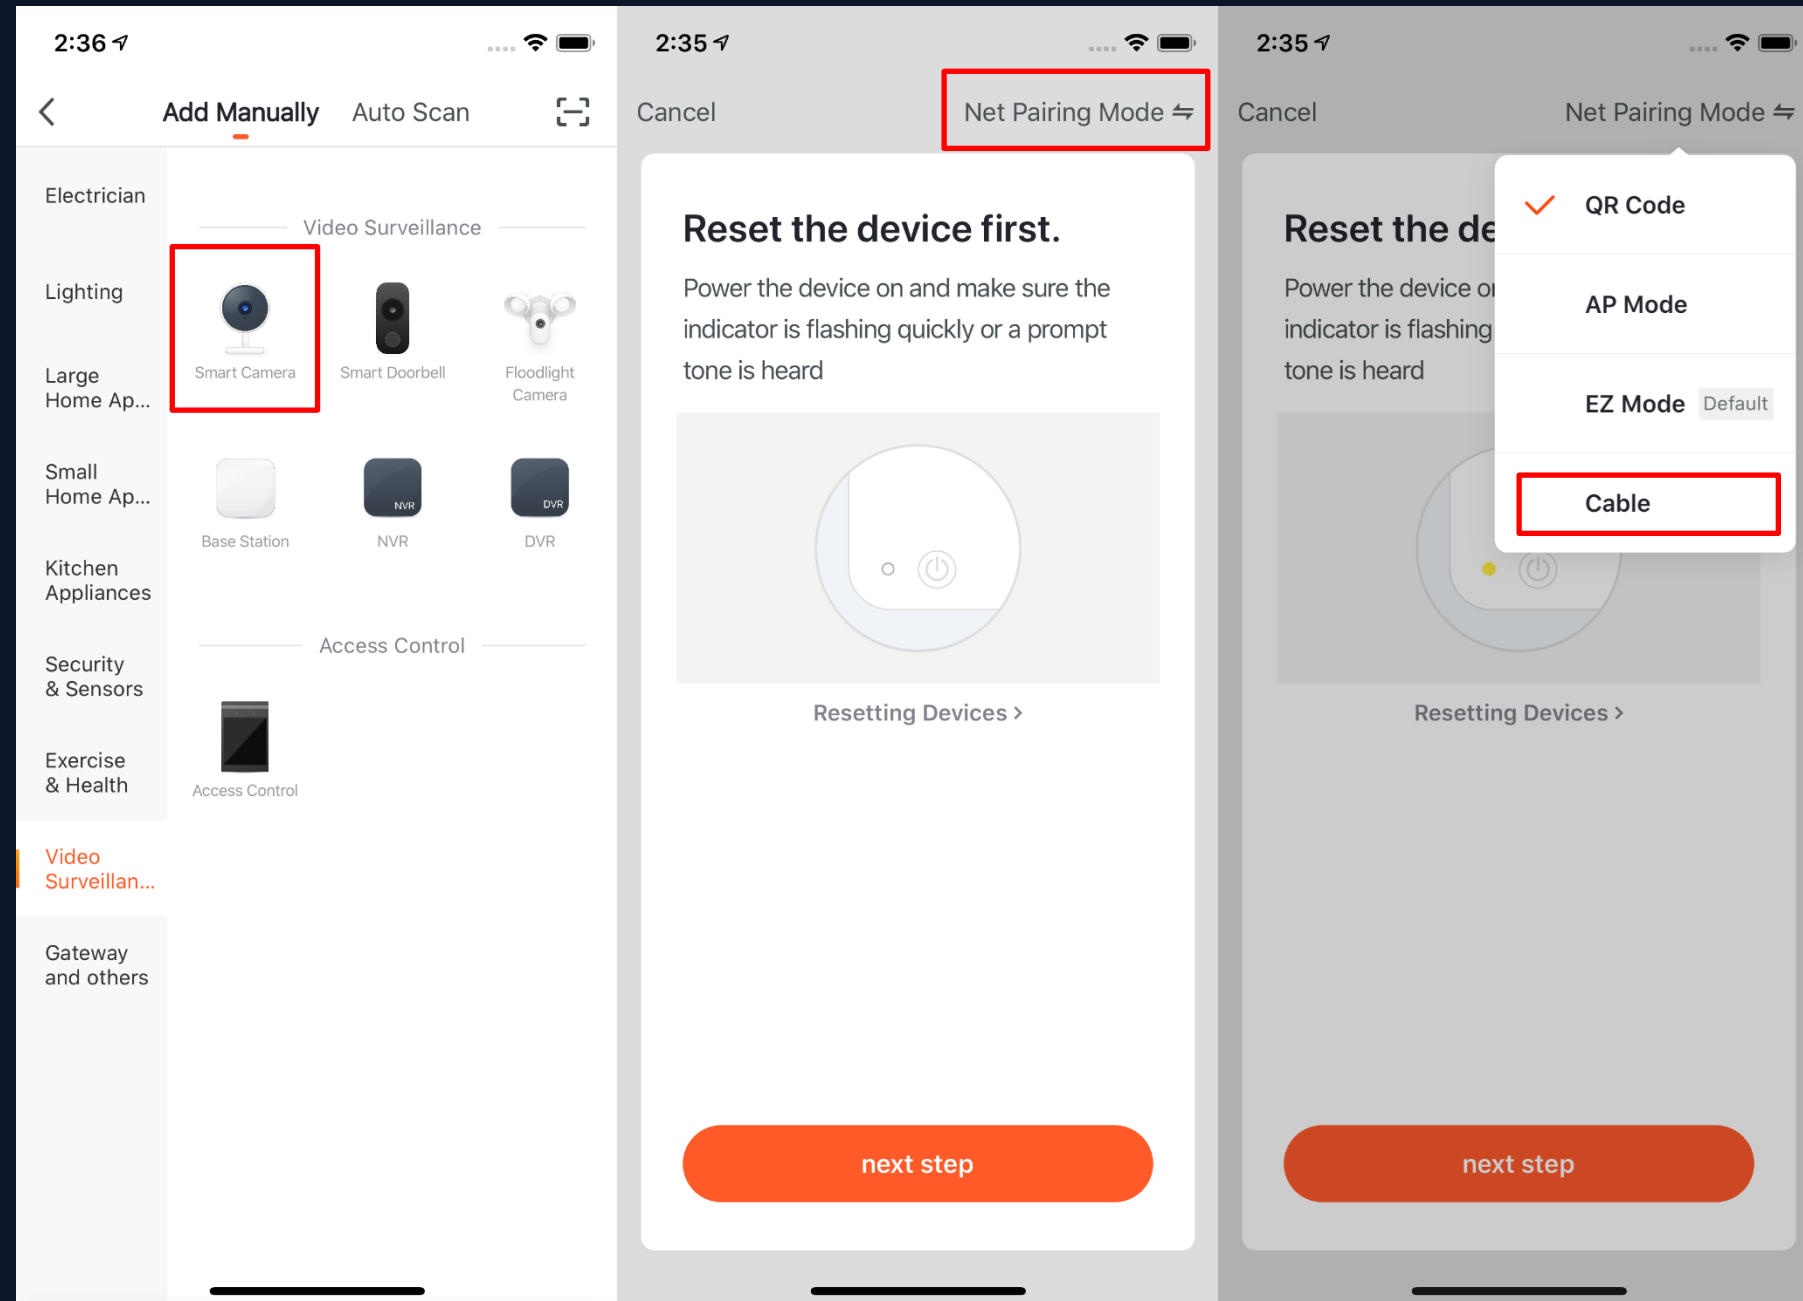

6. In the latest APP version, it has "Search devices" function so that you can add more devices to your gateway at the same time.

NO.3.4.2 Gateway Failure Replacement Function

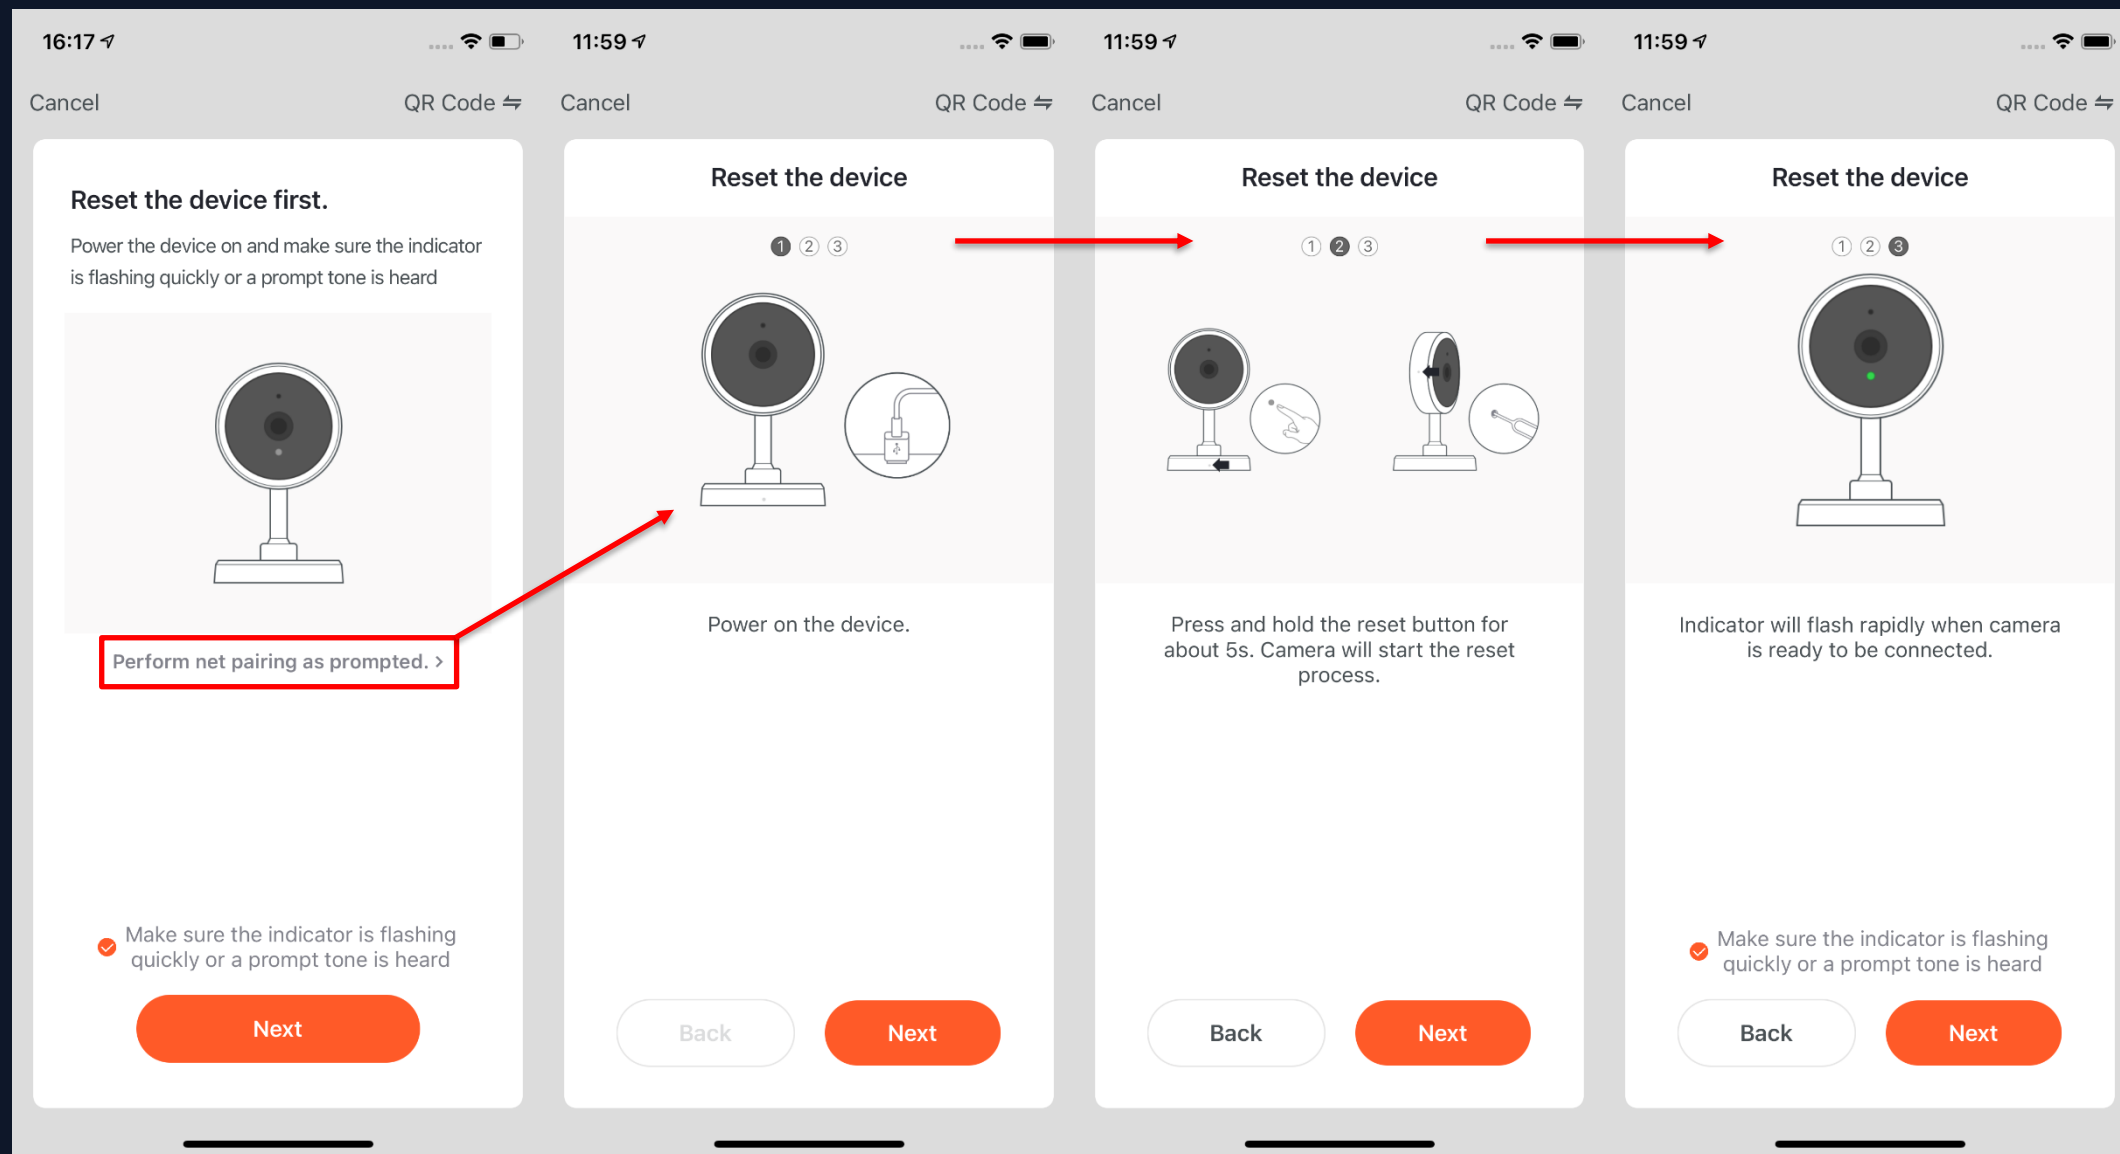

7. After the gateway fails, you can click "Replace the failed gateway", enter the SN code or device ID of the new gateway, and replace the failed gateway with the new gateway. After replacement, the sub-devices and related scene functions under the failed gateway will be synchronized to the new gateway.

NO.3.4.3 Add Manually--IPC Devices—Wired Network Configuration

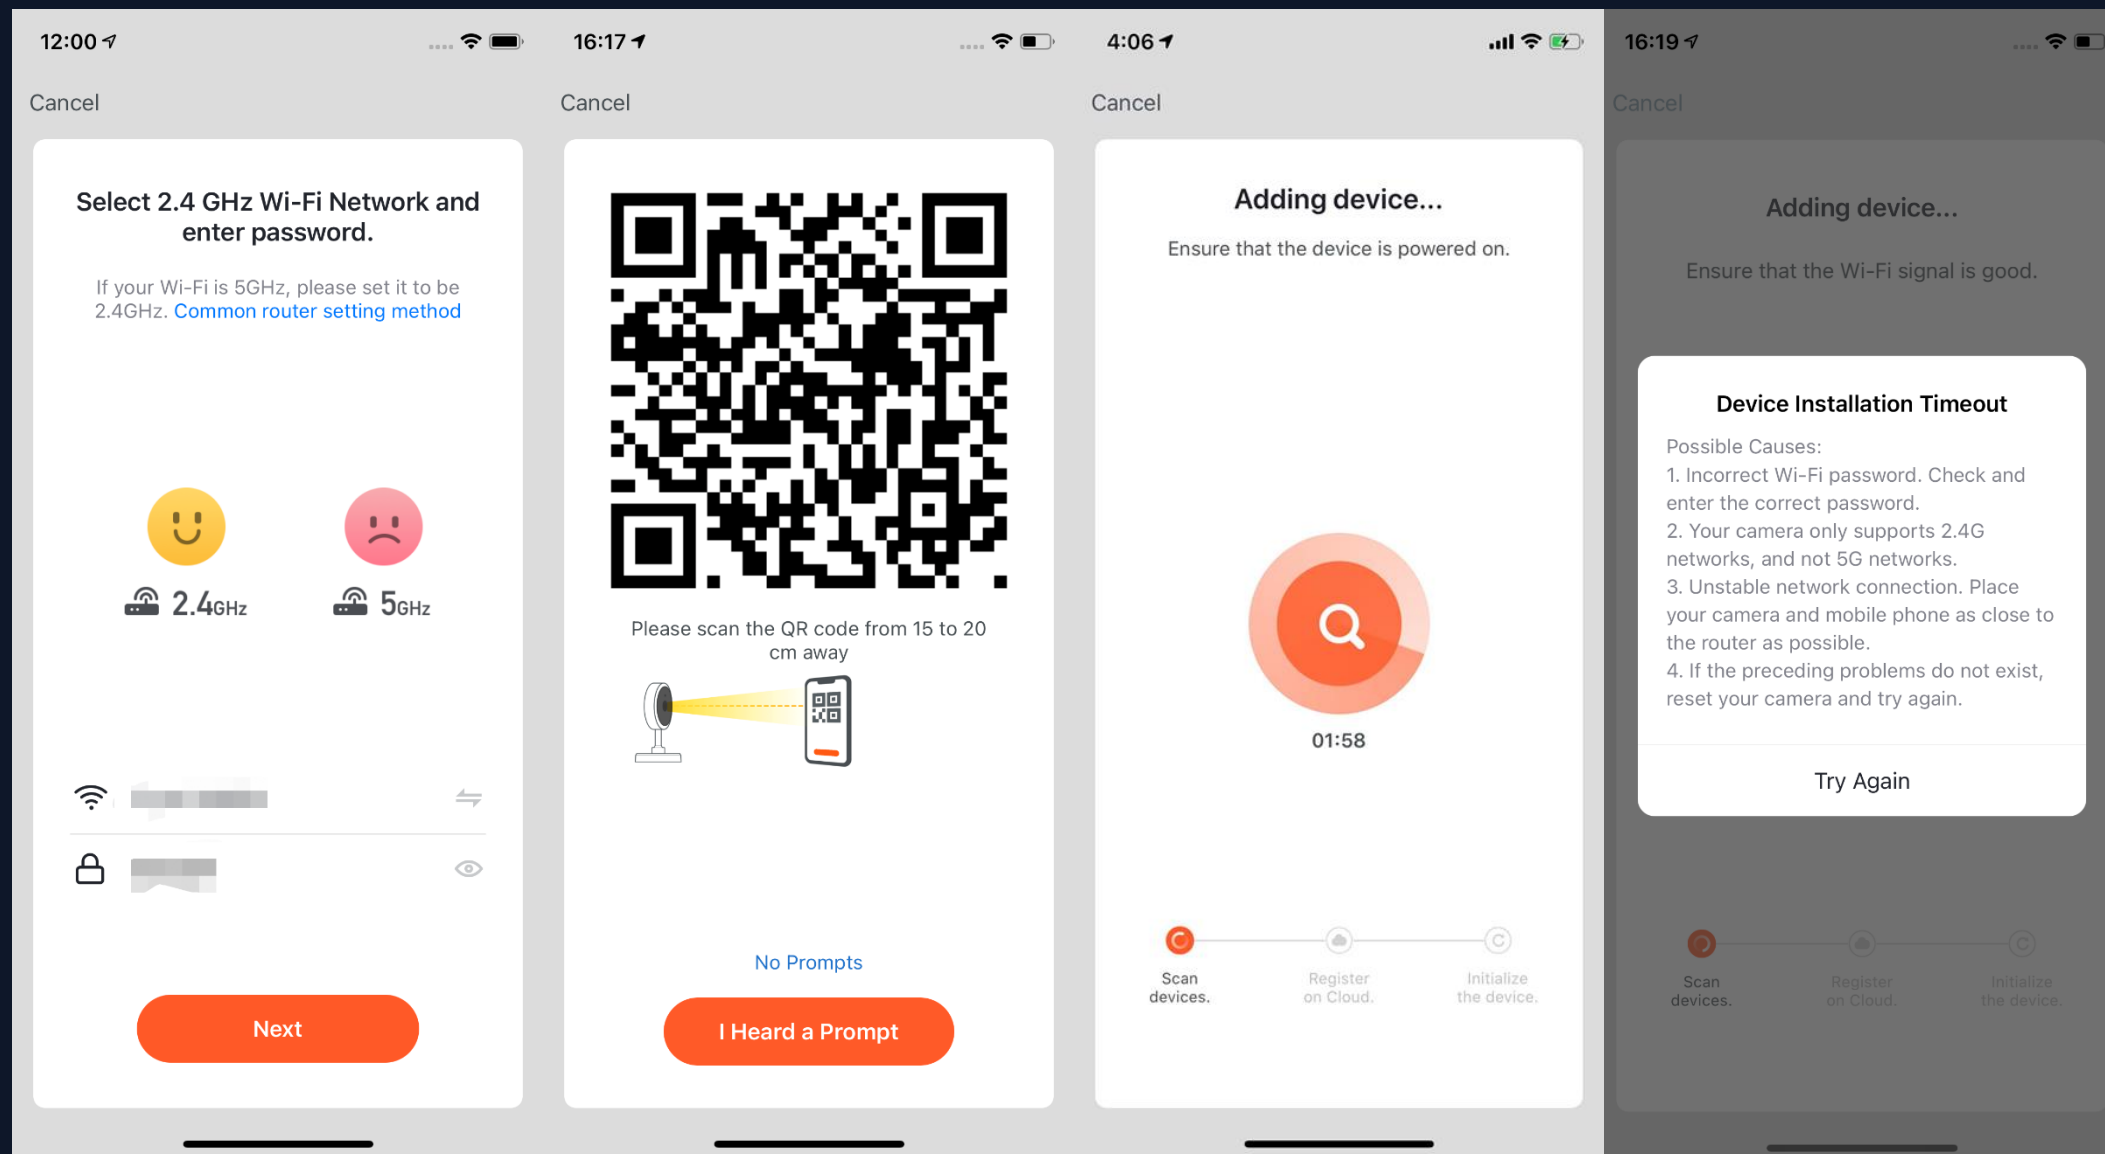

1. Most devices can connect with the APP through Smart Mode (the default mode) and AP Mode. Except these two pairing modes, some devices (such as IPC devices and gateways) also have Wired Network Configuration mode.

NO.3.4.3 Add Manually--IPC Devices—Wired Network Configuration

2. If you use the QR code to configure the network, you need to set the indicator light of the IPC device to a fast flashing state or hear a prompt tone.
3. The reset steps can be viewed by clicking the "Perform net pairing as prompted" button.

NO.3.4.3 Add Manually--IPC Devices—QR Code Distribution Network

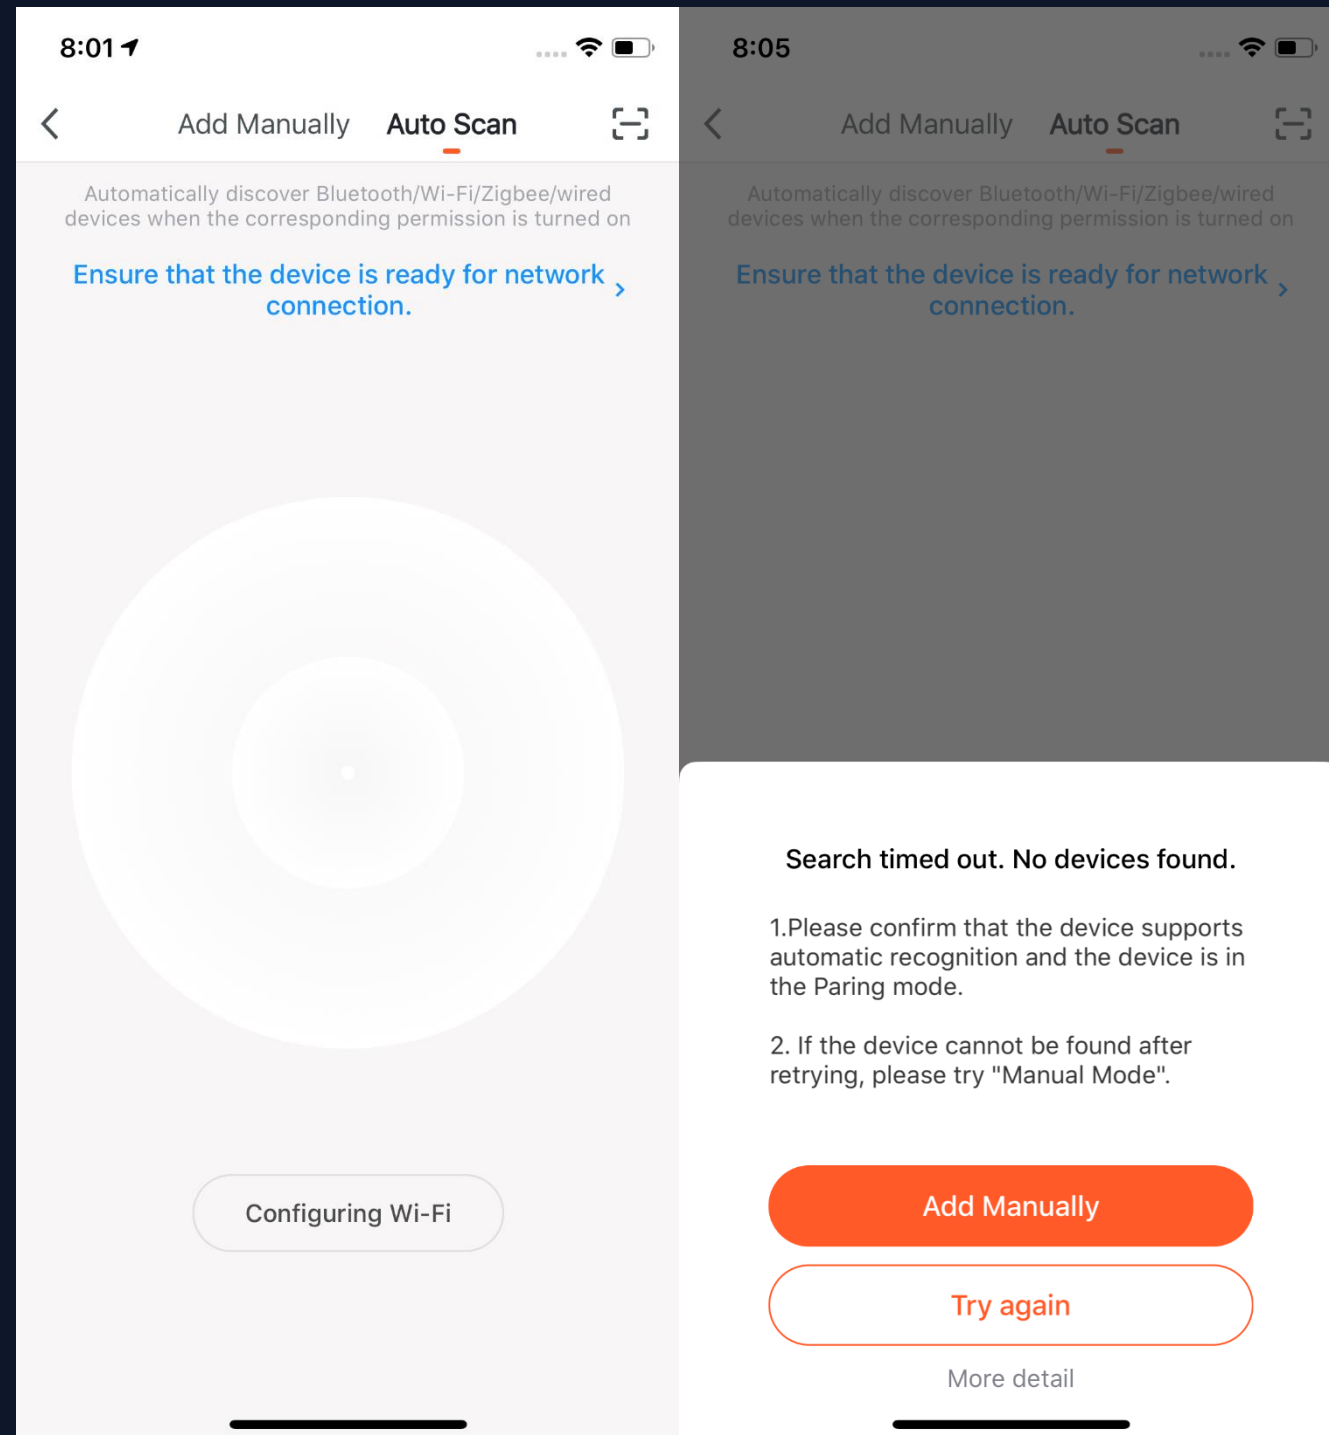

4. After clicking "Next" you will be taken to the page for entering the Wi-Fi password.

5. Follow the prompts on the page, please scan the QR code from 15to 20cm away.

6. If you heard a prompt, please click "I heard a prompt" to the next stage.

7. If the network configuration fails, the following page will be displayed.

NO.3.4.4 Search Device

1. You can search the following devices through Auto Scan, which include Wi-Fi devices, bluetooth gateway devices, bluetooth Mesh devices, Zigbee gateway devices and other Zigbee devices that have connected to your gateway. You can add all these devices in one click.

2. If the search times out and no devices are found, please follow the instructions to solve the problems. Or you can choose to add them manually.

NO.3.4.4 Search Device—Request for Permission

3. When using “Auto Scan”, you need to enable Wi-Fi and Bluetooth of the phone. If you do not enable Wi-Fi, Wi-Fi device will not be searched; If you do not enable Bluetooth, Bluetooth devices that nearby your phone will not be searched.

NO.3.4.4 Search Device—Request for Permission

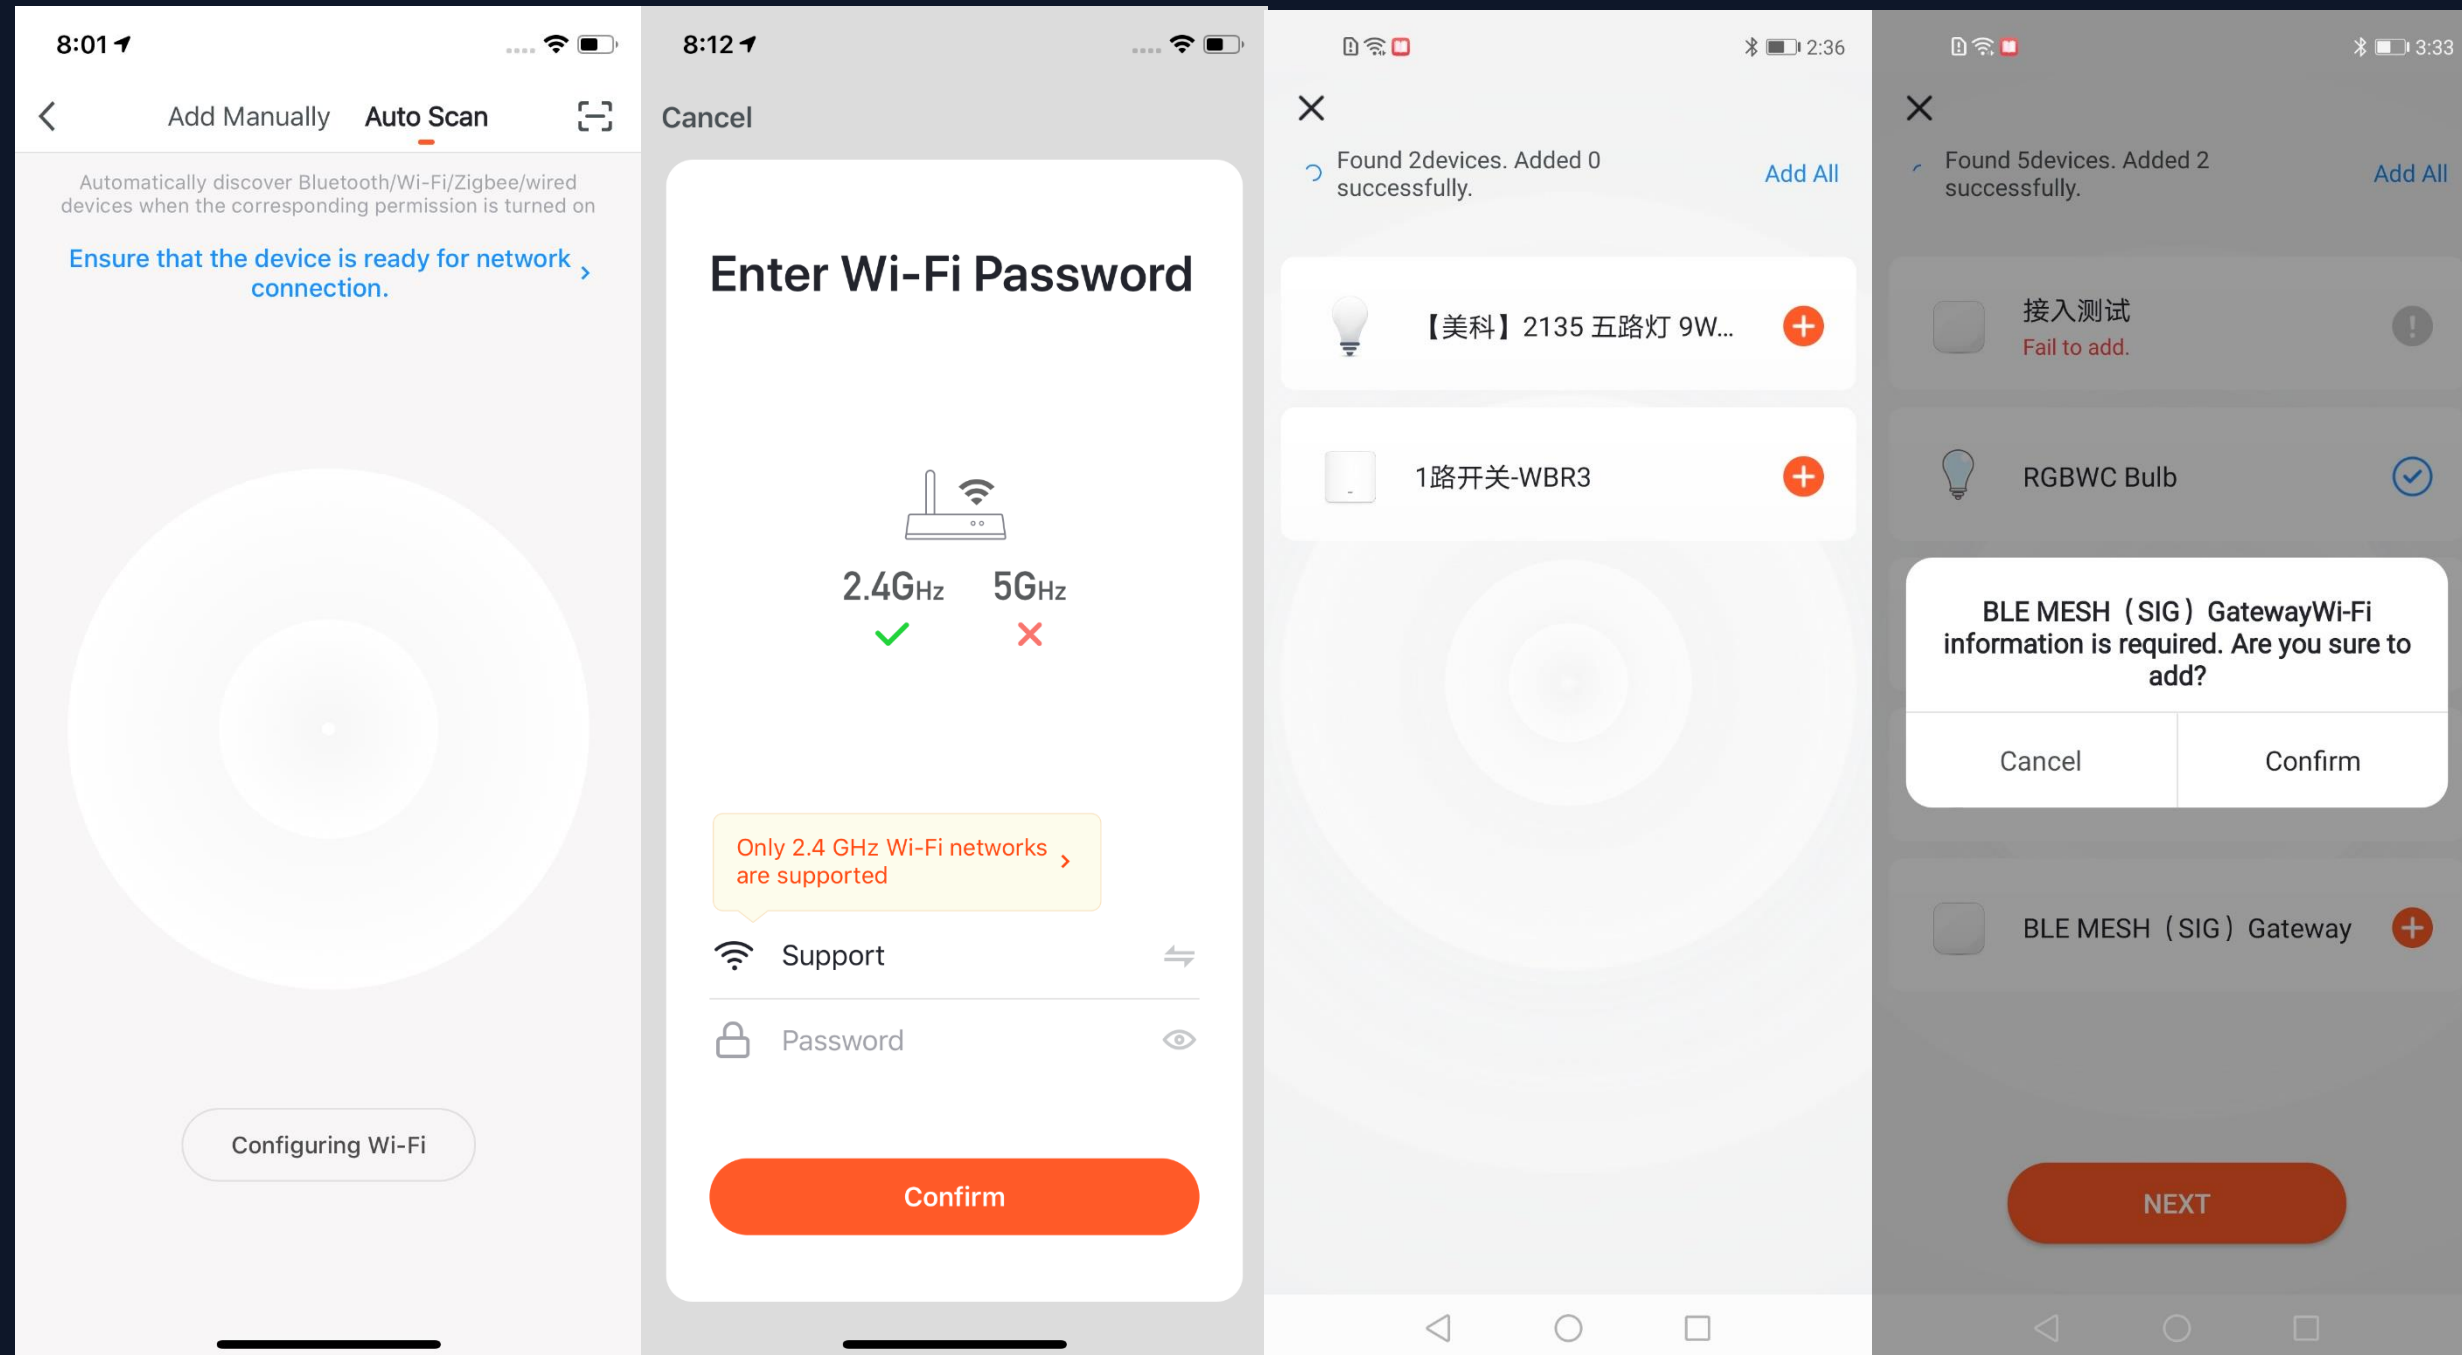

4. The app is now enabled to automatically scan nearby Bluetooth devices, which improves its functionality with Bluetooth devices.

5. Open the App and go to “Home”. The app will automatically search for Bluetooth devices that are in pairing mode. After the devices are found, they will be shown in the home page (like the photo on the left).

6. You can click “Do not add” or “Go to add” to choose whether to add these Bluetooth devices or not. (When searching for Bluetooth devices, Bluetooth permission from the app is required and the devices need to be in pairing mode)

NO.3.4.4 Search Device—EZ mode that Supports Add Devices Manually

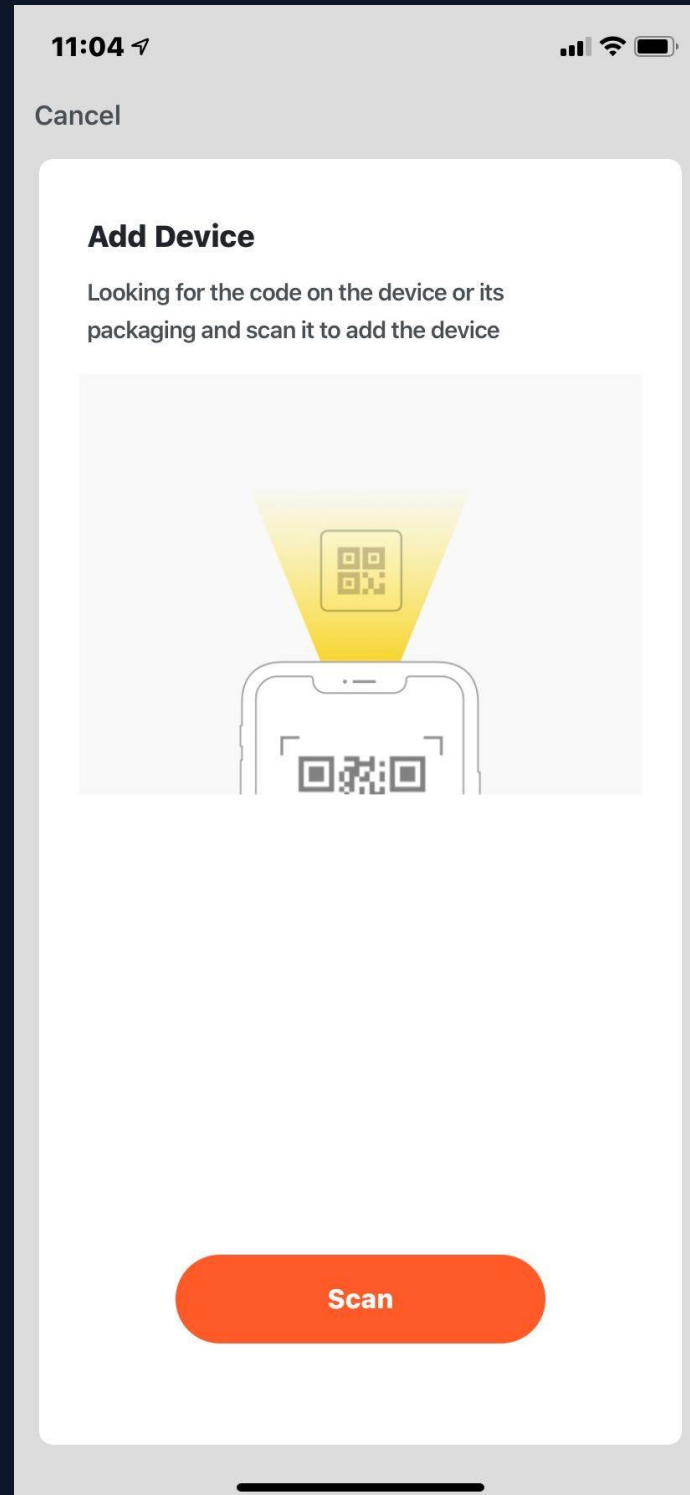

7. You can also set NB-IoT Wi-Fi products to quickly flash and use Auto Scan to connect them in one click. (Please use 2.4G Wi-Fi. Also Wi-Fi name and password needs to be entered in the APP.)

NO.3.4.5 Scan to Pair Devices : Scan QR code in NB Products or Enter Code

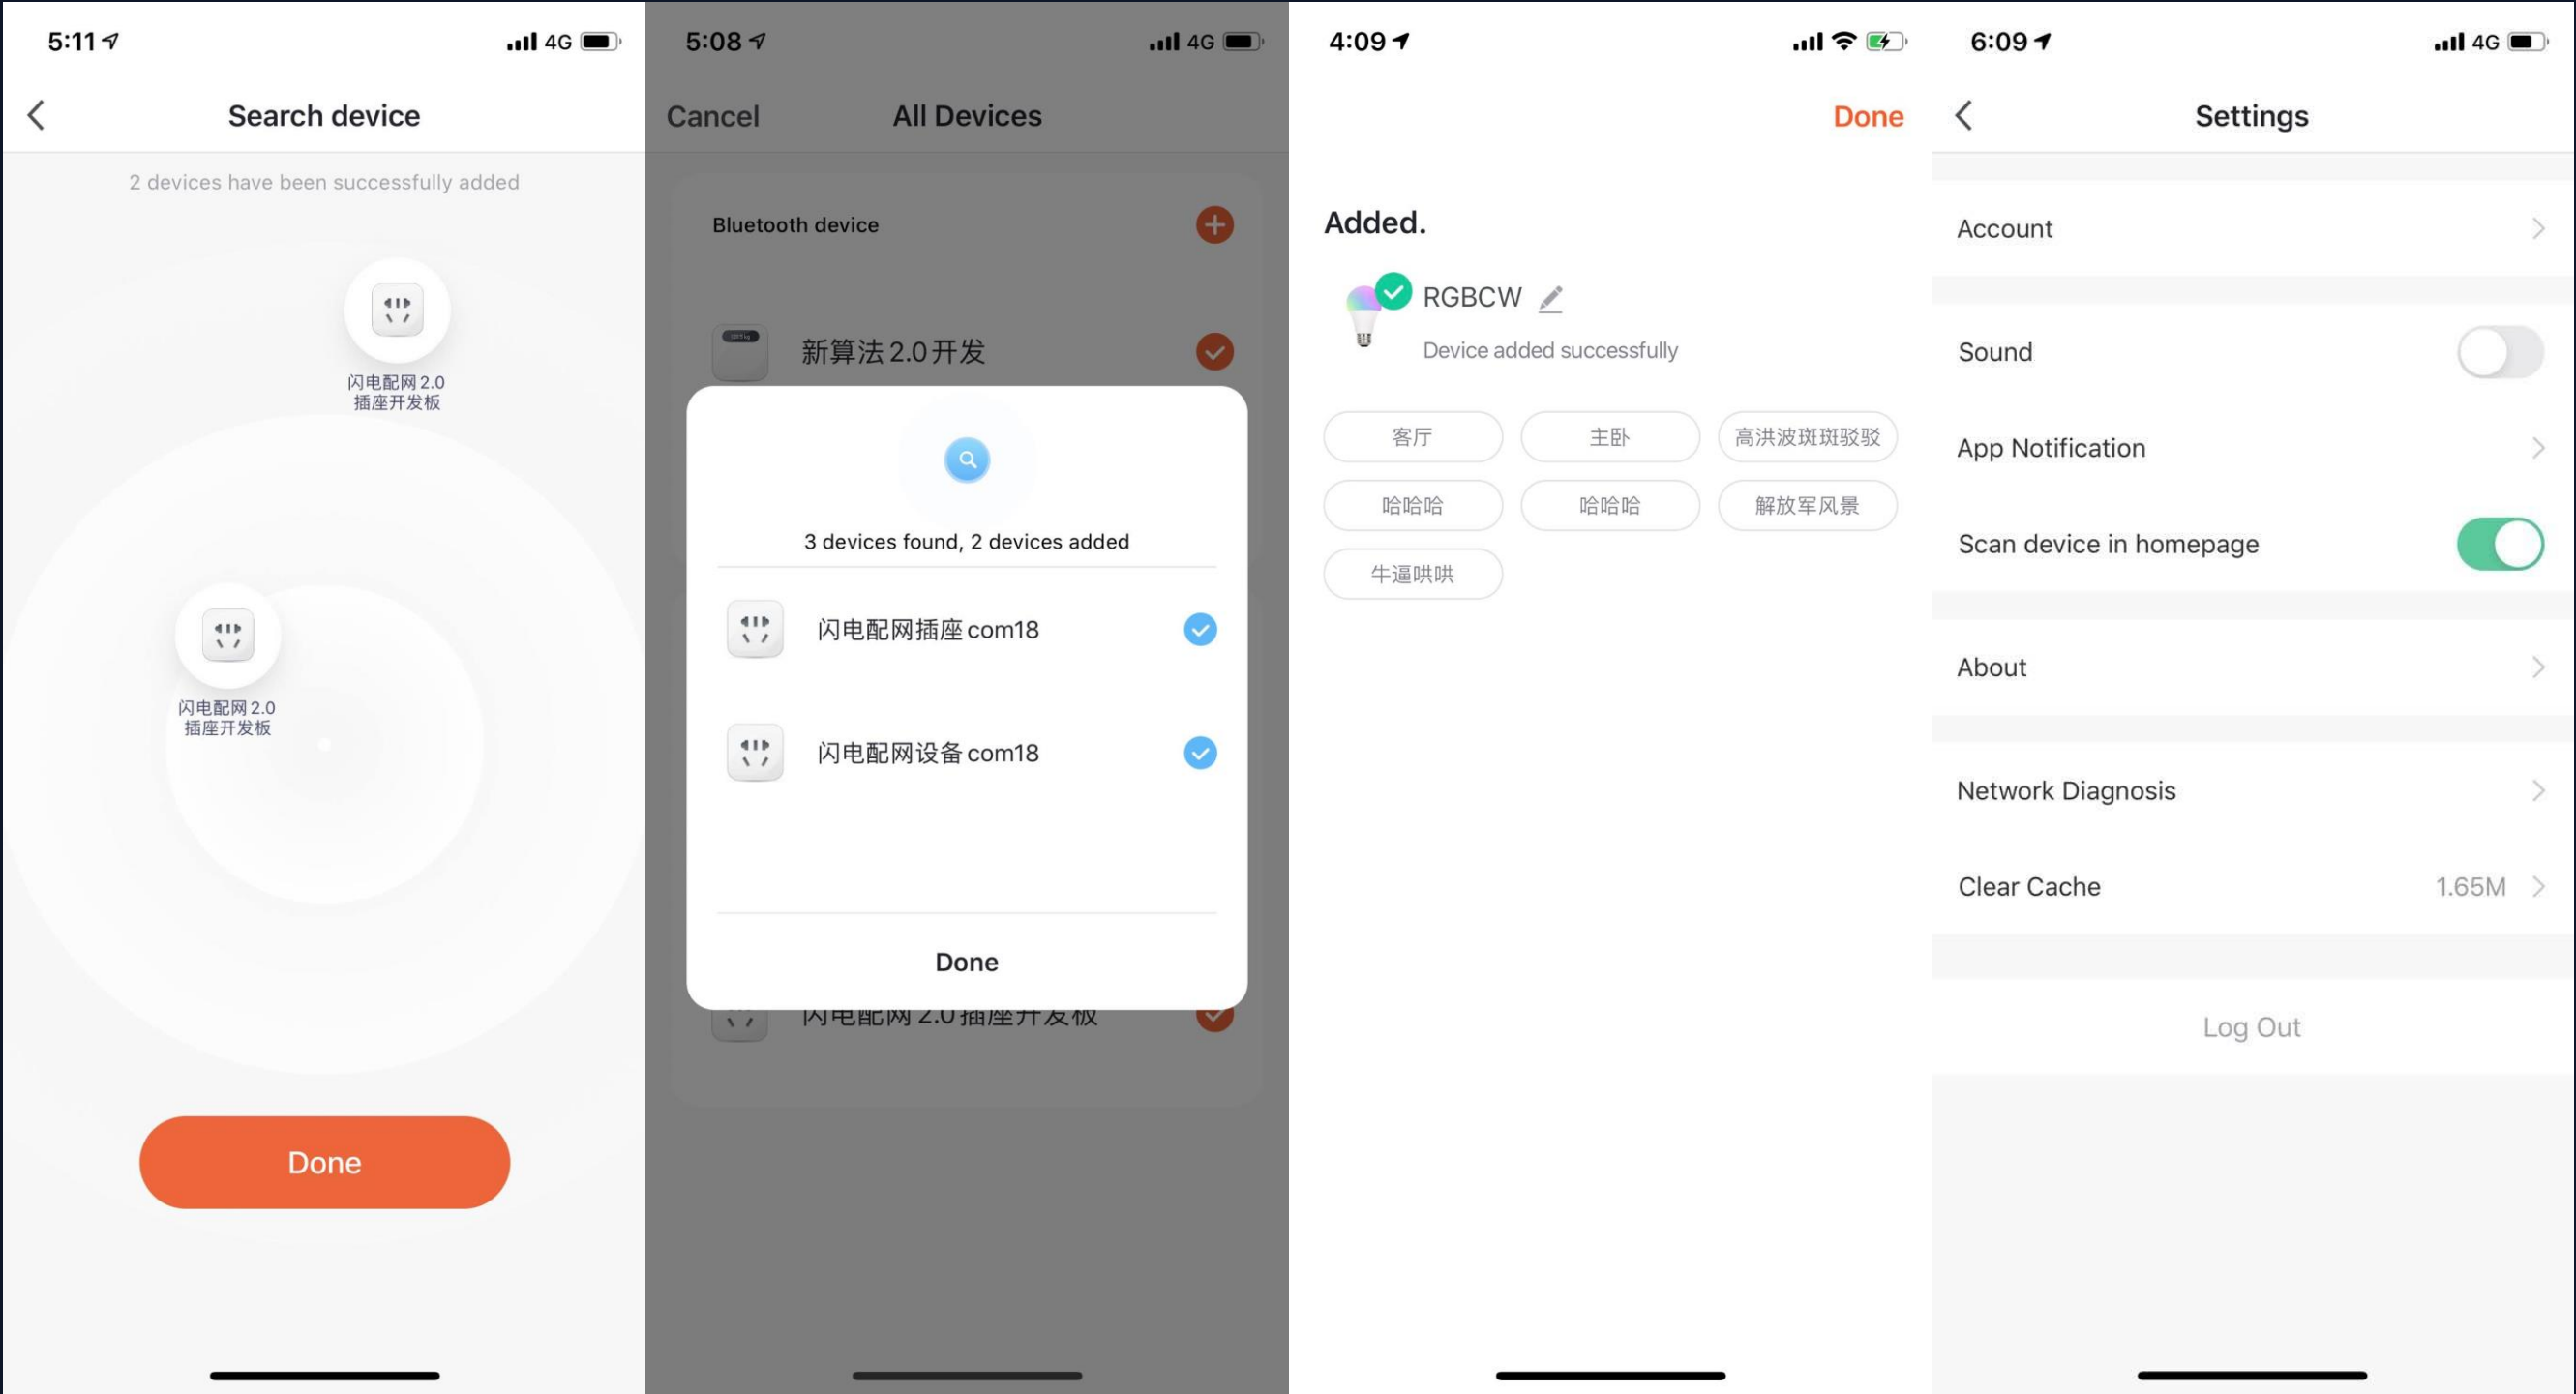

Choose the NB products you want to connect and click the scan icon on the top upper right corner to scan the device's QR code. Or you can directly enter the IMEI number on the device's label and choose "Confirm" to connect the devices with the APP.(The APP will need phone camera access when scanning.)

NO.3.4.5 Added the distribution method of scanning code distribution network

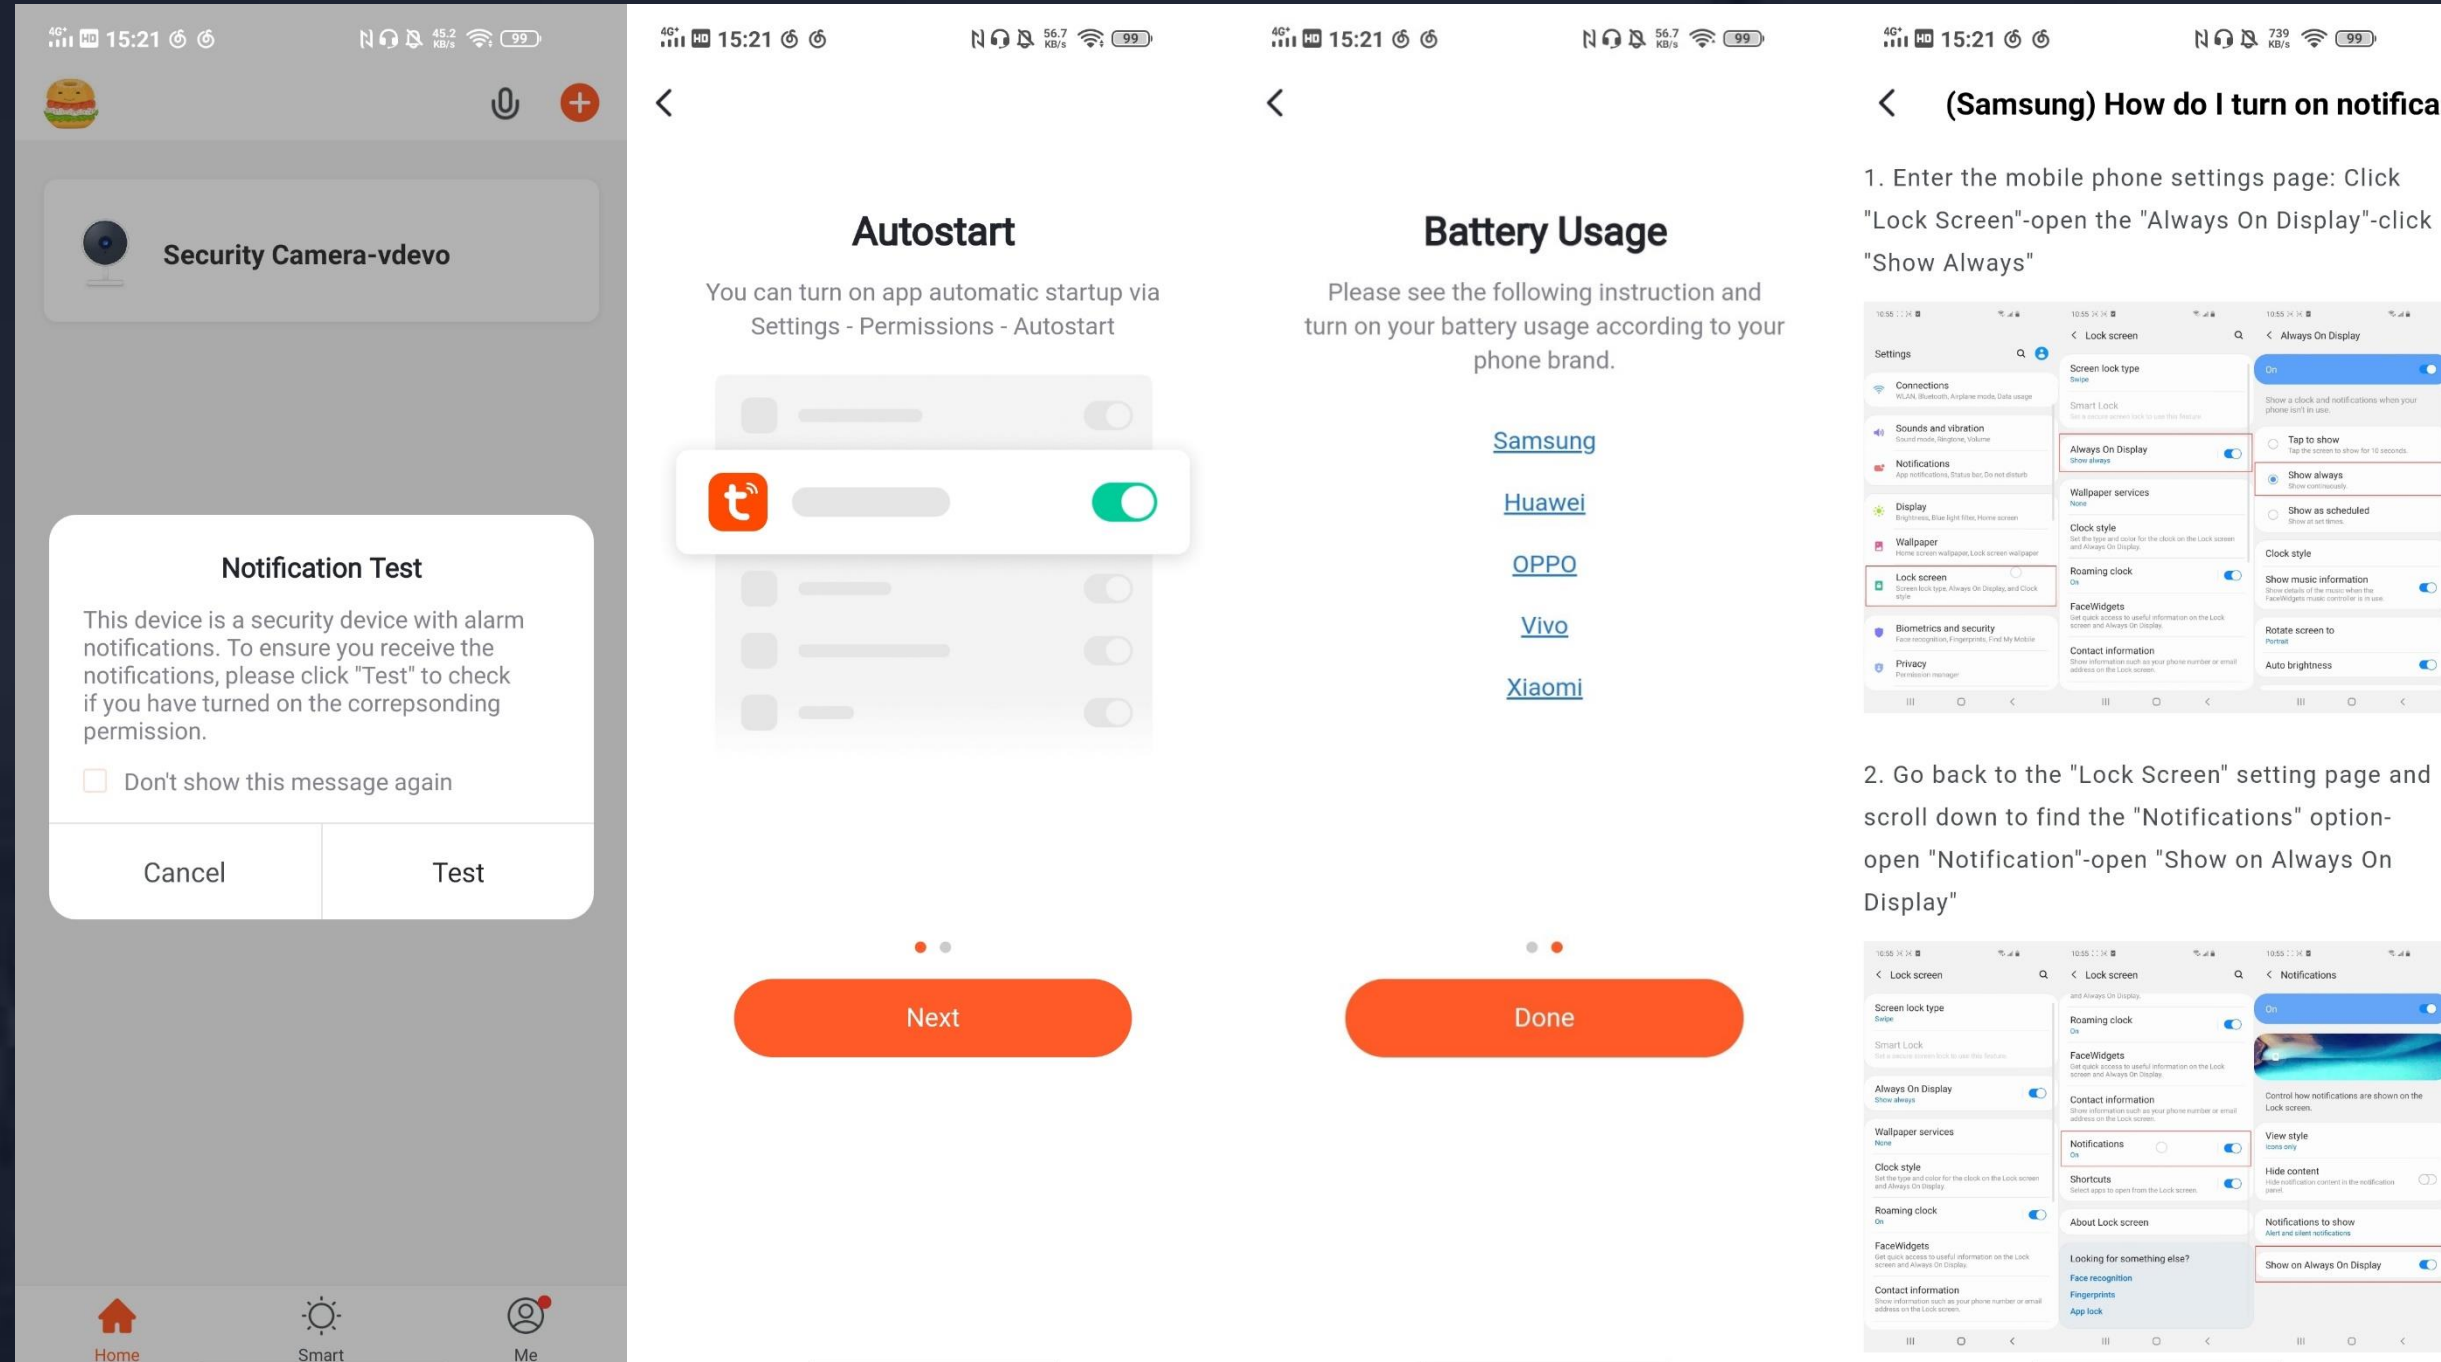

According to the demand, the IoT platform-product management can be added to the scan code distribution network. Just scan the QR code on the product or the outer packaging of the product to jump directly to the distribution page.

NO.3.4.6 Added lightning distribution network distribution method

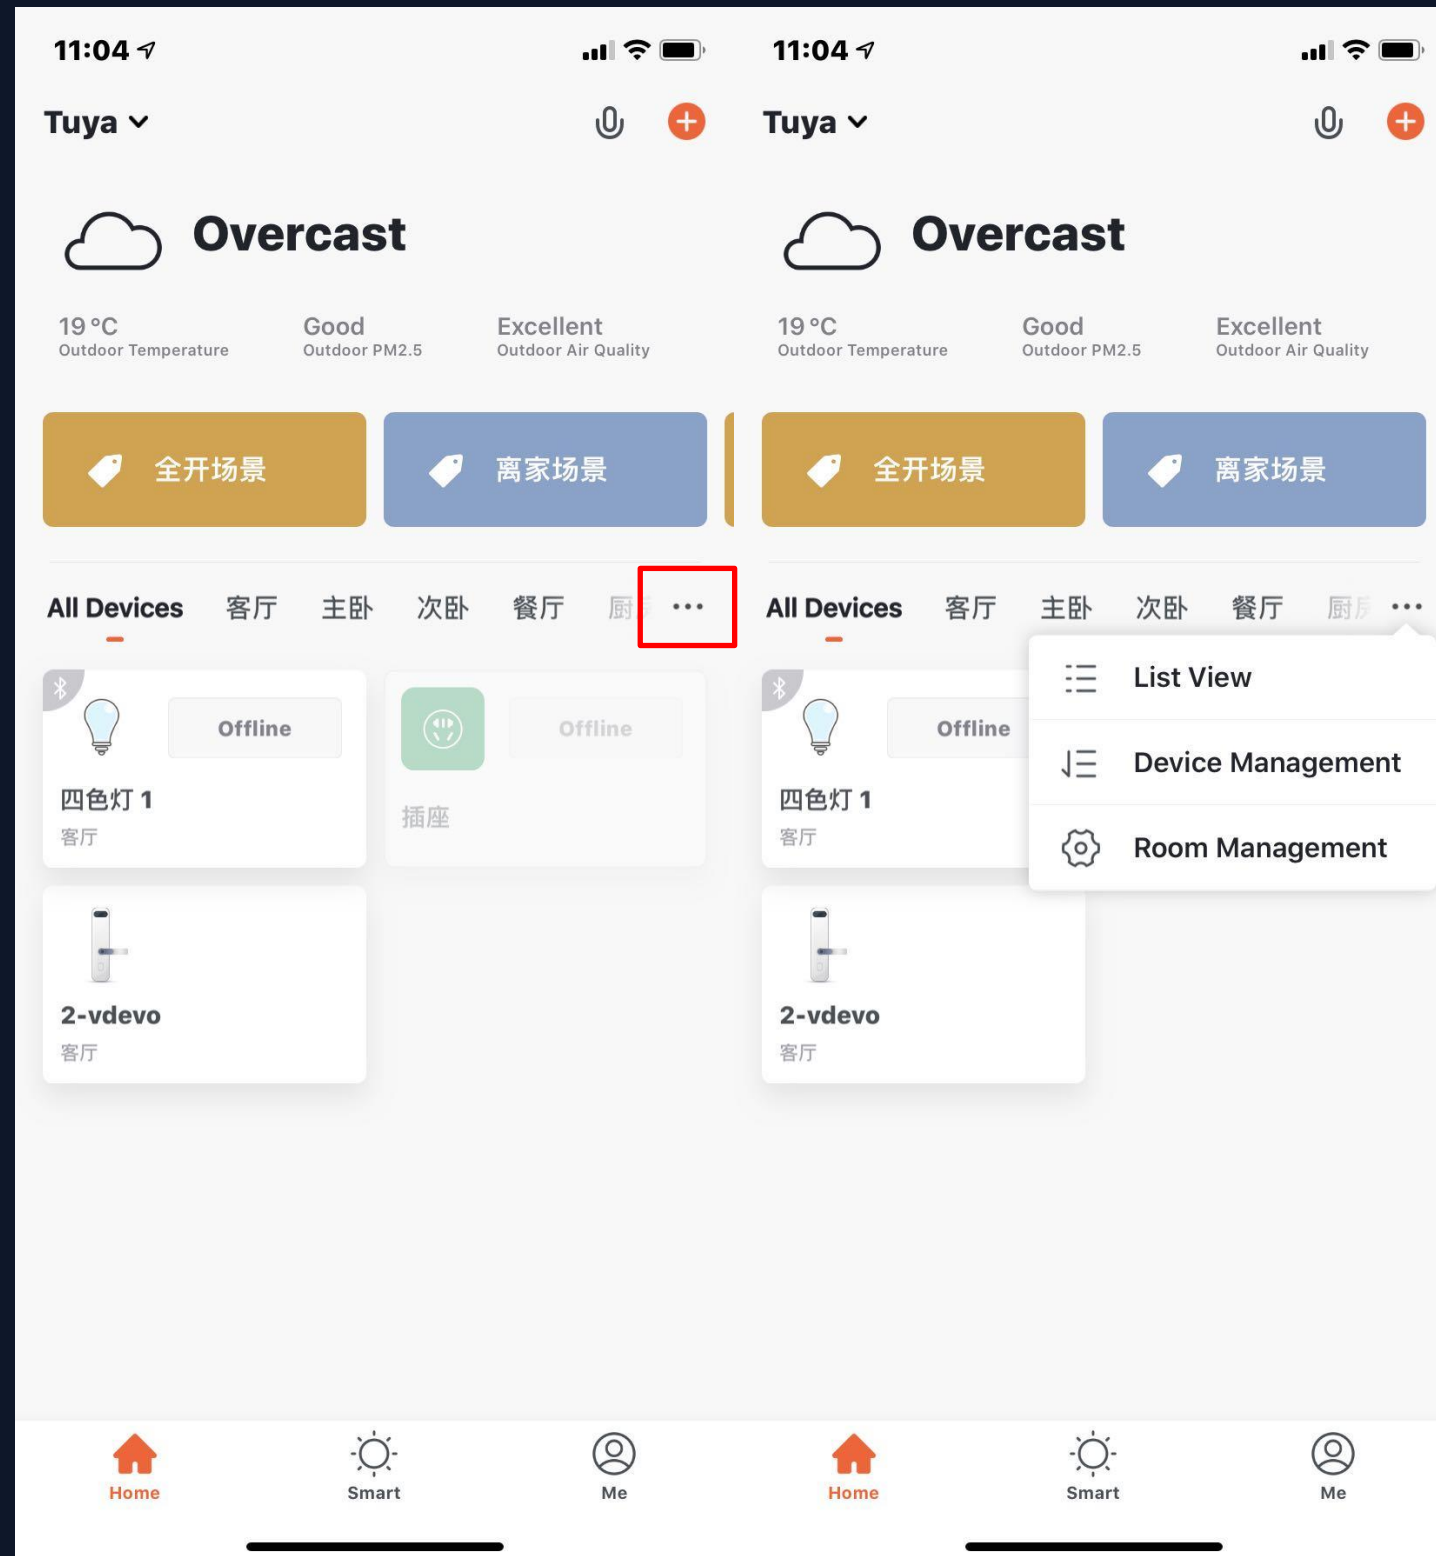

Lightning distribution network is different from the original Wi-Fi distribution network. When there are devices that support lightning distribution network in the home, it will automatically scan for nearby devices, and there is no need to enter Wi-Fi information again, which reduces the probability of Wi-Fi errors. Increase the success rate of distribution network.

Android mobile phones will trigger push reach detection when security devices are added. If a pop-up window is displayed, click "Detect" and then click "Next" to check the corresponding detection tutorial against your mobile phone model to complete the relevant push reach detection.

NO.3.5 Device/Room List

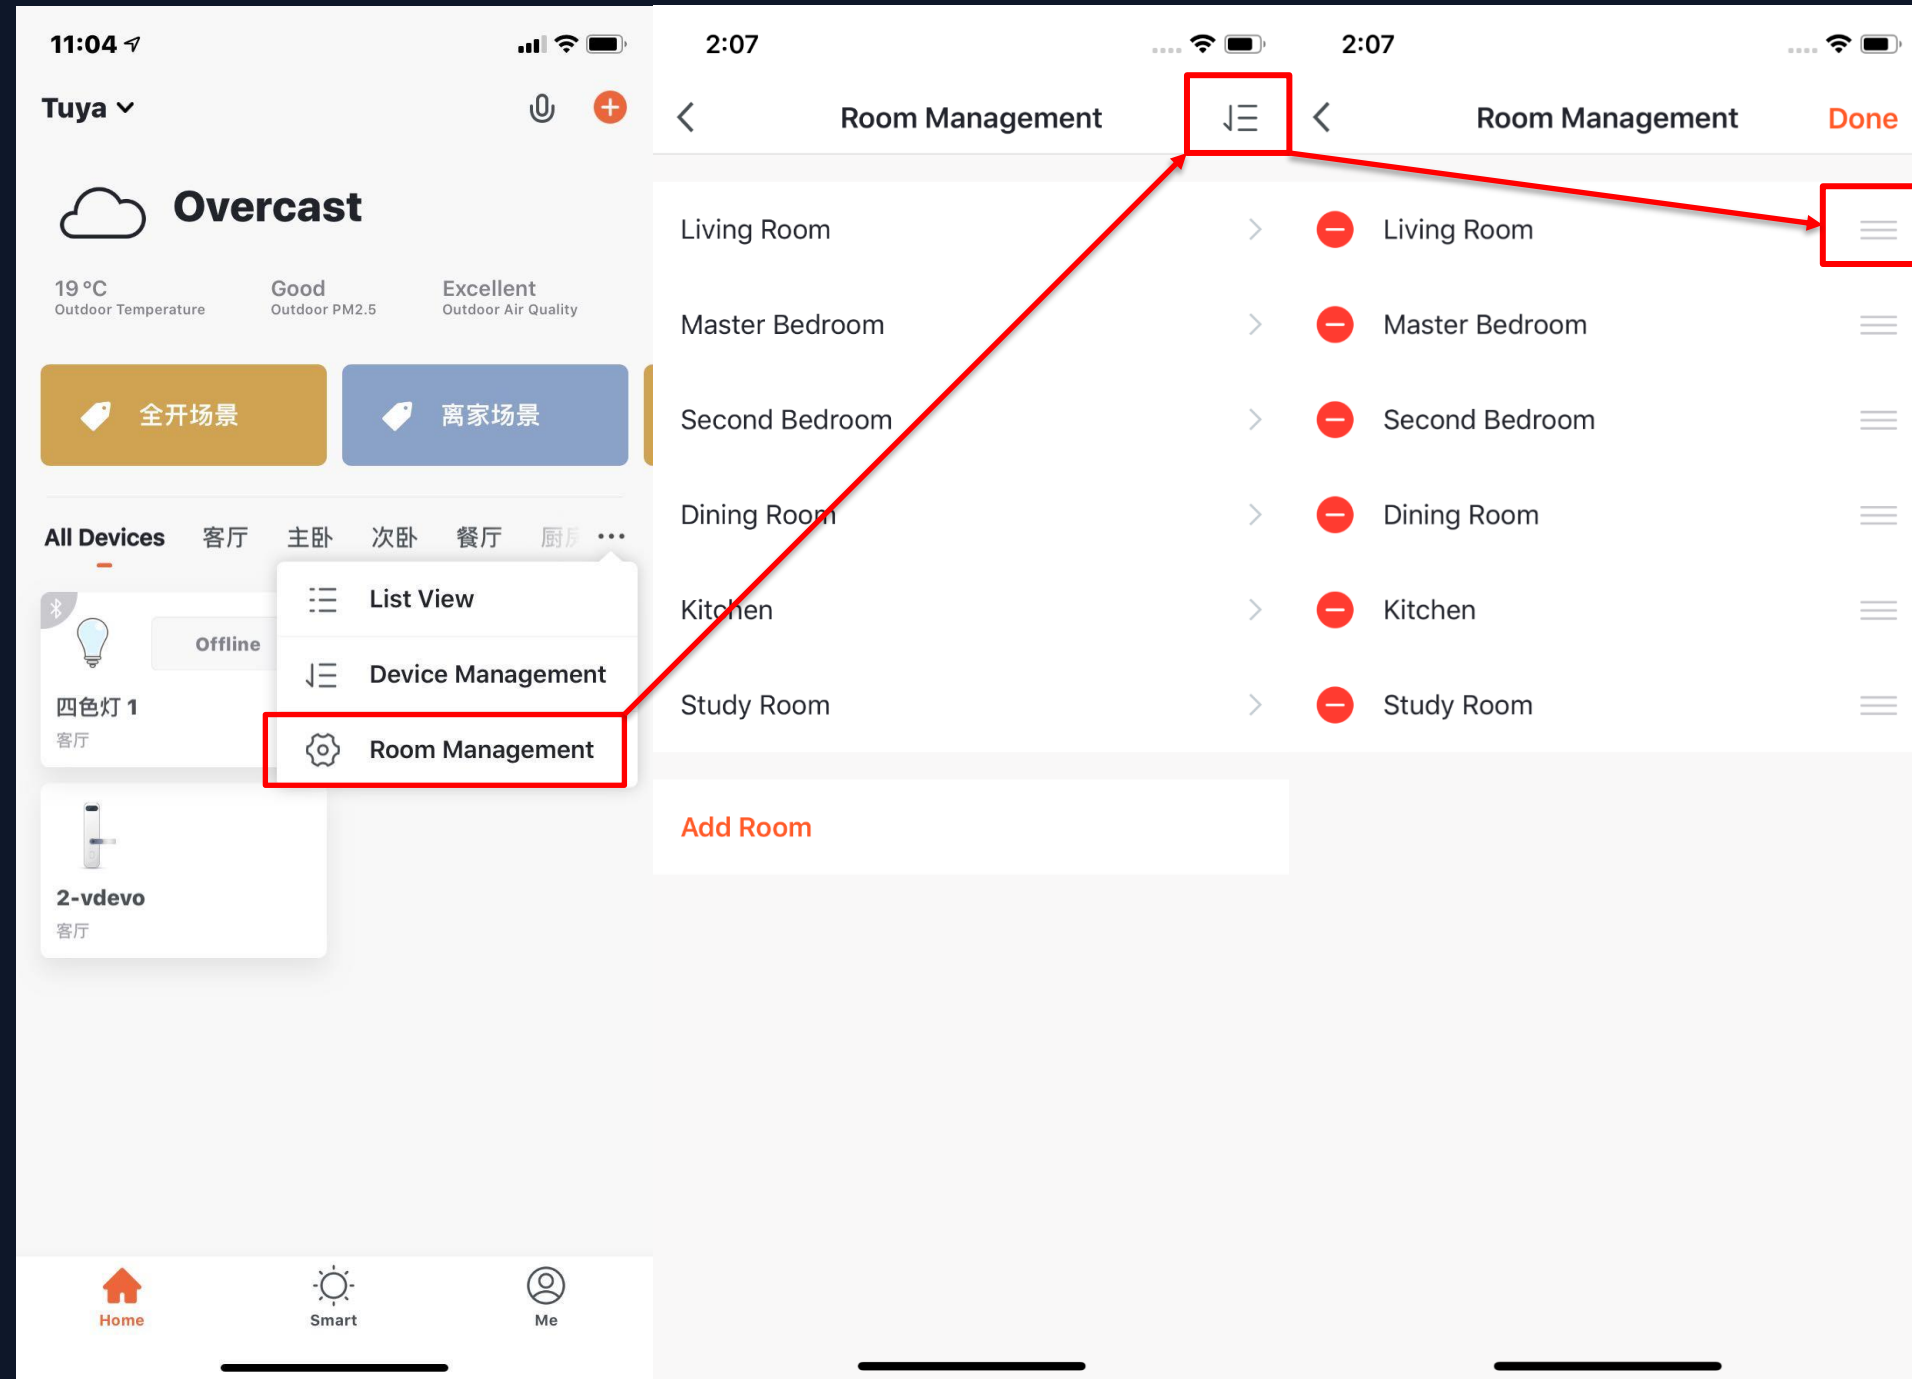

Device Page : You can see all the devices, room names in this page. Click “...” in the right, you can choose to see devices in list view or grid view; You can click “Equipment management” to manage the devices order; You can edit rooms through “Room Management” .

NO.3.5.1 Device management

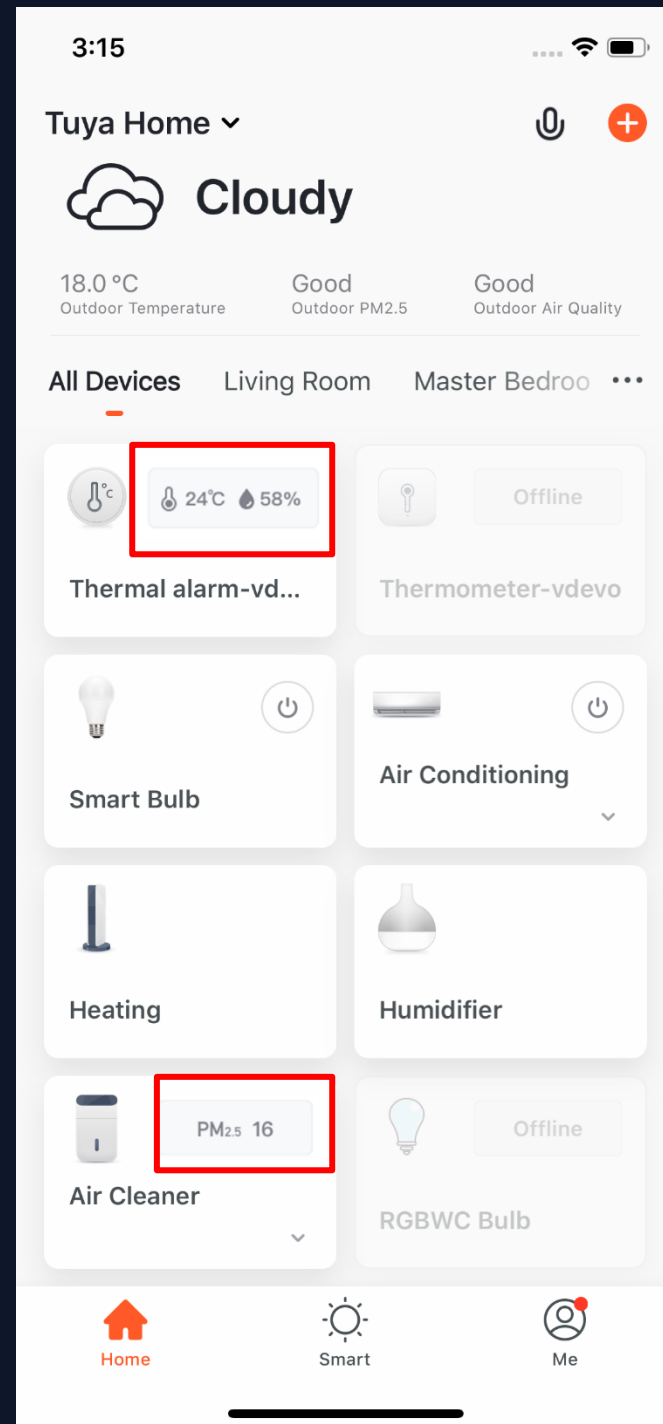

1. To change the sequence of devices, click “...” on Home page, then click “Device Sequence” . Now you can drag “≡” to adjust the order of your devices. Multi-select devices can be batch deleted device management.

NO.3.5.1 Room Sequence

2. To manage your rooms, click “...” on Home page, and choose “Room Management”, then click the icon appears on the top-right corner of the screen. Now you can drag “≡” to adjust the order of your rooms and click “-” to delete the room.

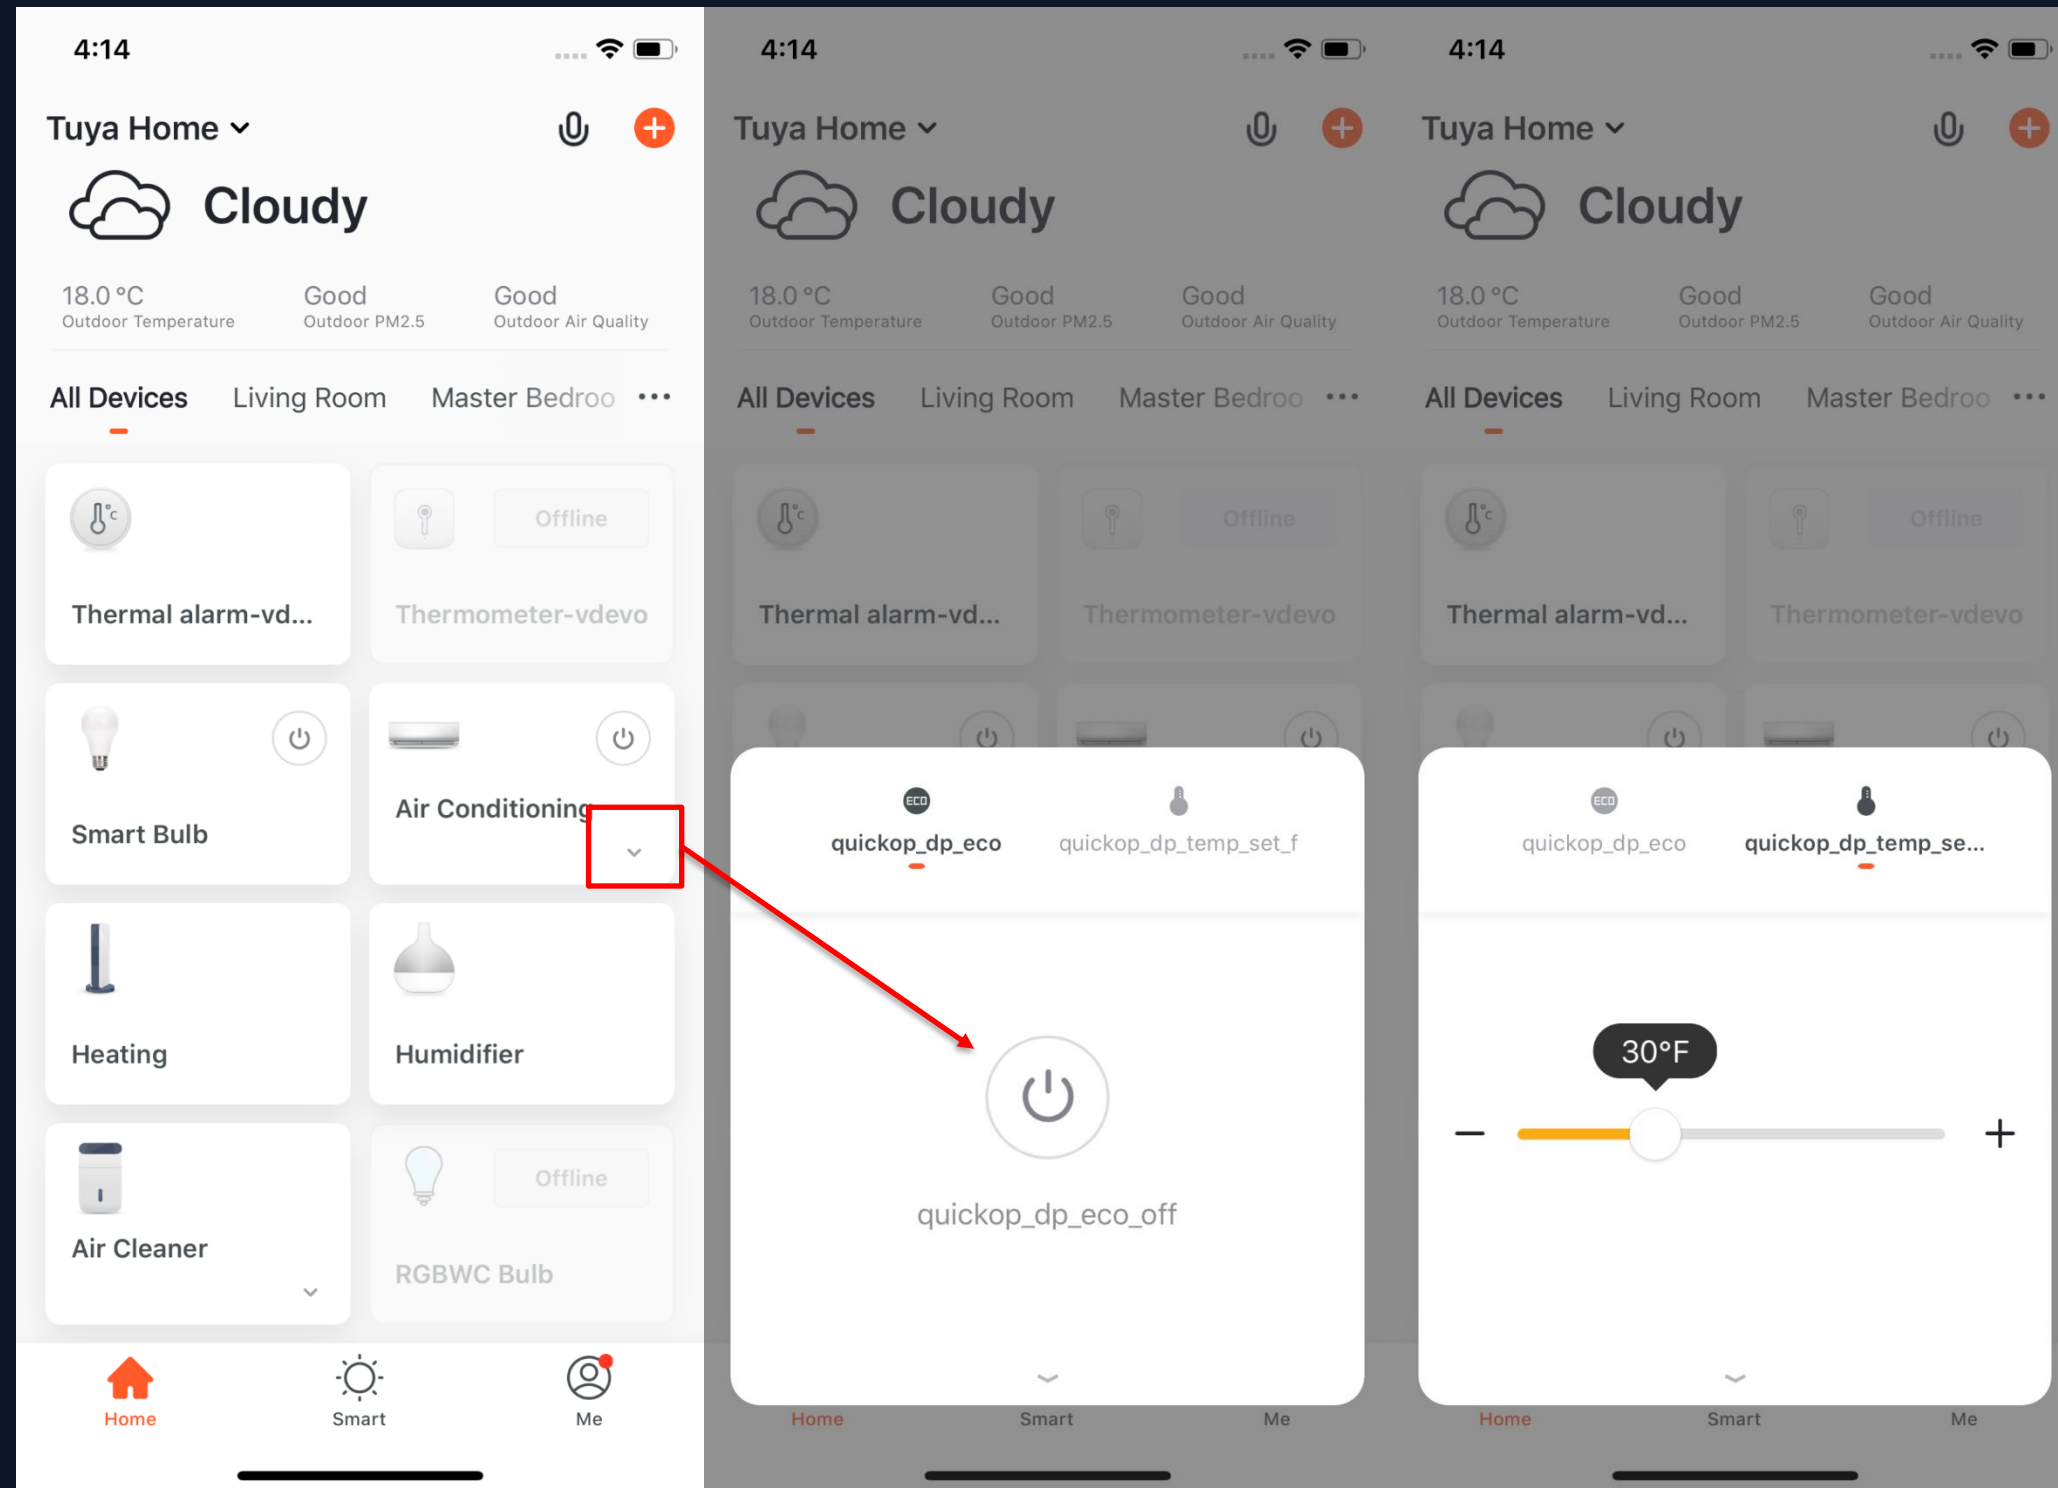

NO.3.5.2 Device/Room List

3. Device Online/Offline: the module is dark if the device is offline, and bright if the device is online;

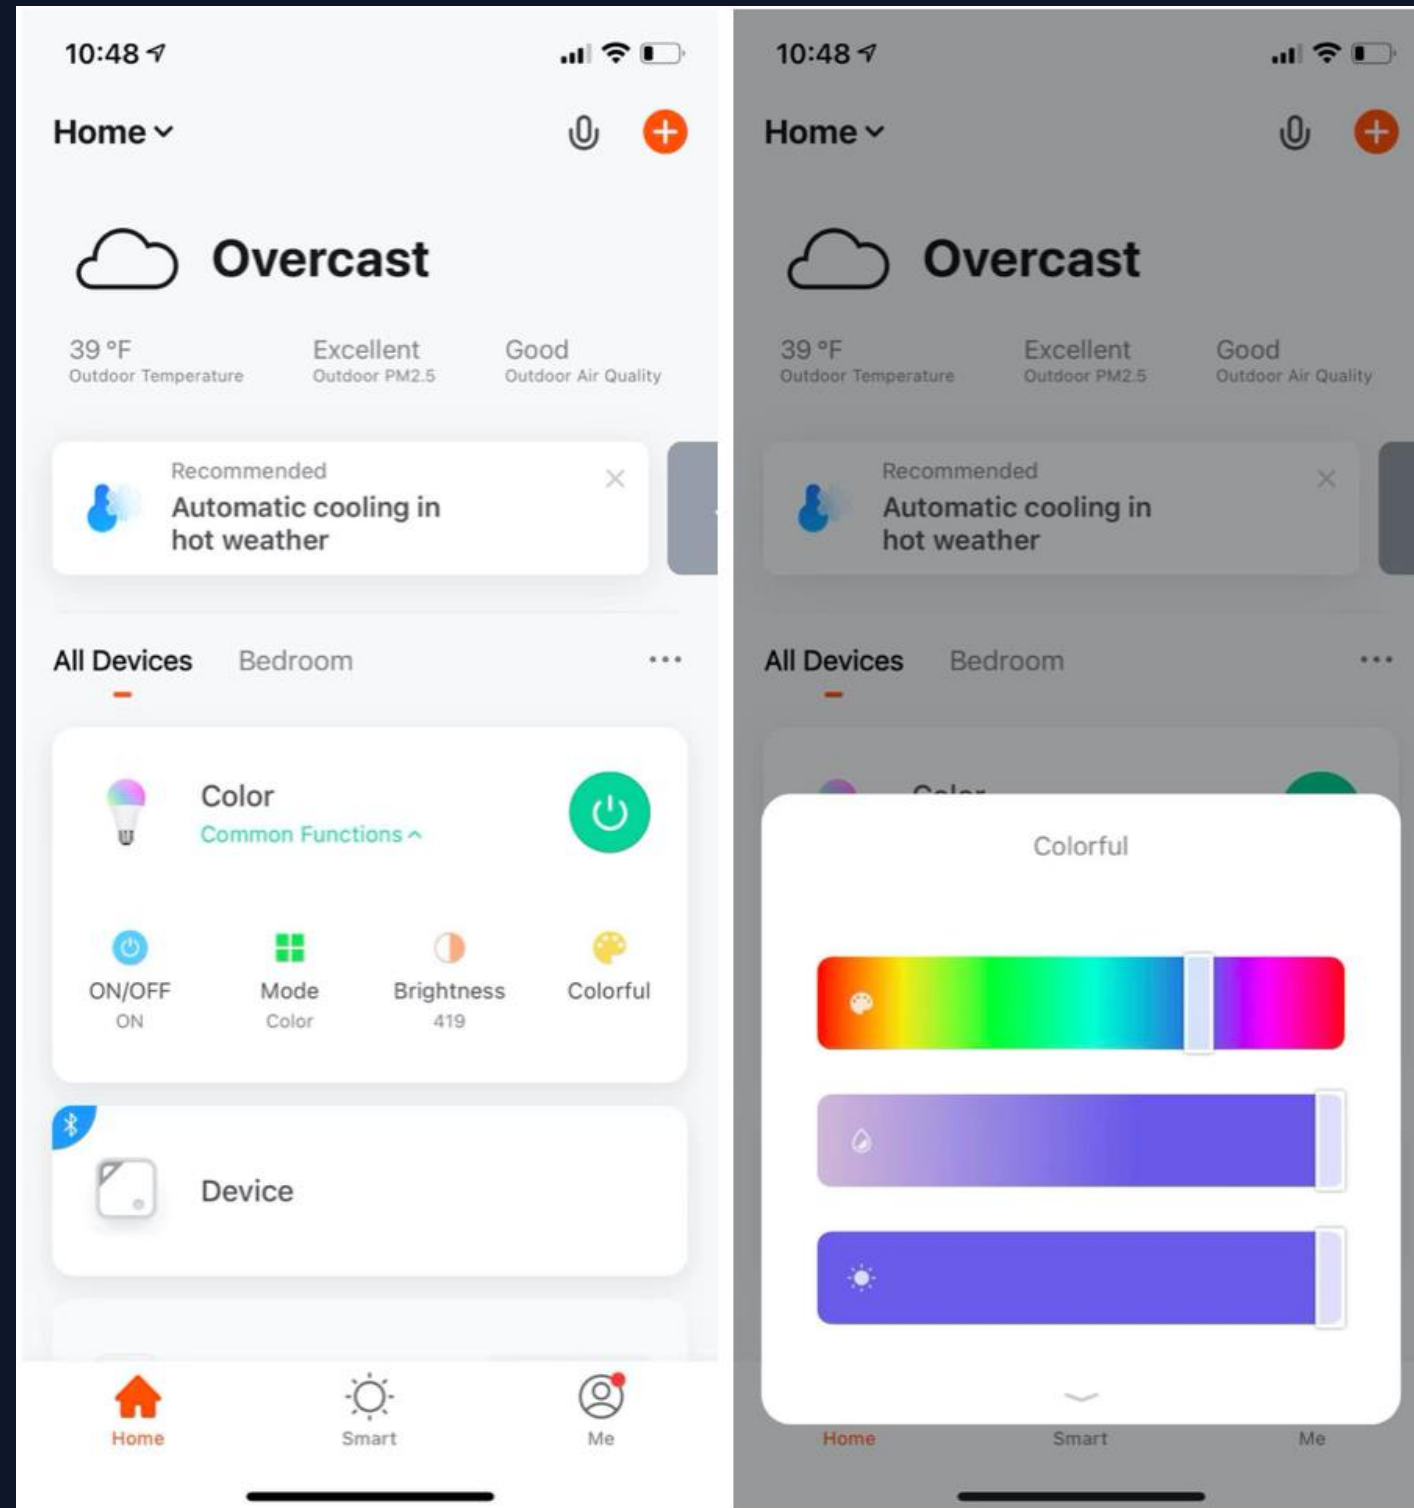

4. Some devices will have important data information shown on the Home page. For example, the devices with temperature, like air conditioning, water heater, heating, etc. When the device is open, the temperature data will be directly shown on the device icon with no need to click on it.

NO.3.5.3 Quick Actions for Common Functions

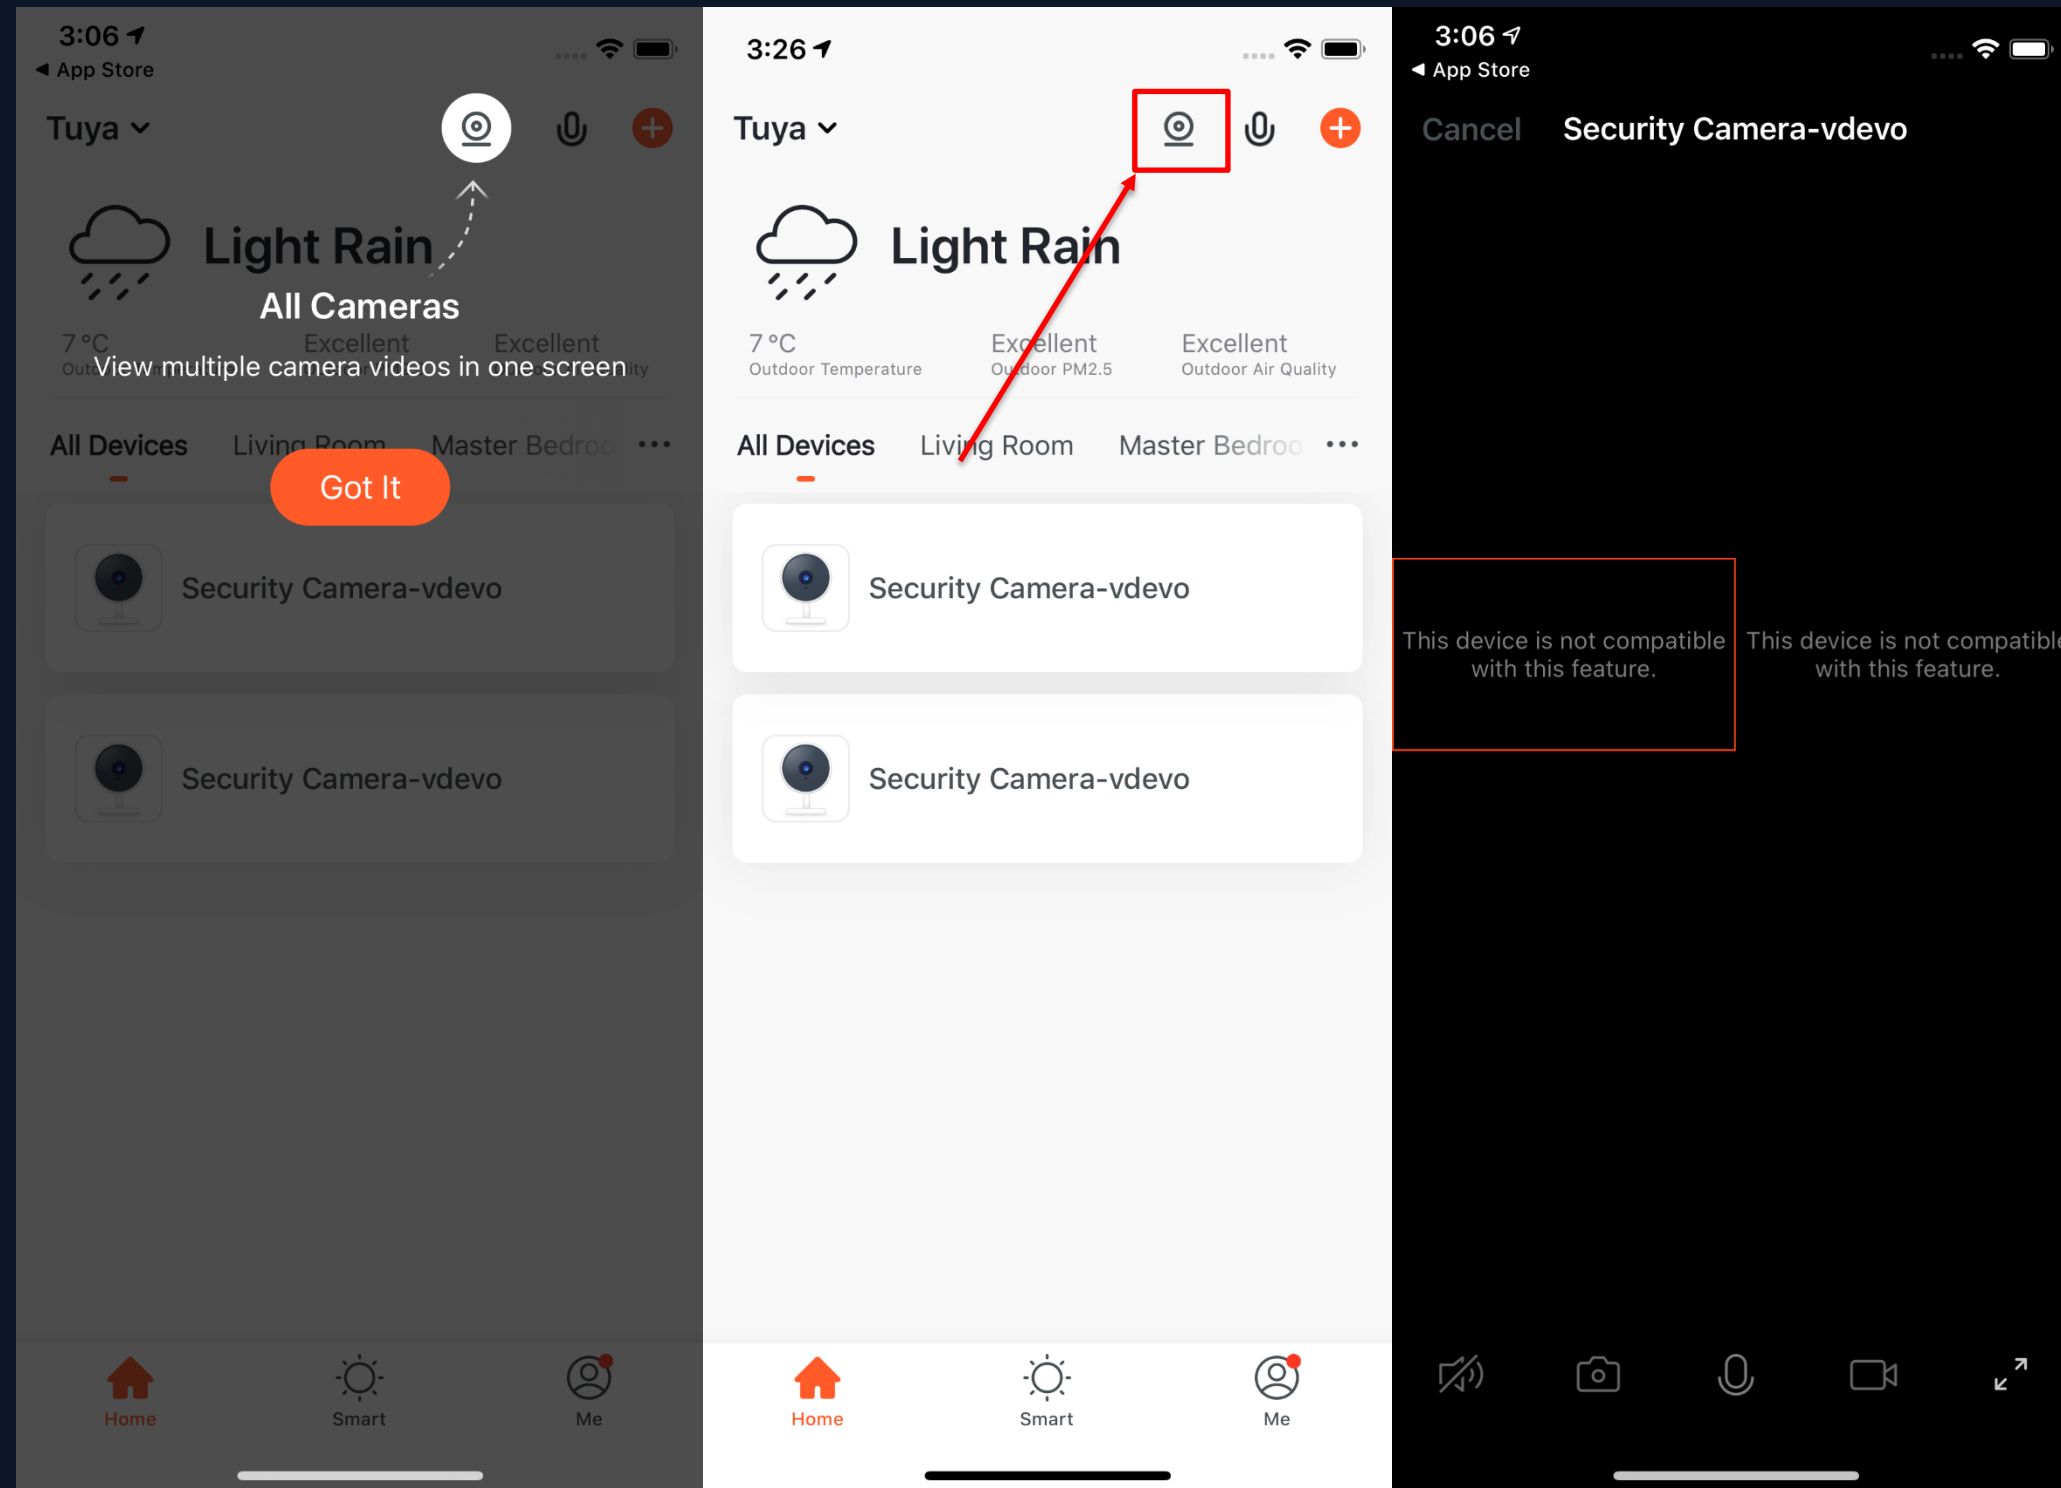

1. In Grid View, click the small arrow on the bottom right corner of the device icon to open more common functions, like the switch bottom and temperature adjustment for air conditioning.

NO.3.5.3 Quick Actions for Common Functions

2. In List View, click “Common Functions” on the bottom of device icon to open more device functions, like the switch, mode and brightness value of the colored lights.

NO.3.5.3 Quick Actions for Common Functions

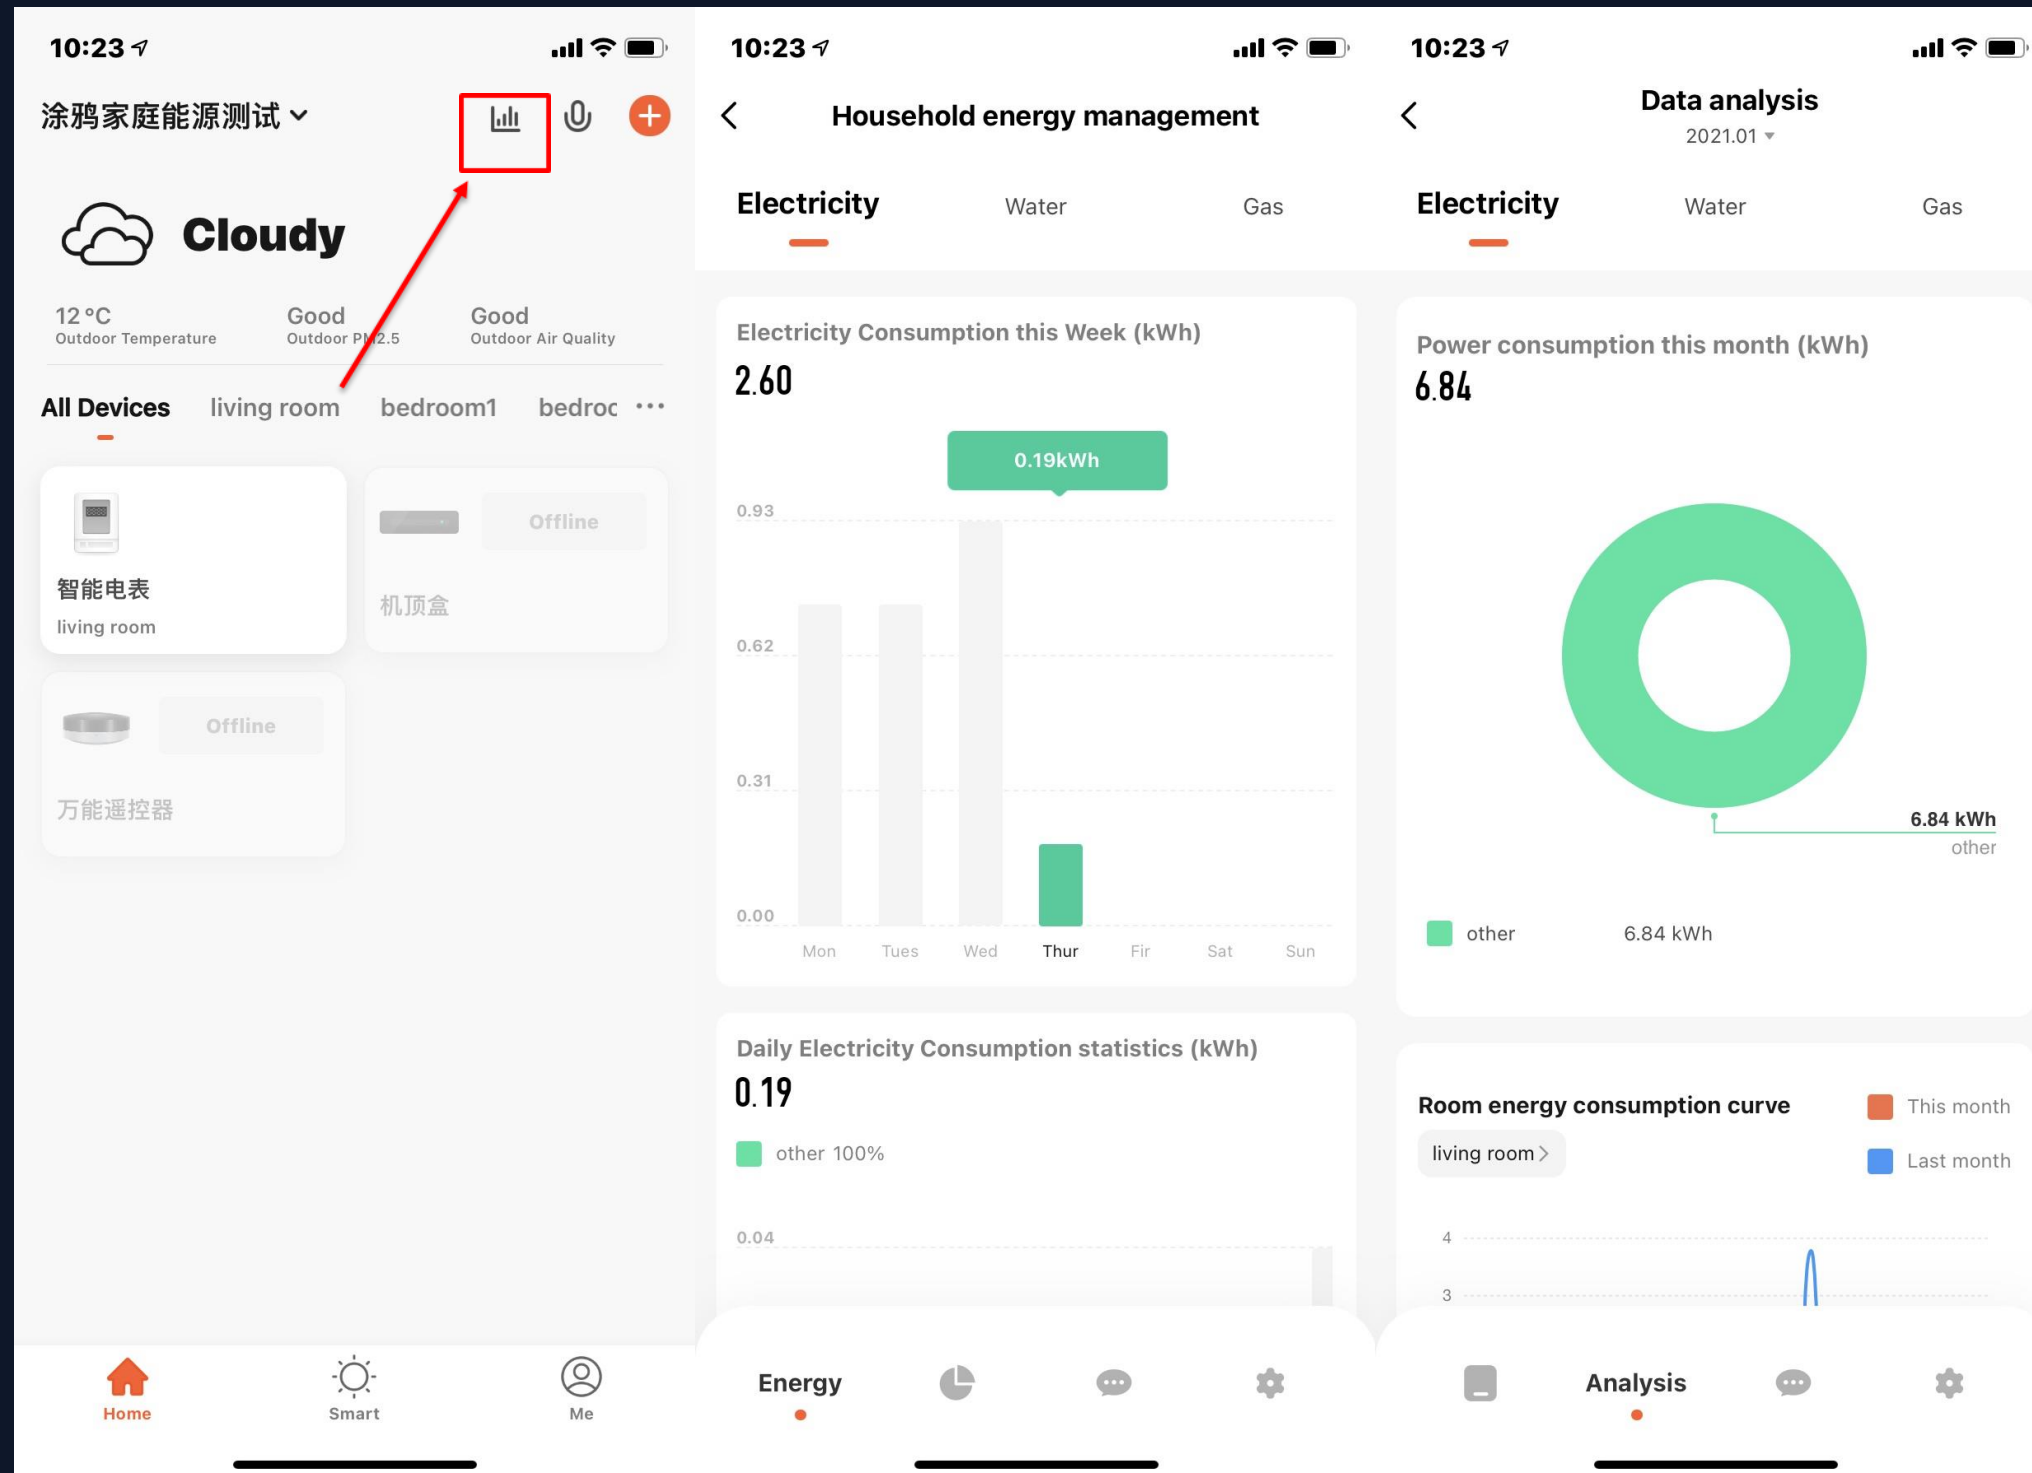

3. When there are more than two "Smart Cameras" in the list, the option of "All Cameras" will appear on the homepage. After you click to enter, you can view the video multiple cameras in one screen.

NO.3.5.3 Quick Actions for Common Functions

4. When there is at least one security gateway in the device list, the "smart security" function will be activated. This version supports basic arming and disarming functions.

NO.3.5.3 Quick Actions for Common Functions

5. When there is at least one energy metering device that has passed the energy statistics function in the device list, the "household energy management" function will be activated.

NO.4 Device Control

1. A device icon will appear in “All Devices” when the device completes pairing successfully. Now you can click on the icon to enter the control panel of this smart device. (The control panel will vary from device to device)

2. When the device is offline, the icon will show “Offline” and the device is unable to operate.

NO.4.1 Device Control-Individual Control

3. Click the device icon to enter the control panel. Take the light as an example. When the light is off, you can only set "Schedule" and "Timer" ; when the light is on, you can set "Scene, Color, Brightness and Schedule" . Click "✎" in the upper right corner of the control panel to manage this device separately.

NO.4.1 Device Control-Device Management

Please see the device editing page, as shown in the image:

1. Click the icon: you can edit the device icon, name and location;

2. Device Information: you can view the device's ID, IP address, MAC address, time zone, and online status, etc.;

3. Tap-to-Run and Automation: you can turn on/off or edit the recommended Automation setting;

4. Share Device: you can share devices with others by entering a phone number/email (**Notes: the phone number/email must have registered for TuyaSmart**);

5. Create Group: after entering the page, all devices with the same type as this device that have been added under this account will be automatically displayed. By creating group for them, you can easily manage the devices with the same type (**Built-in firmwares must have the same version**) ;

6. FAQ & Feedback: you can view the FAQ of this device to get help, and also give feedback if you have any problems;

7. Add to Home Screen: you can enter the control panel of the device directly through your Home Screen;

8. Check Device Network: you can check your device connection status.

9. Device Update: you can check latest version here;

10. Disconnect : you can remove the device from device list, and the corresponding "Automation" and "Tap-to-Run" will be removed too;

11. Disconnect and wipe data: the device will be removed from device list, and all data of the device will be erased.

NO.4.1 Device Control-Device Management

Automatic upgrade function

1. Click Device Upgrade in Device Management
2. Click "Automatically keep the device up-to-date" if you need the automatic upgrade function

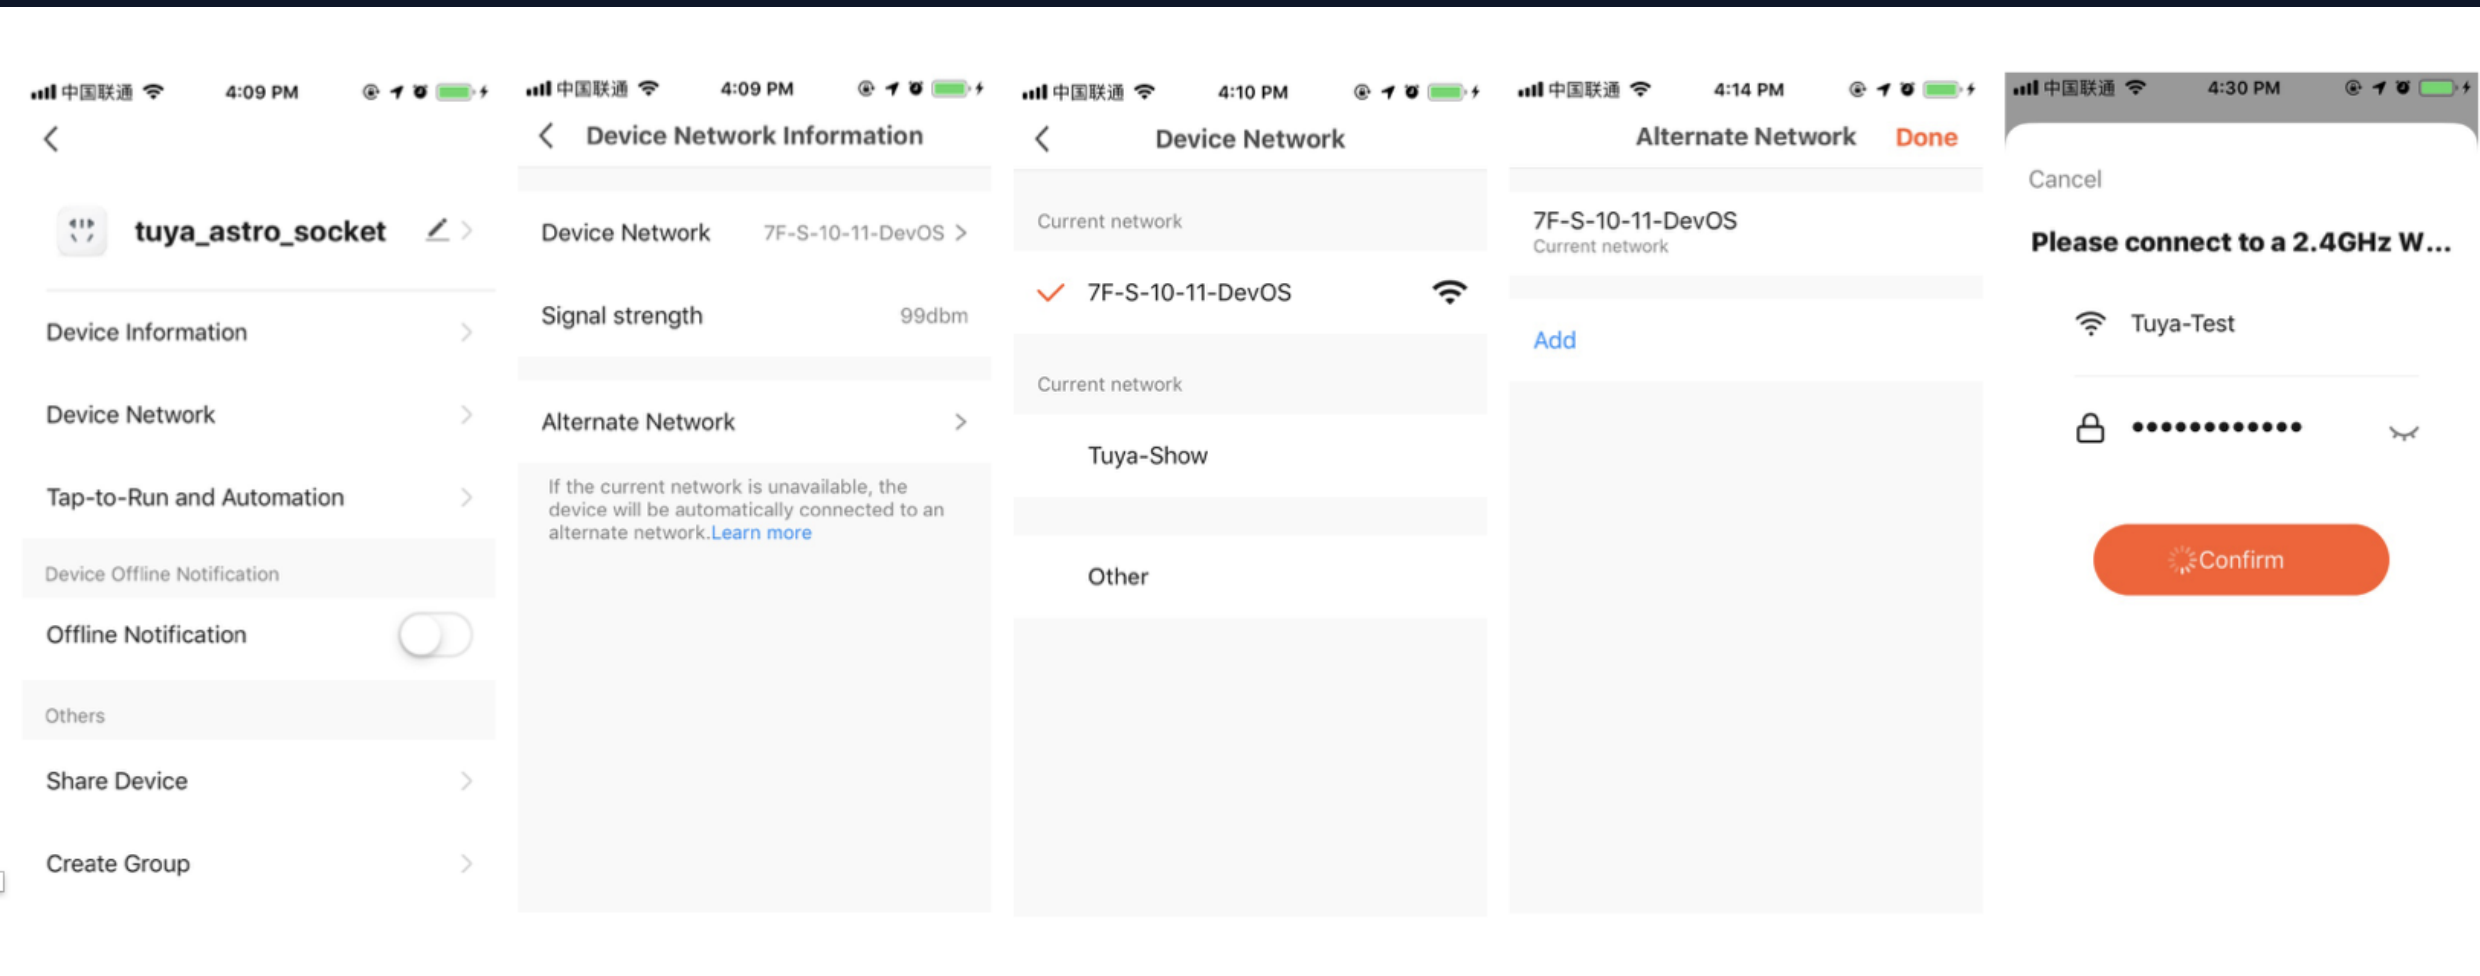

No need to automatically upgrade and keep the button off.

NO.4.1 Device Control-Device Management

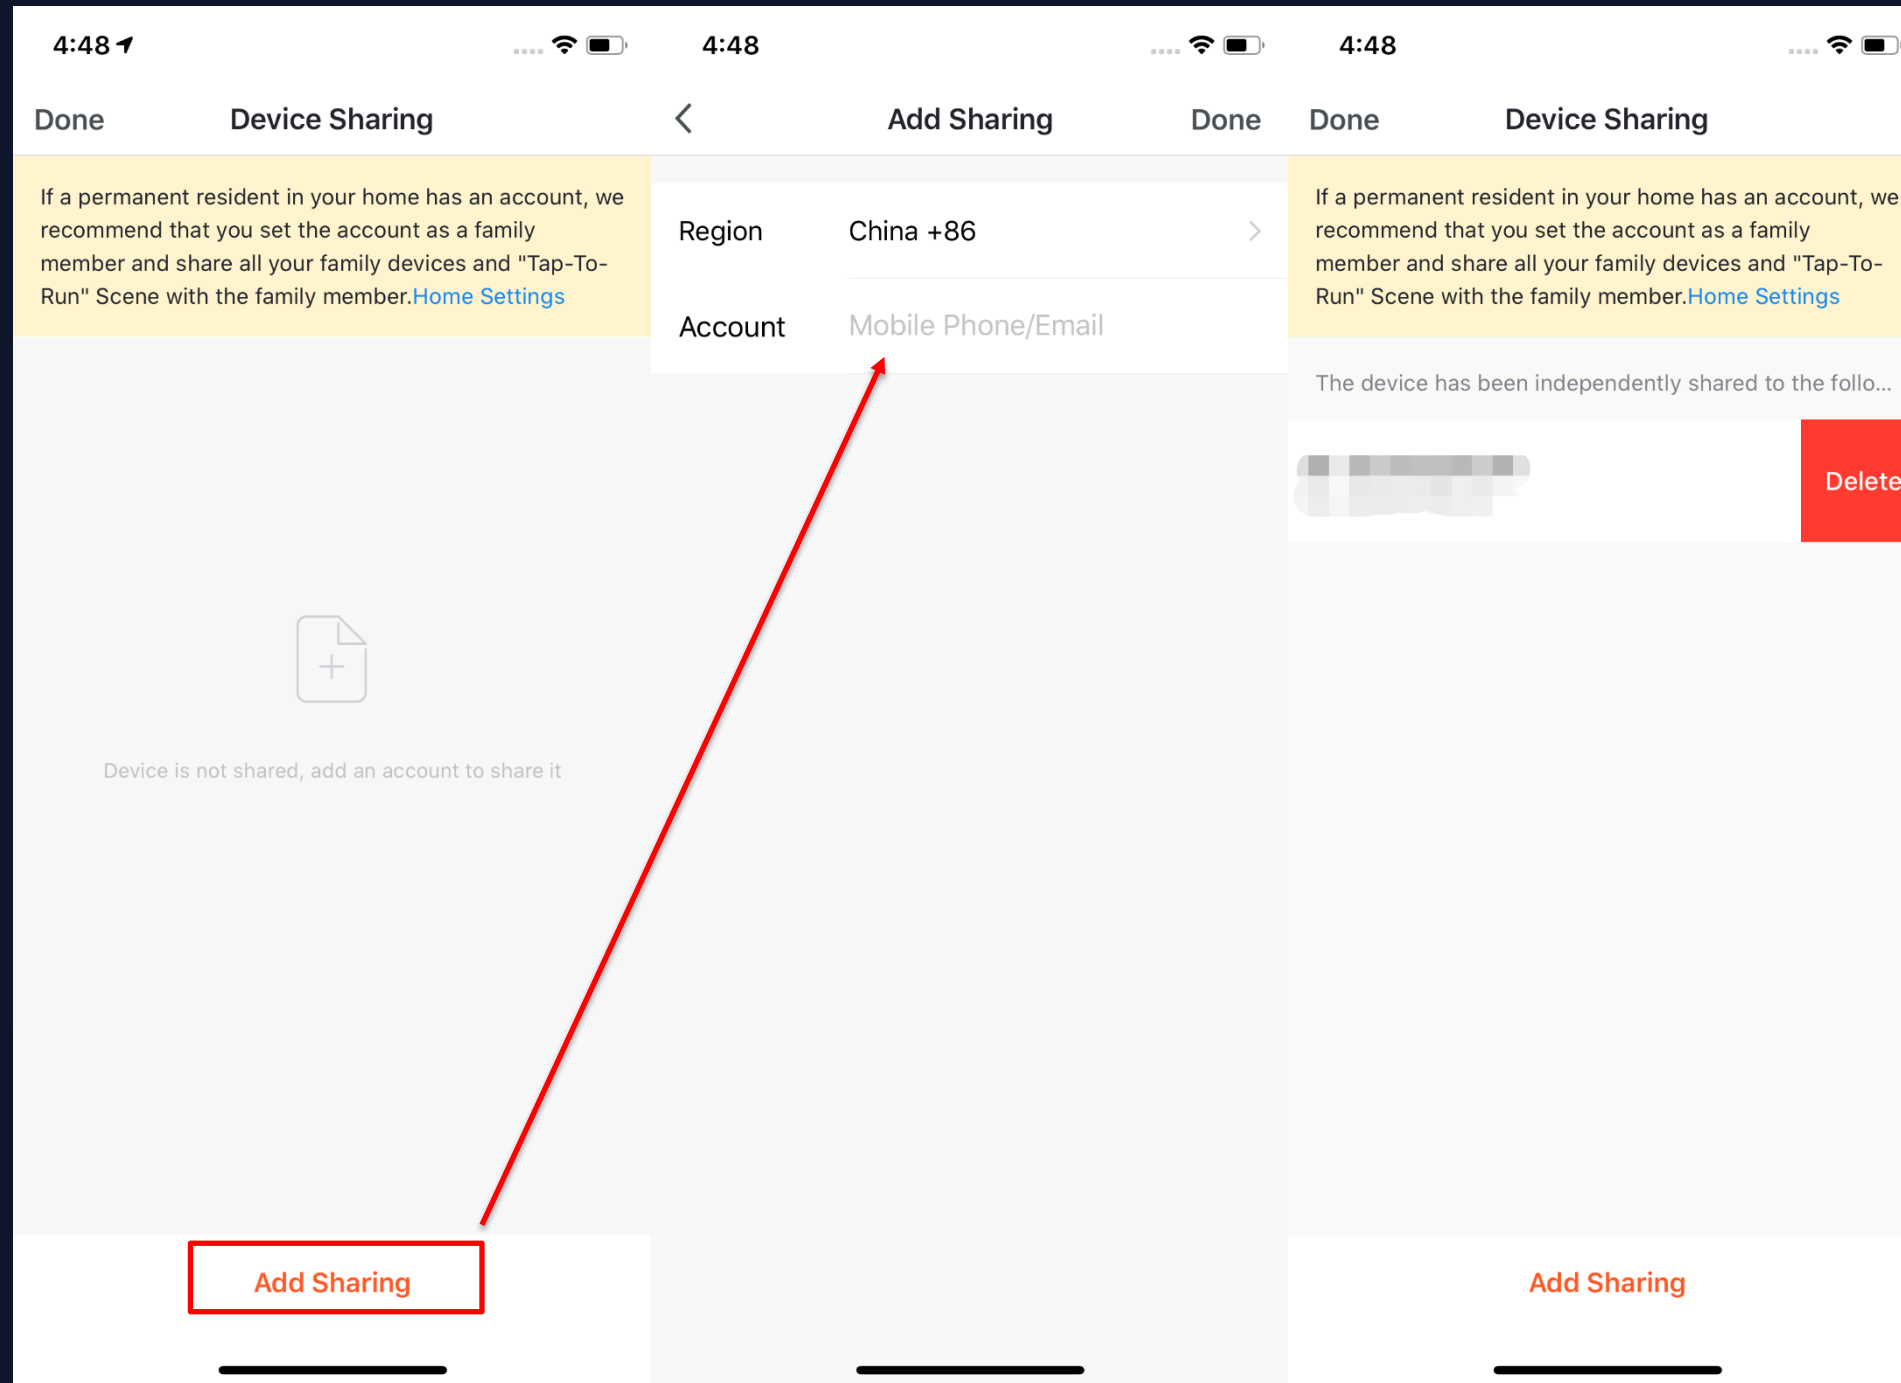

Network switching function

1. Click "Set up network", then click "Backup network"
2. On the network setting page, you can select the required alternate network and enter the Wi-Fi password for connection settings
3. After the setting is completed, it will automatically connect to the set backup network in the case of the current network connection failure

Note: Since the firmware upgrade has not been completed yet, this function is in a standby state, so you cannot find this option on the device management page for the time being.

NO.4.1 Device Control-Device Sharing

1. Click "Device Sharing" on the "Device Management" page to enter the device sharing page.
2. After entering the "Device Sharing" page, click "Add Sharing" at the bottom of the page, and enter the account. (People you share with should also have a TuyaSmart account, and in the same region as you; accounts in different regions do not support device sharing.)
3. If you do not want to continue sharing, you can delete the shared account by long press in Android system, and by swiping left in Apple system.

NO.4.2 Device Control-Group Control

1. Click "Create Group" on the device editing page.
2. The page will show the devices with the same type that can be created into one group. After selecting the devices, click "Confirm", then enter the group name, and click "Save" to complete.
3. After the group is successfully created, it will automatically jump to the group control panel. You can now control these devices in a group.

NO.4.2 Device Control-Group Control

图1

图2

图3

4. The group will be shown in "All Devices" after being created, and you can easily control it through Home page;

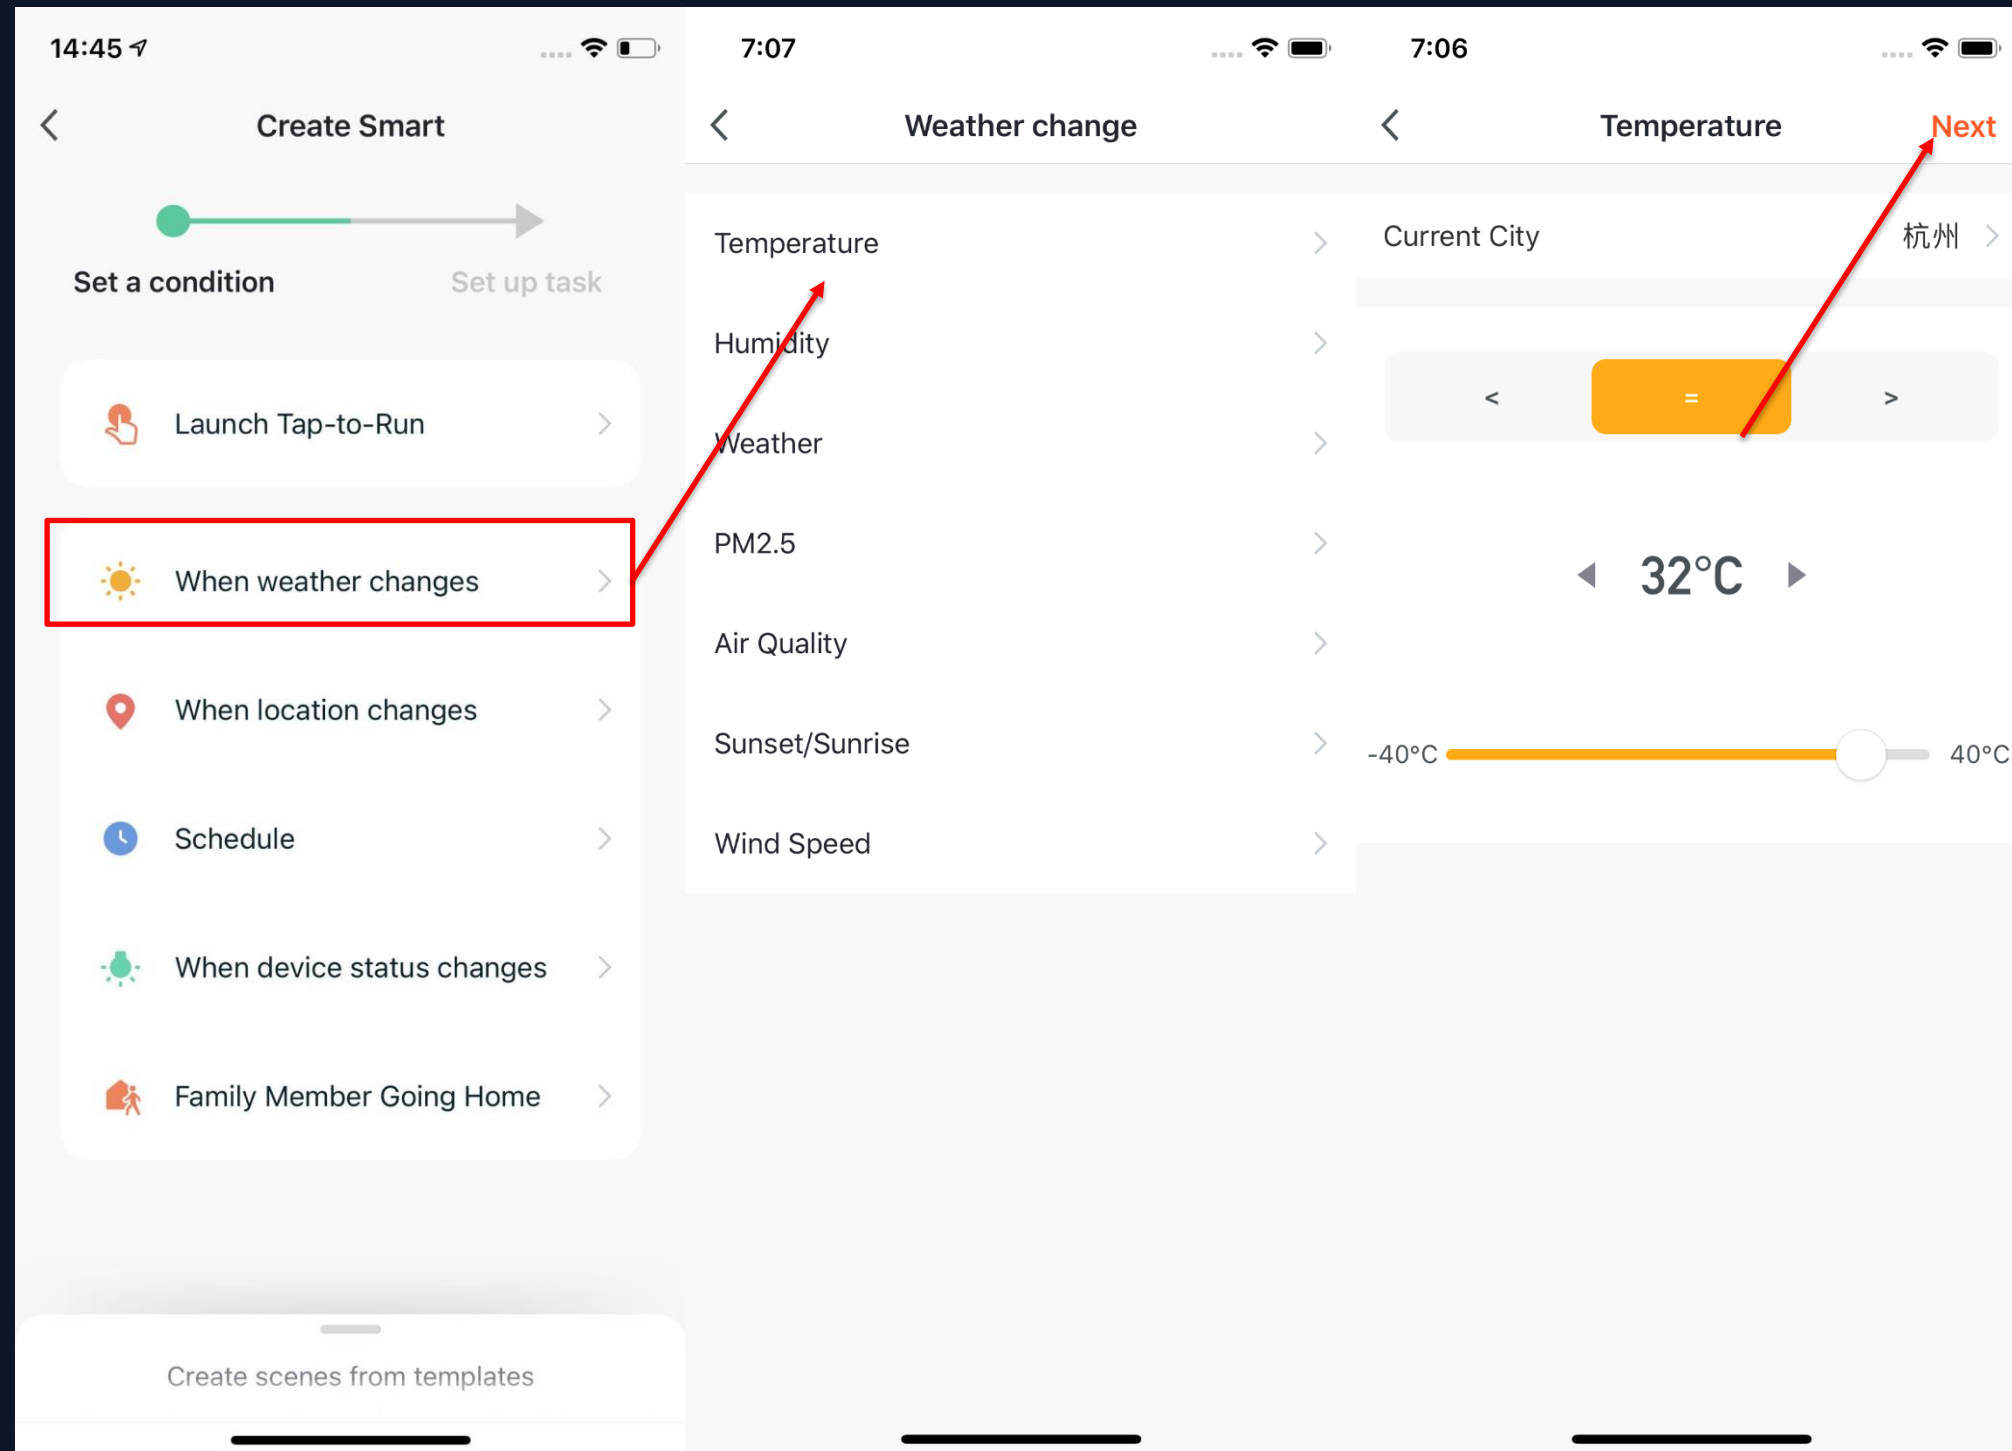

5. After entering the group control panel, you can click "✎" in the upper right corner to edit the group information, and to delete this group by clicking "Dismiss Group" .

NO.5 Smart-Automation

1. Under "Automation" in the "Smart" page, click "Add Automation" or "+" on the upper right corner to enter the "Smart Settings" page.
2. By clicking "Add Condition", you can add multiple conditions (you can not add other conditions with "Click to execute"), and multiple tasks (you can also select a "Tap-To-Run"). Then, you can edit the name of this automation and set a effective period for it.

NO.5 Smart-Automation

1. After adding "Automation", you will see a page called "Create Smart" that will guide you through the setting.
2. You need to set up conditions that will be used later to trigger the scenario. Here, we take "Weather change" setting as an example.
3. After you click "Weather change", you need to set up conditions in more specific terms. Here we choose "Temperature" as an example.
4. After you choose the temperature you want, click "Next" to save the setting and go to the next step.

NO.5 Smart-Automation

5. After the conditions are set, the app will turn to page for setting up tasks.

6. Here we choose "Execution Equipment" as an example, which means choosing an equipment for executing the tasks.

7. Here we choose the air conditioning as an example.

8. After choosing the device, you can set up multiple "functions" for it. For instance, we choose "Switch: On, Set Temp: 26°C, Mode: Cold, Wind: High", which means that when the conditions we set are met, these functions will be on. Then click "Next" to save and go to the next step.

NO.5 Smart-Automation

1. After adding "Automation" , you will see a page called "Create Smart" that will guide you through the setting.
2. You need to set up conditions that will be used later to trigger the scenario. Here, we take "Weather change" setting as an example.
3. After you click" Weather change" , you need to set up conditions in more specific terms. Here we choose "Sunset/Sunrise" as an example.
4. The execution conditions can be selected from sunrise or sunset, and the time period before and after sunrise or sunset can also be selected. After selecting the execution time and go to the next step.

NO.5 Smart-Automation

5. After the conditions are set, the app will turn to page for setting up tasks.

6. Here we choose "Execution Equipment" as an example, which means choosing an equipment for executing the tasks.

7. Here we choose the air conditioning as an example.

8. After choosing the device, you can set up multiple "functions" for it. For instance, we choose "Switch: On, Set Temp: 26°C, Mode: Cold, Wind: High", which means that when the conditions we set are met, these functions will be on. Then click "Next" to save and go to the next step.

NO.5 Smart-Automation

9. Set "Condition" and "Task" to save.

10. Click "+" on the upper right corner to add multiple conditions.

11. Select effective period at bottom of the page for your "Automation". Here, we choose "19:00 - 3:00" to avoid air conditioning being turned on during working hours when nobody is home.

NO.5 Smart-Automation

1. App will recommend some "Automation" and "Tap-to-Run" based on your devices, which you can use directly.
2. Click "Create from template" at bottom of the "Create Smart" page to get some recommended "Automations" .

1. Take "Leave or Arrive" as an example, you can set some certain actions to be triggered when you are leaving or arriving. (To use this function, you need to allow the App to access your location. The function is currently unavailable in Android version.)
2. Click "Leave or Arrive", and select your location, then click "Next" to finish setting. This setting will enable you to control your devices and to execute your tasks within 110-1023 meters from your location.

NO.5.1 Smart-Automation-Add Task

1. Click “Add Task” or “+” on the upper right corner to enter the “Select Task” page.

2. This “Task” can be a device switch under a certain condition or an automation execution.

3. The tasks include: “Launch Tap to Run” , “Enable or Disable Automation” , “Send notification” . “Time to left” and “Device” .

NO.5.1 Smart-Automation-Effective Period

1. You can select the effective period to the automation you set.
2. For example, if you want to set an automation, where the night light will turn on when the sensor detects any human action, you can select Night for Effective Period so that the automation will be off in the daytime.

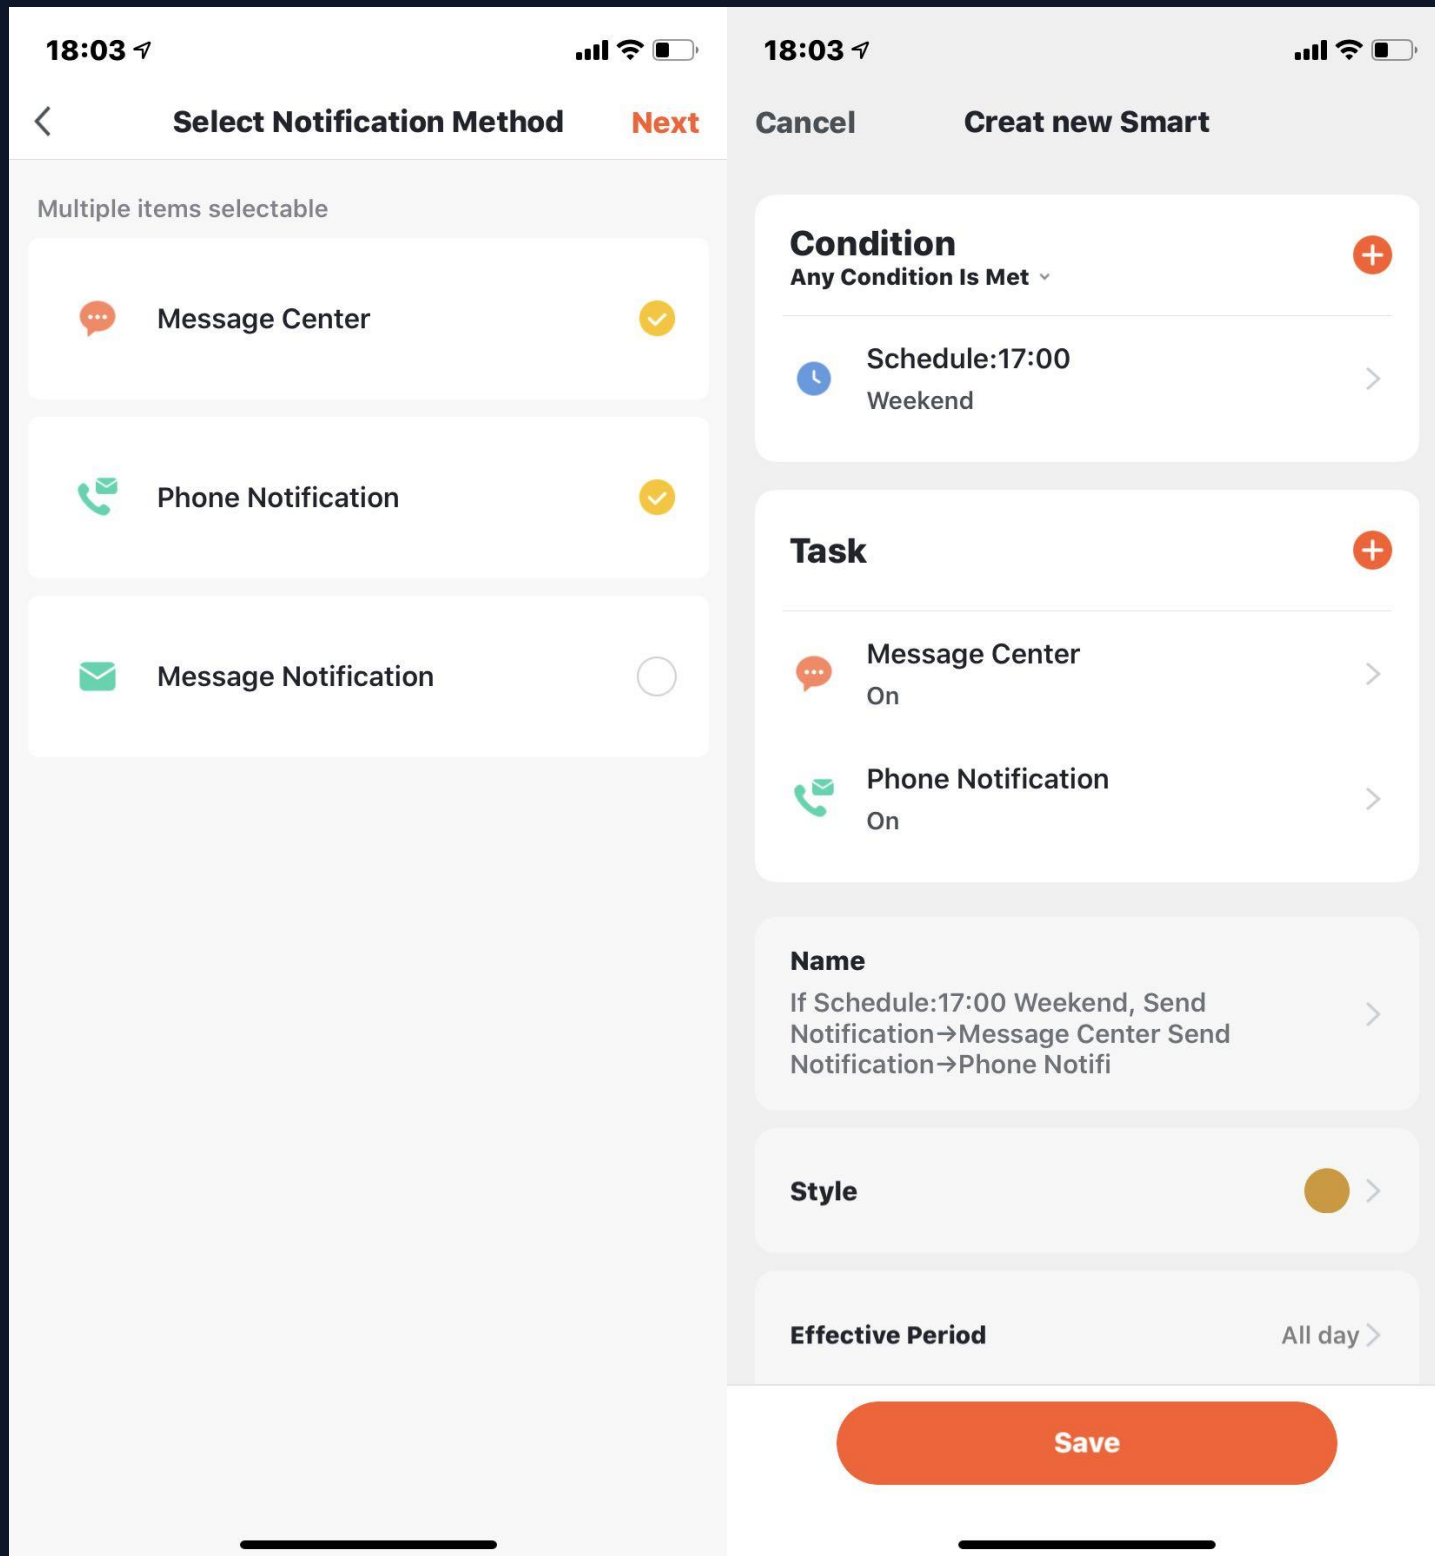

NO.5.1 Smart-Automation-Examples

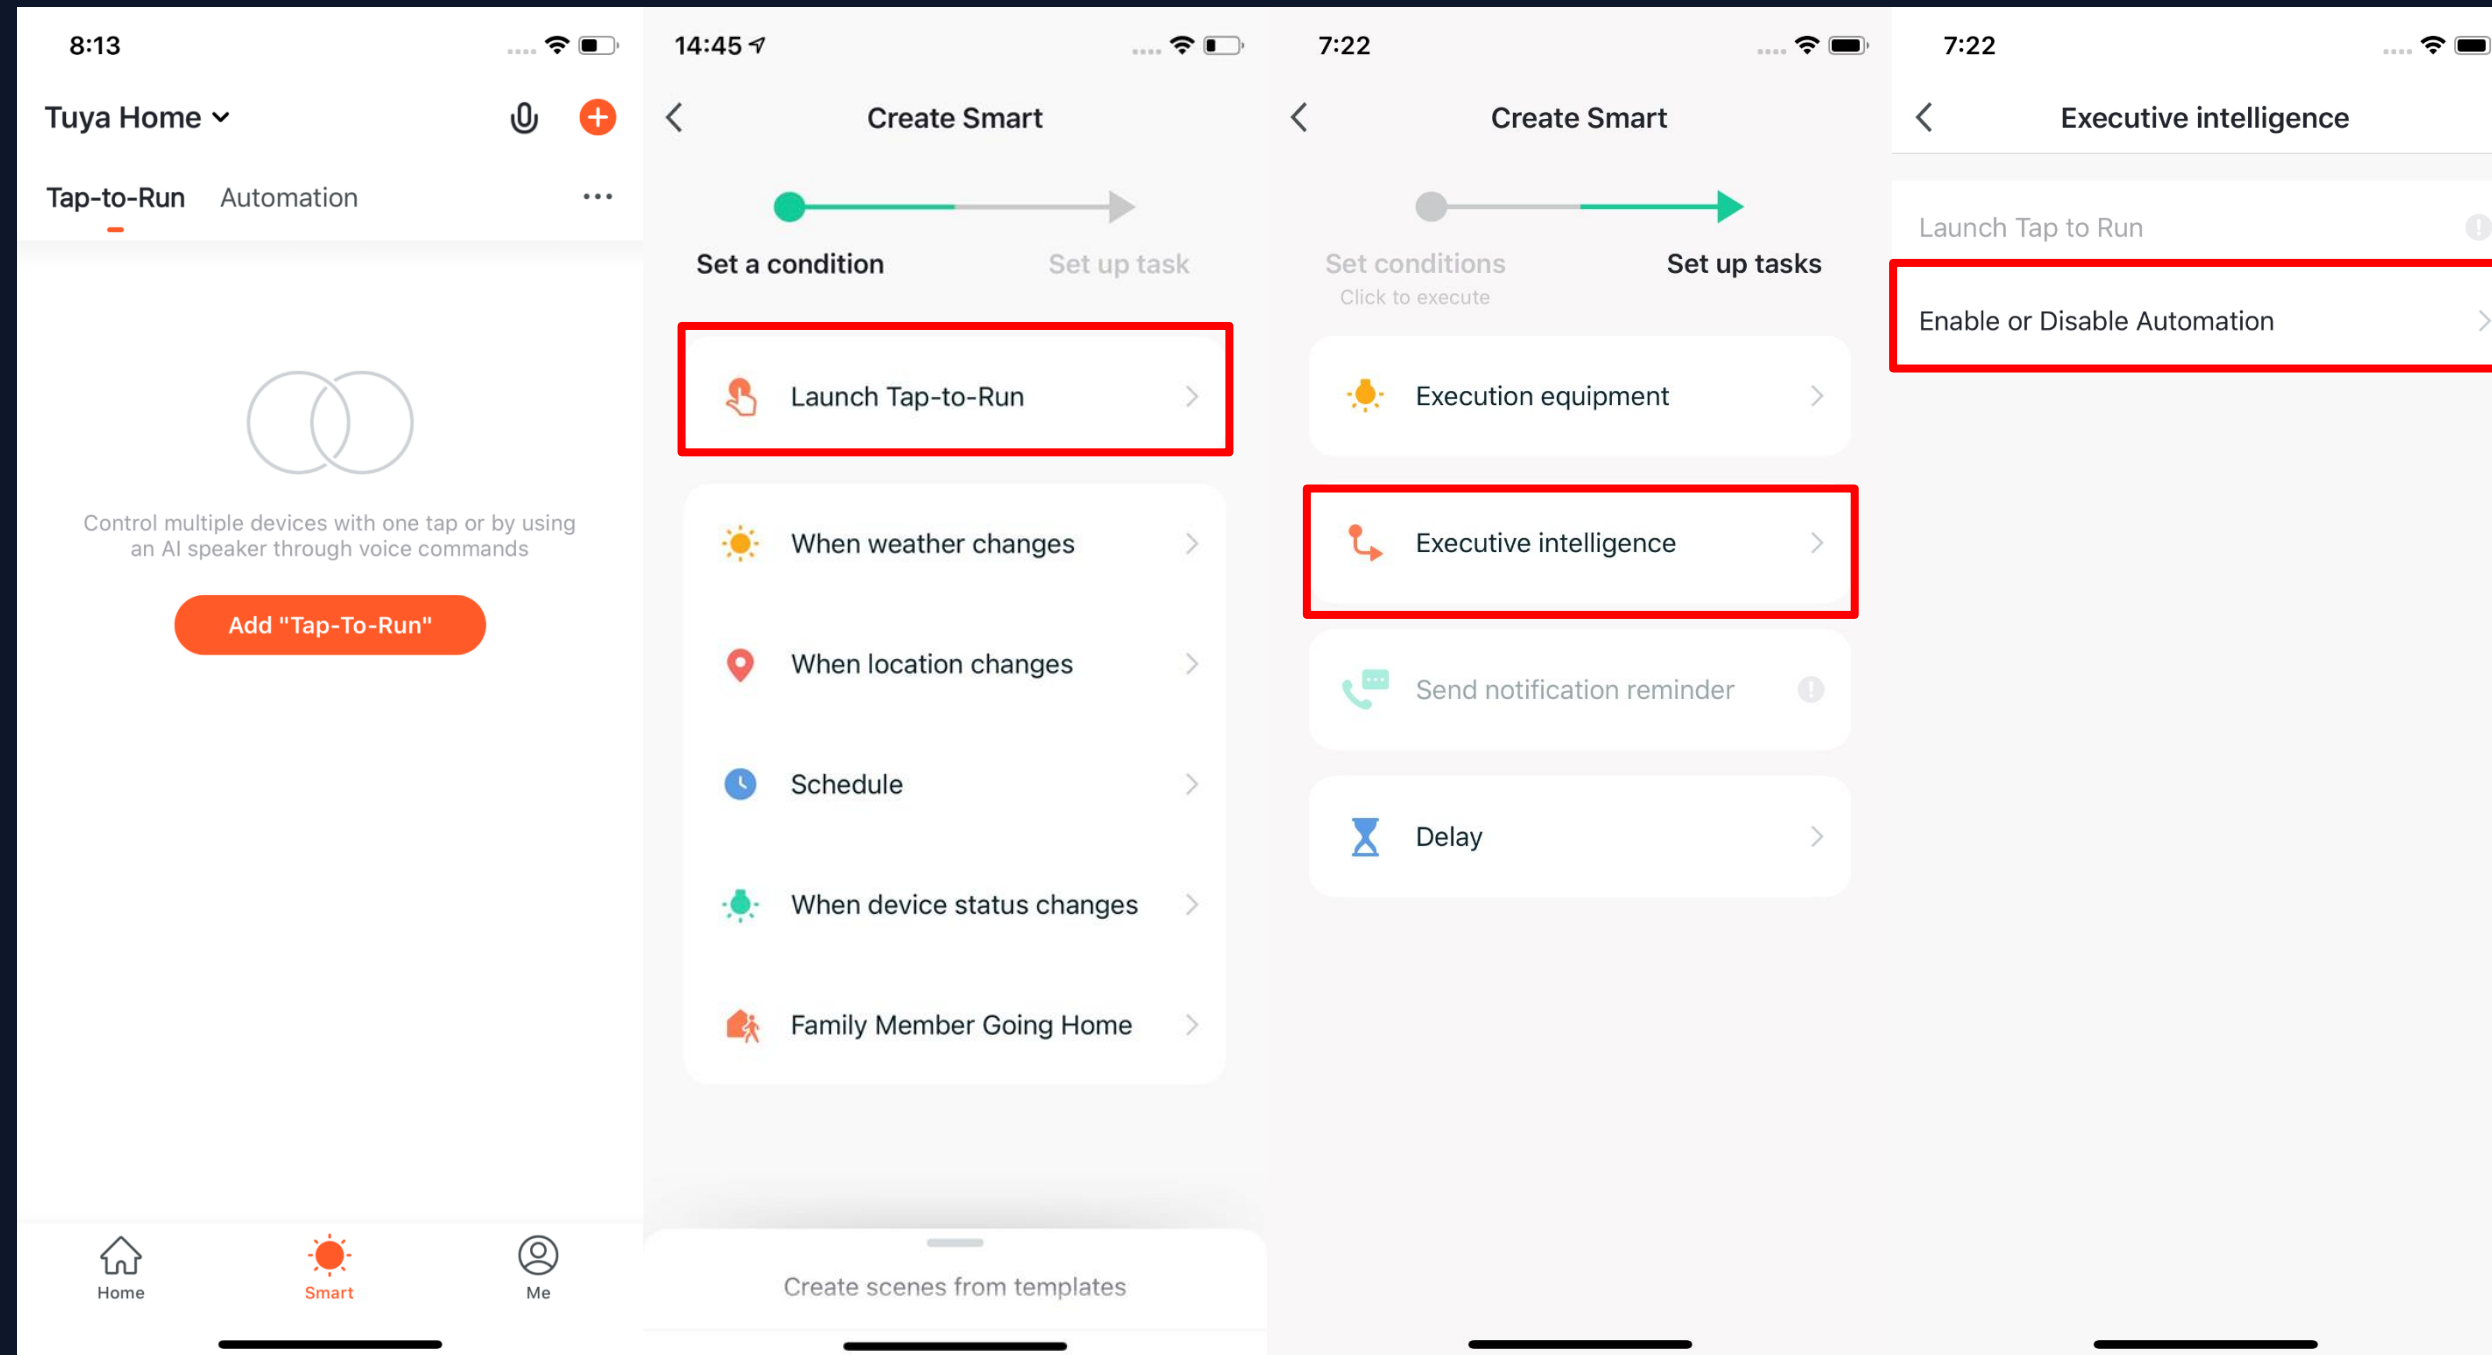

The completed automation setting of condition and task is shown in the image. There are mainly 4 types of automation can be achieved:

- 1、 **Linkage among devices:** you can set that aroma diffuser and air purifier to be turned on while air conditioning is on;
- 2、 **Linkage between environment and device:** you can set to automatically turn on the air conditioning while the temperature is over 29°C;
- 3、 **Timer:** to automatically open the curtain at 8am on every morning;
- 4、 **Location:** to trigger some actions when someone leaves or arrives somewhere. For example, to open the air conditioning and water heater when you are nearby your home.

NO.5.1 Smart-Automation-Push messages support multiple selection

1. Click "create a new account", the graffiti will pop up and click "smart - add - send notification reminder" to enter the "select reminder mode" page. This page feature supports multiple selections (at least 1, and at most 3). If the phone notification and SMS reminder are not purchased, you can only choose the message center.
2. After completing the configuration, return to the home page of automation, which can be combined according to the selected push mode.

1. Under "Tap-To-Run" in "Smart" page, click "Add Tap-To-Run" or "+" on the upper right corner to enter the setting page.
2. You must choose "Click to execute" as a condition.
3. You can not add "Tap-To-Run" or "Send Notification" as a task.

4. When choose "Enable or Disabele Automation" as a task, you need to pre-set an "Automation" scene.
5. After clicking "Enable or Disabele Automation", the existed automation will be shown on the screen. Select to choose "Enable" or "Disable" it and click "Next". Last, click "Save" and enter your scenario name to complete setting. ("Effective Period" is unavailable for "Tap-to-Run")

NO.5.2 Smart-Scene

“Automation” supports gateway for Tap to Run of local scenario

New ZigBee gateway supports “Automation” Tap to Run of local scenario, that is if all the tasks of an “Automation” and the device are under new ZigBee gateway, the “Automation” can be executed in offline mode. Even if your network is offline, the devices and tasks bound under new ZigBee gateway will still execute the automation that you have set before.

NO.5.2 Smart-Scene-Zigbee gateway linkage data backup and recovery

The App now supports the function of "Zigbee gateway linkage data backup and recovery". This means that even if the zigbee gateway in the user's home is removed, the previous linkage scene information will be automatically retained, and the linkage scene information will be restored after the device is reconfigured in the user's home (normal configuration, automatic discovery).

NO.5.3 Smart-Add/Edit/Delete
