# Product Configuration

Version: 20210602

Contents

Product configuration consists of six items, namely **Firmware Updates Center**, **Multilingual**, **Device Notification**, **Network Connection Settings**, **Quick Toggle Settings**, and **Scenario Connection Settings**. The configurations take effect instantly without changing any hardware. With Tuya's globally deployed Tuya Cloud, the end-users enjoy high-quality customer services.

The **Multilingual**, **Network Connection settings**, and **Scenario Connection Settings** require refined management based on your target market, network configuration, and product features.

Click the following links and learn more about the specific configuration procedure.

1. Firmware Updates Center

2. Multilingual

3. Device Notification

4. Network Connection settings

5. Quick Toggle Settings

6. Scenario Connection Settings
