### 1 Get started

### 1.1 Download Tuya Smart app

You can download the Tuya Smart app by searching for Tuya Smart in your app store or by scanning the following QR code.

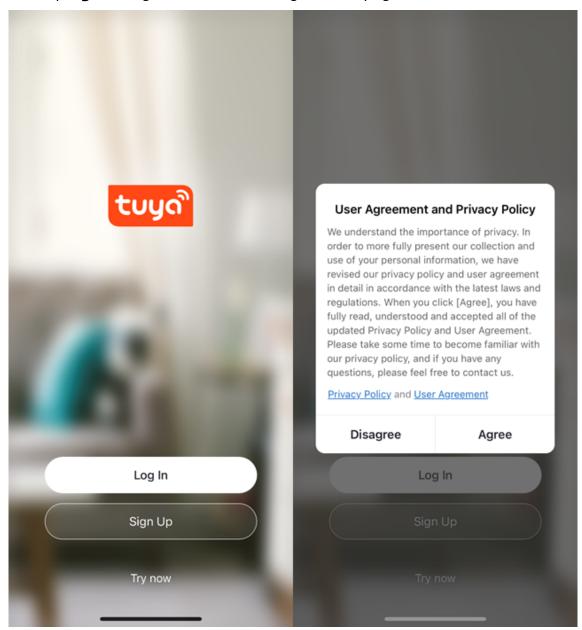

width=100%

#### 1.2 Registration, login, and password reset

1. Open the Tuya Smart app and tap **Sign Up**. In the **User Agreement and Privacy Policy** dialog box, carefully read the privacy policy and agreement and tap **Agree** to go to the account registration page.

 Enter your mobile phone number or email address and tap Get Verification Code. The country or region on the registration page is the same as that you set in the mobile phone. You can also manually change the country or region

before registration.

3. On the **Enter Verification Code** page, enter the verification code. On the **Set Password** page, set the password as per instructions and tap **Done**.

#### 1.3 Log in with your app account or a third-party account

- 1. Open the Tuya Smart app. If you have registered an account in the Tuya Smart app, tap **Log In**. In the **User Agreement and Privacy Policy** dialog box, carefully read the privacy policy and agreement and tap **Agree** to go to the login page.
- 2. Check the country or region on the login page. The system automatically identifies your current country or region. You can also manually select a country or region.
- 3. Enter your registered mobile phone number or email address, enter the password, and then tap Log In.

4. If you have installed WeChat or Tencent QQ on your mobile phone and have a WeChat or Tencent QQ account, tap the WeChat or Tencent QQ icon on the login page. On the authorization page that appears, allow authorized login for your WeChat or Tencent QQ account. If you use an iPhone, you can also log in with your Apple ID.

#### 1.4 Change account

- 1. After logging in to the app, tap **Me** on the page. On the **Me** page, tap the account section.
- 2. On the Account page, tap Account and Security.
- 3. On the Account and Security page, tap **Mobile Number** or **Email Address** to change your login account.
- 4. If you want to change the mobile phone number, after you tap **Mobile Number**, tap **Change Phone Number** on the page that appears.
- On the Change Phone Number page, enter your password and tap Next. On the Bind Mobile Number page, enter a new mobile phone number and click Get Verification Code. On the Enter Verification Code page, enter the verification code.

### 1.5 Reset password

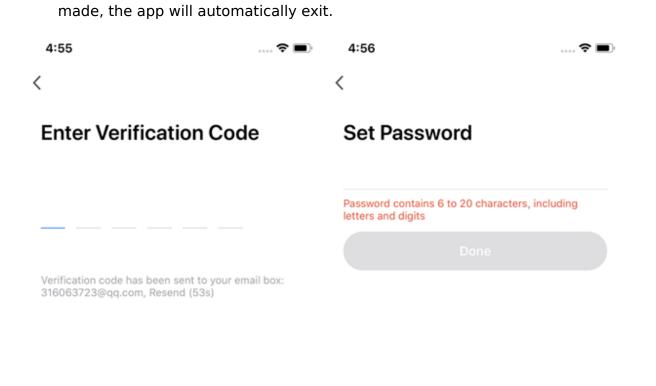

If you forget your login password, you can reset the password based on the following process:

- 1. On the Log In page, tap **Forgot** Password.
- 2. On the page that appears, check the country or region. The system automatically identifies the current country or region where you reside. You can also manually select a country or region. If your account is registered with a mobile phone number, the country or region must be the same as the one you selected during registration.
- 3. Enter your registered mobile phone number or email address and tap **Get Ver-***ification Code*.

#### **1.6 Enter experience mode**

1. Open the Tuya Smart app and tap Try now. A dialog box appears, indicating that cloud storage, third-party voice control, and device sharing are not supported in the experience mode.

2. Tap **Continue**. The Home page appears.

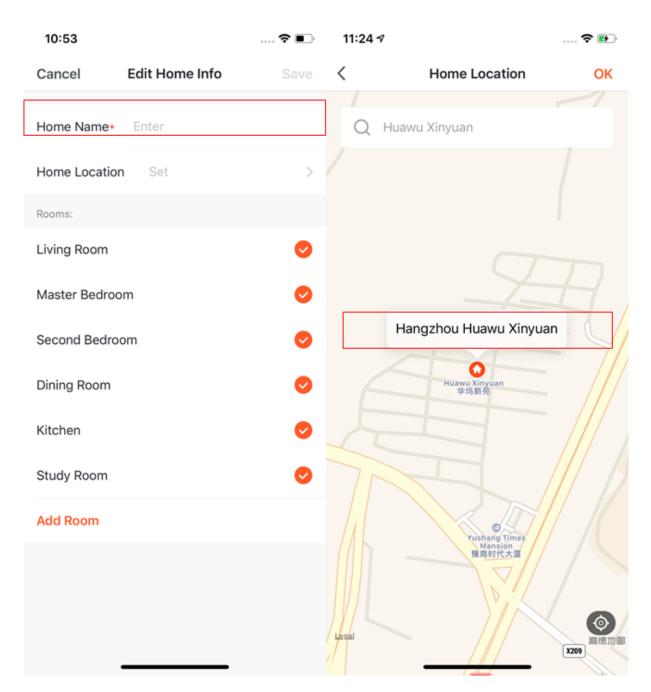

### 2 Use app

### 2.1 Manage home and home members

After you log in to the app as a new user, the **Home** page where devices are listed appears. Your profile photo is displayed in the top left corner. Before you complete your home information, the Home page does not display environment or room information.

- 1. Tap **Me** in the bottom right corner. On the Me page, tap **Home Management**.
- 2. If you are a new user, after you tap **Home Management**, verify that the Edit Home Info page appears.
- 3. If you have added a home, tap **Create** a home on the Home Management page to go to the Create a home page.
- 4. Enter a name for your home in the Home Name field. A maximum of 25 characters is allowed.
- 5. Tap **Home Location**. On the Home Location page, verify that the location is correct and tap **OK** in the top right corner. The home location is set based on your phone location. You can also change the home location by setting the home coordinate.

### tບງດື

- 6. Select rooms in the Rooms section. You can use the room names given in the app or tap **Add Room** to customize room names. A maximum of 25 characters is allowed for a room name.
- 7. After you complete the home information, go back to the Home page. On the Home page, the information, such as the weather, temperature, and room names, is displayed. If you have added more than one home, you can tap the

```

#### 2.2 Use voice assistant

- 1. On the Home page, tap the microphone icon in the top right corner to activate the voice assistant.
- 2. If you have trouble using the voice assistant, tap the question mark (?) in the bottom left corner and check for instructions.

- 3. Follow the instructions, tap and hold the microphone icon to deliver a voice command to the voice assistant.
- 4. To use the voice assistant in a more convenient manner, tap **Add to Home Screen** at the bottom of the page.

5. If you use an iPhone, tap **Add to Home Screen** in the dialog box that appears. Then follow the instructions to add the voice assistant shortcut to the home page. If your mobile phone runs the Android operating system, grant the shortcut adding permission to Tuya.

### 2.3 View environment information

- 1. After you complete the home information and location, you can view the weather and environment information on the Home page. You can also tap the weather and environment information section to view more details.
- 2. If you have bound environmental sensors, such as the air purifier, hygrometer, and thermometer, to the app, the app will display the environmental information provided by these devices.
- 3. On the detailed page, the family owner and administrator can drag and sort the display items.

# tບyດື

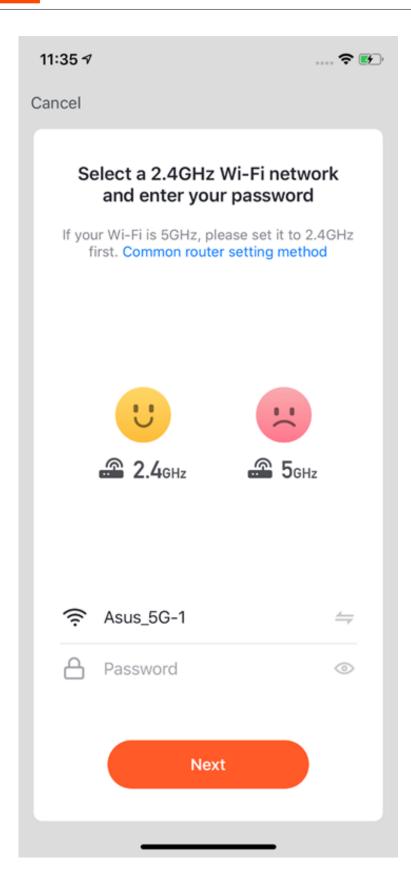

### 3 Add devices

Tap **Add Device** or the **plus (+)** icon in the top right corner on the Home page to go to the device adding page. You can manually add devices on the **Add Manually** tab or tap **Auto Scan** to enable the app to automatically detect devices. To add devices on the Auto Scan tab, you need to grant the app related Wi-Fi and Bluetooth permissions.

### 3.1 Manually add Wi-Fi devices

1. Select a device type. On the page that appears, enter the password for connecting to the 2.4 GHz Wi-Fi network. If you know how to perform pairing, select the correct device pairing mode based on the status of the indicator. If you are not sure how to perform pairing, tap **Perform net pairing as prompted** to view the guide. tບູດື

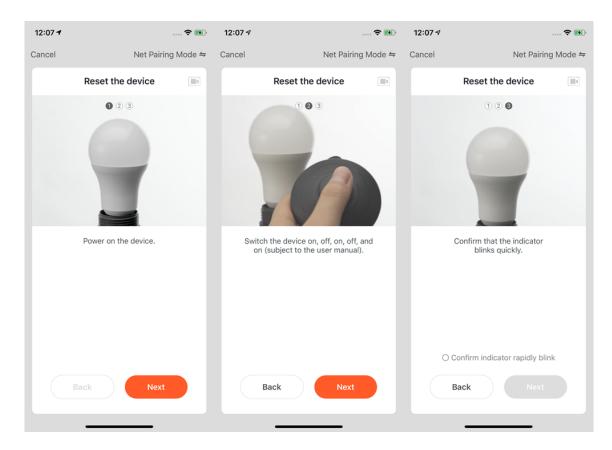

2. Two pairing modes are provided in the app. The EZ mode is the default mode, and the AP mode is the compatible mode. You can tap **Net Pairing Mode** in the top right corner to switch between the two modes. You can also tap the camera icon in the top right corner of the **Reset the device** dialog box to view the video tutorial.

### 3.2 Manually add Wi-Fi devices in EZ mode

1. In EZ mode, follow the instructions to enable the indicator to blink quickly.

- 2. Select **Confirm indicator rapidly blink** and tap **Next**. The following first two screenshots from the left show the pairing process. You can customize the names of added devices and specify the room where the devices are used. A device name can contain a maximum of 64 characters.
- 3. If pairing fails, follow the instructions in the following third screenshot from the left to resolve the issues.

### 3.3 Manually add Wi-Fi devices in AP mode

If you use a dual-band network that supports both 2.4 GHz and 5 GHz bands, you can use the AP mode to add devices.

 In AP mode, follow the instructions to enable the indicator to blink slowly, select Confirm indicator slowly blink, and tap Next.

2. In AP mode, you need to connect your mobile phone to the Wi-Fi hotspot that starts with SmartLife.

- 3. On the Wi-Fi setting page of your mobile phone, find the Wi-Fi hotspot starting with SmartLife and tap the Wi-Fi hotspot to connect your mobile phone to it.
- 4. After a successful connection, go back to the app to start pairing. The Wi-Fi hotspots of some devices might use a custom name. You must connect your mobile phone to a 2.4 GHz Wi-Fi network.

### 3.4 Manually add Wi-Fi+Bluetooth dual-mode devices

1. If you use a Wi-Fi+Bluetooth dual-mode product, power on the device first. Then, enable Bluetooth on your mobile phone and open the app. Bluetooth and Wi-Fi+Bluetooth dual-mode devices that are ready for pairing will be displayed.

2. Select the device to be added. On the Wi-Fi setting page, enter the password for connecting to the 2.4 GHz Wi-Fi network. Wait for the device to automatically complete pairing.

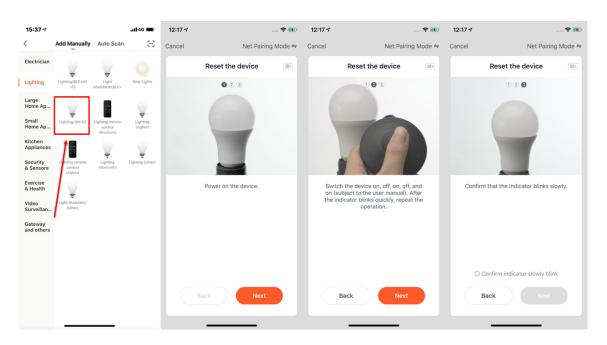

# ້ຽດທີ່

3. If you do not want to enable Bluetooth on your mobile phone, go to the Add Manually tab. Select a device type that supports Wi-Fi pairing. If you use the EZ Mode, follow the instructions in the screenshots to enable the indicator to blink quickly, select Confirm indicator rapidly blink, and tap Next.

### 3 ADD DEVICES

4. Wait for the device to complete pairing. After the device is added, you can customize the device name and specify the room where the device is used.

6. After the app detects the device, tap **Add**. After the device is added, tap **Done**.

If you use a dual-band network that supports both 2.4 GHz and 5 GHz bands, you can use the AP mode to add devices.

To add a device in AP mode, you need to follow the instructions to enable the indicator to blink slowly, select **Confirm indicator slowly blink**, and tap **Next**. Then follow the instructions on subsequent pages to add the device.

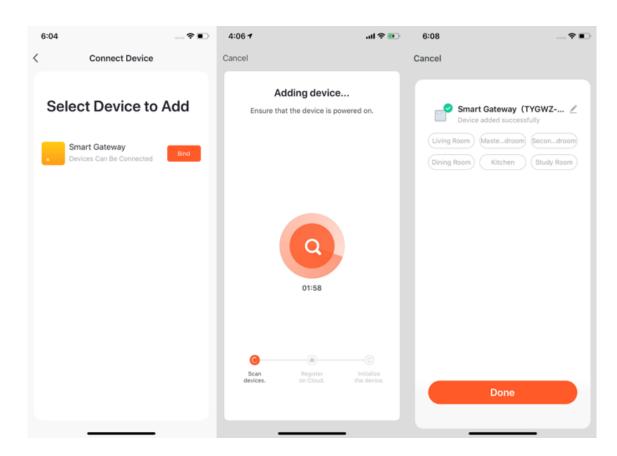

### 3.5 Manually add Zigbee devices

- You must add a gateway before adding Zigbee devices. To add a gateway, tap Add Device on the Home page. On the page that appears, tap Gateway Control in the left-side navigation pane and select a gateway.
- 2. Power on the gateway and use a network cable to connect it to a router.
- 3. Make sure that your mobile phone and the gateway are under the same LAN. The mobile phone must be connected to a 2.4 GHz Wi-Fi network.

4. After the gateway is added, you can add a Zigbee device that is connected to the gateway.

- 5. To add a Zigbee device that is connected to the gateway, go to the gateway page and tap **Add subdevice**. The remaining steps to add the Zigbee device are the same as adding Wi-Fi devices and Bluetooth devices.
- 6. The latest version of the app supports automatic discovery of nearby Zigbee devices, allowing you to add multiple devices to the gateway at once.

tuyດື

### 3 ADD DEVICES

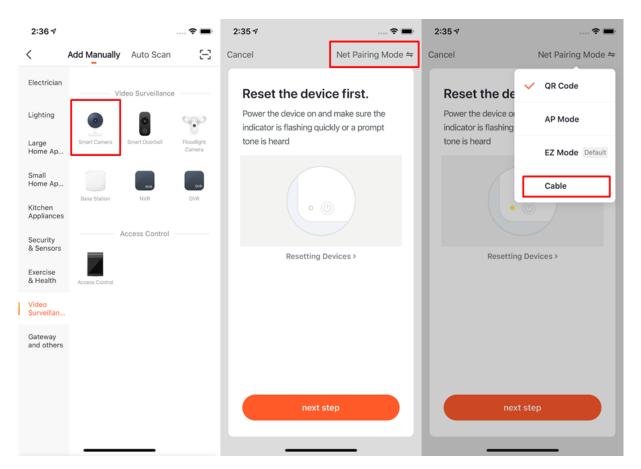

7. If your gateway is damaged or does not work properly, you can replace it with a new gateway, with all devices and scenes configured for the damaged gateway synchronized to the new gateway. To replace a damaged gateway, tap **Replace a damaged gateway** on the management page for the damaged gateway. On the page that appears, enter the **SN code** or **device ID** of the new gateway.

### 3.6 Manually add IP cameras (IPCs) in QR code pairing mode

In addition to the EZ mode (default) and the AP mode, some devices, such as IPCs and gateways, can also be manually added in Cable mode.

tບູດື

To add an IPC to the network by using a QR code, perform the following steps:

1. Reset the IPC. For information about how to reset the IPC, tap the **Perform net pairing as prompted** button on the page. When the camera is reset, it flashes quickly.

### 3 ADD DEVICES

3. If you use Auto Scan mode to add devices, you need to turn on Wi-Fi and Bluetooth for scanning devices. Wi-Fi devices can be found only when Wi-Fi is turned on. Nearby Bluetooth devices can be found only when Bluetooth is turned on.

## ້ຽດທີ່

#### 3 ADD DEVICES

- 4. The latest version of the app supports automatic discovery of nearby Bluetooth devices to improve user experience.
- 5. Once you enter the home management page, the app automatically searches for Bluetooth devices that are in pairing mode and shows found Bluetooth devices in the pop-up window.
- 6. You can choose **Do not add** or **Go to add** to determine whether to add these Bluetooth devices. Make sure that Bluetooth is turned on and the Bluetooth devices are in pairing mode during scanning.

7. When the indicators on Narrowband Internet of Things (NB-IoT), Wi-Fi, and Bluetooth devices are blinking quickly, you can add these devices by using the Auto Scan function. To use the Auto Scan function to add a device through Wi-Fi, you need to prepare a Wi-Fi network. Only 2.4 GHz Wi-Fi networks are supported for the Auto Scan function.

#### 3.8 Scan QR codes or enter device IDs to add NB-IoT products

You can add an NB-IoT product by scanning the device's QR code or entering the International Mobile Equipment Identity (IMEI) number on the device label. You need to grant the app access to the camera on your phone to scan the QR code.

### 3 ADD DEVICES

#### 3.9 Add devices by scanning QR codes

You can add the QR code-based pairing mode on the product management page of the Tuya IoT Platform. To pair the Tuya Smart app with a device that supports QR code-based pairing, you can use the Tuya Smart app to scan the QR code on the device or the outer packaging.

## tບງດື

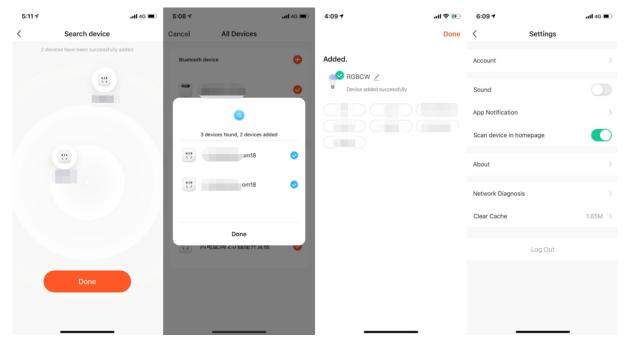

### 3 ADD DEVICES

#### 3.10 Add devices in Pegasus pairing mode

The Pegasus pairing mode is different from the EZ mode. When the Pegasus pairing mode is enabled, the app automatically scans for nearby devices that support Pegasus pairing and connect them to the network. Wi-Fi information is not required throughout the process, making pairing faster and more reliable.

#### 3.11 Grant autostart and battery usage permissions to the app

A **Notification Test** message appears when security devices are added to the Tuya Smart app on Android mobile phones. To ensure that you can receive notifications, tap **Test** and follow the tips to make sure the autostart and battery usage detection permissions are granted to the app.

3. When more than two smart cameras are added, you can tap the camera icon in the top corner of the Home page to view multiple camera videos.

#### 4 MANAGE DEVICE LIST AND ROOM LIST

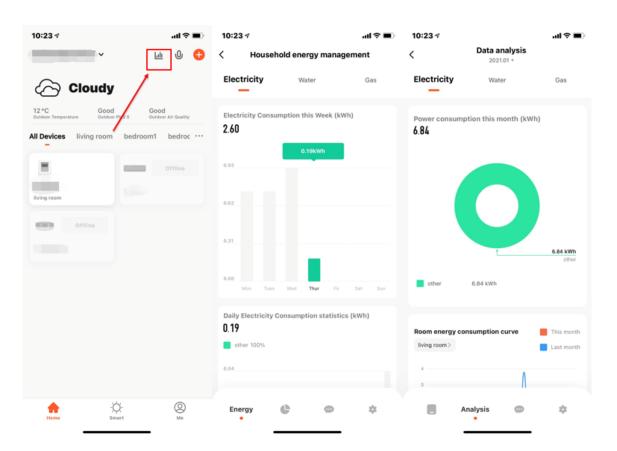

4. When at least one security gateway is added, you can tap the shield icon in the top corner of the Home page to use the security gateway function. Tuya Smart app V3.20.0 or later supports the basic arming and disarming functions.

#### 4 MANAGE DEVICE LIST AND ROOM LIST

5. When you add at least one device that can meter energy consumption, you can tap the chart icon in the top corner of the Home page to view devices' energy usage information.

### 4 MANAGE DEVICE LIST AND ROOM LIST

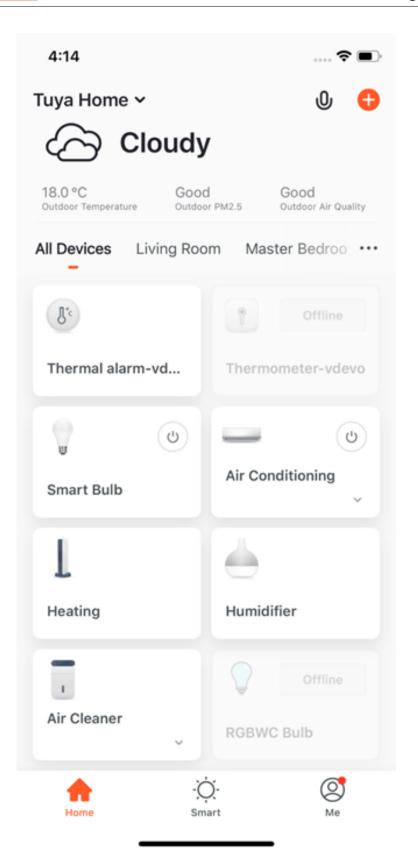

## **5** Control devices

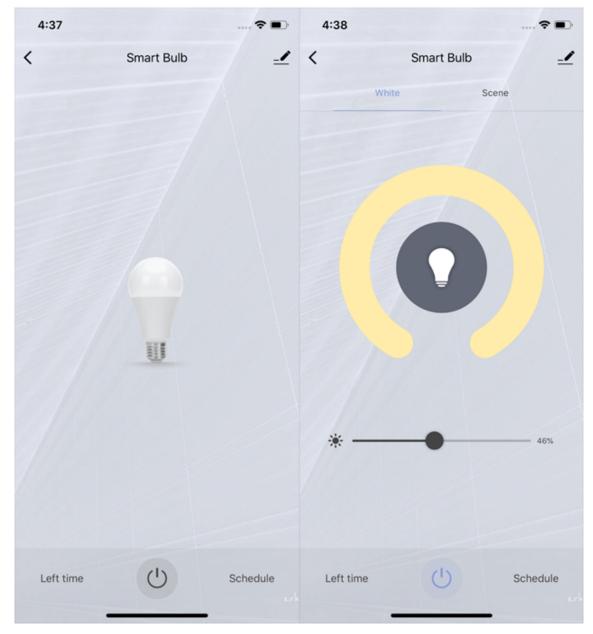

### 5.1 Use control panels

- 1. When a smart device is added, a device tile that contains the device icon appears in the device section on the Home page. You can tap the module to enter the control panel of the smart device. The control panel might vary from device to device.
- 2. When the device is offline, the Offline status is shown in the device tile. In this case, you cannot control the device on the control panel.

## tບyລື

3. Functions available on the control panel also depend on the device status. For example, only the countdown and schedule functions are available when a light is turned off, whereas scene setting, color adjustment, and brightness adjustment are also available when the light is turned on. You can tap the edit icon in the top right corner of the control panel to manage the device.

### 5.2 Manage devices

On the device management page, you can manage the device settings and information.

- 1. To change the device icon, device name, and location information, tap the edit icon next to the device icon.
- 2. To view the device ID, IP address, MAC address, time zone, and online/offline status, tap Device Information.
- 3. To enable or disable the automation function or modify the automation settings, tap Tap-to-Run and Automation.
- 4. To share the device with a home member, tap **Share Device**. On the page that appears, enter the email address or mobile phone number that is bound with the Tuya Smart app account of a home member.
- 5. To create a device group for easy group control, tap **Create Group**. On the page that appears, all devices that have the same model as the current device under the current account are displayed. The devices to be added to the group must have the same firmware version.
- 6. To view FAQs related to the device or send feedback, tap **FAQ & Feedback**.
- 7. To add a shortcut of the device control panel to the home page of your mobile phone, tap **Add to Home Screen**. You can directly enter the control panel of the device by tapping the device shortcut on the home page of your mobile phone.
- 8. To check the device connection status, tap **Check Device Network**.
- 9. To check whether any firmware updates are available, tap **Device Update**.
- 10. To remove the device, tap **Remove Device**. Two options appear: Disconnect and Disconnect and wipe data. If you tap **Disconnect**, the device is removed from the device list and automation scenes and tap-to-run scenes that are related to the device become unavailable.

If you tap **Disconnect and wipe data**, the device is removed from the device list and all data related to the device is erased.

```

#### 5.4 Network Switching function

- 1. Tap **Device Network** on the device management page. On the Device Network Information page, tap **Alternate Network**.
- 2. Select the alternate network you want to use, enter the Wi-Fi password, and tap **Confirm**. If the current network is unavailable, the device will be automatically connected to the alternate network. **Note** : This function is available only for Wi-Fi-compatible devices. You must upgrade the firmware to the latest version to find the option on the device management page. The firmware is being developed and will be supported in the near future.

```

# 6.4 Select leave/arrive condition

- 1. On the Select Condition page, tap **Leave or Arrive (beta)**. A Leave or Arrive condition triggers specified actions when you arrive at or leave a place. To set a Leave or Arrive condition, you must authorize the app to always use your geographic location. Currently, this feature is not available on Android mobile phones.
- 2. Set a location and tap **Next**. This function allows you to control your device to run the preset task within 110m to 1023m of your location.

tບູດື່

## 6 AUTOMATION AND TAP-TO-RUN

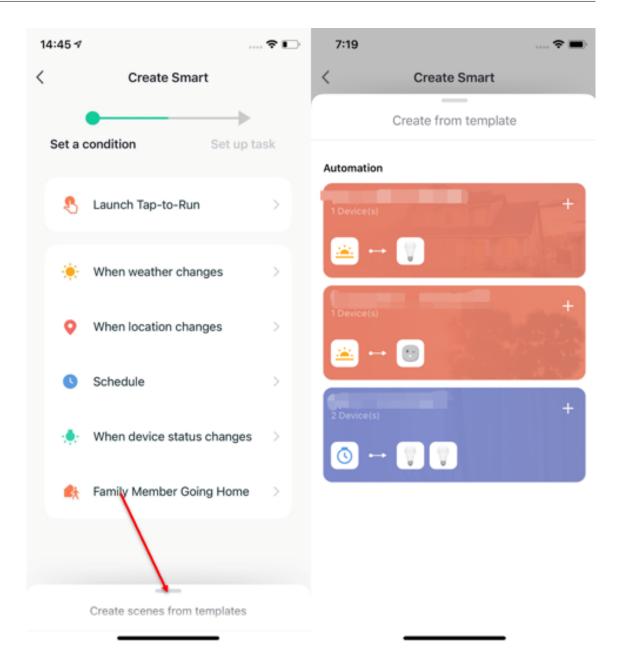

#### 6.5 Create scenes from templates

- 1. The app provides some recommended out-of-box automation and tap-to-run scenes based on the devices you add. These recommended scenes make it easy for you to control your devices.
- To create a scene by using available templates, tap Create scenes from templates on the Create Smart page. Select recommended automation scene settings.

# ້ຽດທີ່

## 6 AUTOMATION AND TAP-TO-RUN

#### 6.6 Add tasks

- 1. To add a task, tap **Add Task** or the plus (+) icon behind Task on the Smart Settings page.
- 2. On the Select Task page, you can select one of the following task types: Launch Tap-to-Run, Enable or Disable Automation, Send Notification, Time to left, and Device.

3. For example, you can set a device on/off control task or a scene-based automation task.

# 6.7 Set effective period

- 1. You can set a period of time during which the automation scenes you have created are effective.
- 2. For example, if you define a scene where the nightlight is automatically turned

#### 6 AUTOMATION AND TAP-TO-RUN

on when the human motion sensor detects the presence of humans, you can select night as the effective period. In this case, the nightlight will not be automatically turned on in the daytime.

Effective Period	All-day >	Cancel OK

#### 6.8 Create automation scene

You can create an automation scene to implement automated device control. The following figure shows an example automation scene with conditions and actions set.

The app supports four automation types:

- 1. Linkage among devices: For example, when the air conditioner is turned on, the diffuser and air purifier are automatically turned on.
- 2. Linkage between external environmental conditions and devices: For example, when the ambient temperature is higher than 29°C, the air conditioner is automatically turned on.
- 3. Scheduled actions: For example, the curtains are opened automatically at 8:00 o'clock every morning.
- 4. Geofencing: Specific actions are triggered when you arrive at or leave a place. For example, the air conditioner and water heater are automatically turned on when you arrive home.

## 6.9 Select notification methods

To select notification methods, perform the following steps:

- 1. On the Smart page, tap the plus (+) icon in the top right corner.
- 2. In the Set a condition step, set a trigger condition.
- 3. In the Set up task step, tap **Send notification**. The Select Notification Method page appears.
- 4. On the Select Notification Method page, select one or more available notification methods: Message Center, Phone Notification, and Message Notification. If you have not activated the Phone Notification and Message Notification services, you can only select Message Center.

Selected notification methods and trigger conditions are displayed together on the Automation tab.

# tບງດື

#### 6.10 Tap-to-Run

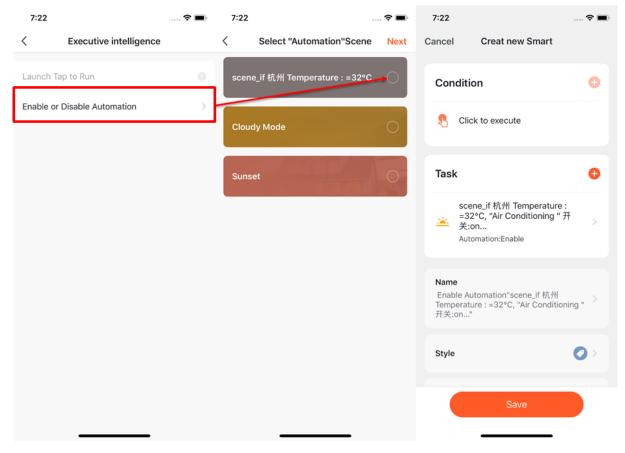

- 1. On the Tap-to-Run tab, tap **Add "Tap-to-Run"** or the plus (+) icon in the top right corner to enter the Create Smart wizard.
- 2. In the Set a condition step, tap Launch Tap-to-Run.

```
1 If you select **Launch Tap-to-Run**, you cannot select **Launch
Tap
2 to Run** on the **Executive intelligence** page and Send
notificatio
3 n reminder in the Set up task step.

shanghai.
5 myqcloud.com/goat/20200922/9214226bdcfa44249a39c8aa81eafb19.png)
```

Preset automation is required if you select **Enable or Disable Automation** as the task when you set the scene.

If you tap **Enable or Disable Automation**, a list of available automation scenes appears. You can enable or disable a scene by tapping it. Tap **Next**, enter the scene name, and tap **Save**. The Effective Period function is not available for tap-to-run scenes.Click for more introduction

#### 6.11 Local gateway support for tap-to-run scenes

The new version of the Zigbee gateway supports locally running automation scenes. If all tasks and devices involved in an automation scene use the new Zigbee gateway, the tasks and devices can be run based on scene settings, even if the network connection fails.

# 6.12 Zigbee gateway linkage data backup and recovery

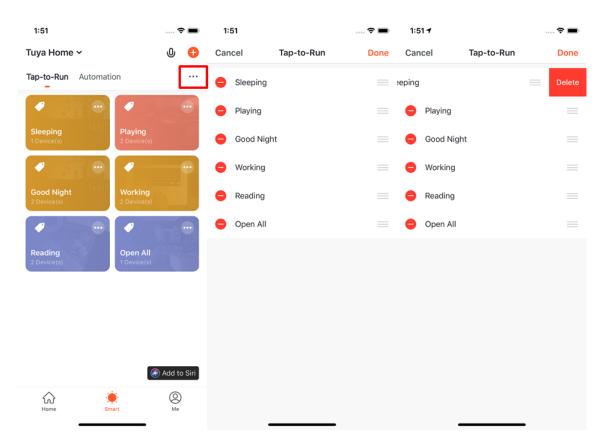

The Tuya Smart app supports Zigbee gateway linkage data backup and recovery. This means that even if the Zigbee gateway is removed, the information about the previous linkage scenes is automatically reserved. When the devices are reconnected to the network by normal pairing or automatic pairing, the linkage information is recovered.

# 6.13 Add, modify, and delete scenes

- 1. On the Smart page, tap the more (...) icon in the top right corner and tap Manage to edit and sort the tap-to-run or automation scenes. Created tapto-run and automation scenes are displayed on the Tap-to-Run tab and the Automation tab respectively.
- 2. On the page that appears, sort tap-to-run or automation scenes. To delete a tap-to-run or automation scene, swipe the scene to left and tap **Delete**. On the Tuya Smart app for iOS, tap the minus (–) icon next to a scene name to delete a scene.

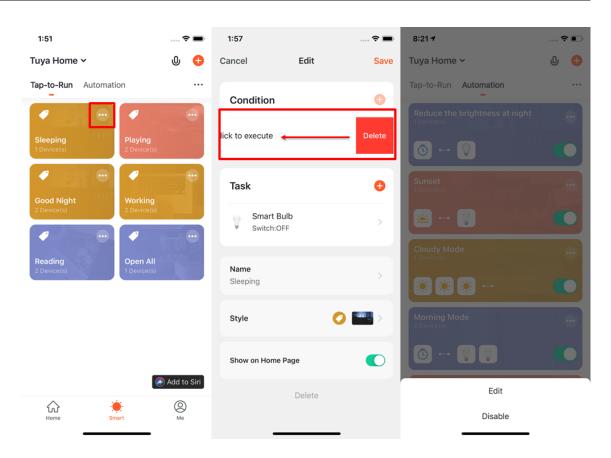

#### 6 AUTOMATION AND TAP-TO-RUN

- 3. On the Tap-to-Run or Automation tab, tap the more (...) icon in the top right corner of an existing scene module to enter the Edit page.
- 4. Tap and hold a condition or task and then swipe left to delete a condition or task.
- 5. Tap the plus (+) icon behind Condition or Task to add a condition or task.
- 6. To delete the scene, Tap **Delete** at the bottom of the Edit page.
- 7. Tap an automation scene module to edit or delete the scene in the pop-up window.

# tບູດື

# 6 AUTOMATION AND TAP-TO-RUN

#### 6.14 Add tap-to-run scenes to Siri

- 1. On the Smart page, tap **Add to Siri** in the lower right corner. The Siri Shortcut page appears, displaying all supported tap-to-run scenes.
- 2. Select a tap-to-run scene that you want Siri to trigger.
- 3. On the settings page for the tap-to-run scene, specify trigger words and tap **Add to Siri**. When you say the trigger words to Siri, Siri tells the Tuya Smart app to trigger a tap-to-run scene. Note: The Add to Siri function is supported only on iOS 12.0 or later.

tບງດື

#### 6.15 View scene logs

- 1. On the Smart page, choose ... > Logs in the top right corner. The Logs page appears, displaying the scene-related logs in the recent seven days in reverse time order.
- 2. Tap a log to go to the Edit page, where you can modify the scene settings.

Logs help you monitor the status of your devices. If a device fails to function based on the scene automation settings, an alarm message is sent to the notification center and the failure log is stored.

You can view the failure log to check devices that fail to be automated based on the scene settings.

## 6.16 Run scene tasks in a LAN

When devices involved in scenes are connected to a LAN but not the internet and the scene conditions are met, automation tasks in the scenes are run in the specified sequence to control the involved devices in the LAN.

# 7 Home

On the Home page, you can perform the following operations:

- 1. Tap the microphone icon to use voice commands to control devices.
- 2. Tap the home name in the top left corner to switch between homes or add a home.
- 3. Tap the weather and environment information section to go to the detailed weather and environment information page, where you can sort the weather and environment indicators. The Home page only displays the first three weather and environment indicators.
- 4. Tap the plus (+) icon to add devices.
- 5. Tap a tap-to-run scene to trigger a scene.
- 6. Tap a room name to view the status of smart devices in the room.

# 8 Me

The following sections and icon are displayed on the Me page:

- 1. Third-Party Integration: The Tuya Smart app supports seven third-party voice assistants.
- 2. Home Management: You can tap Home Management to manage your homes and home members.
- 3. Message Center: Three types of messages are displayed in Message Center: Alarm, Home, and Bulletin. You can specify a do-not-disturb period for these messages.
- 4. FAQ & Feedback: After you tap **FAQ & Feedback**, the FAQs & Feedback page appears. On this page, you can tap **My feedback** in the top right corner to view your feedback records, view FAQs and FAQ categories, report your issues, and enter keywords to search for FAQs.
- 5. Featured: The featured services include Cloud Storage for Cameras, Phone Notification, and Message Notification.
- 6. HomeKit Information: Your HomeKit-compatible devices can also be controlled by using the Tuya Smart app.
- 7. Watch: You can tap Watch to check available devices and tap-to-run scenes. The Watch section appears in the Tuya Smart app only when your Apple Watch is bound to your iPhone.
- 8. Settings icon: You can tap this icon to go to the Settings page. The Settings page displays the following sections and buttons: Sound, App Notification, About, Network Diagnosis, Upload Log, Clear Cache, and Log Out. The Upload Log section is displayed only in the Tuya Smart app for iOS.

## 8.2 Message center

Three types of messages are displayed in Message Center: Alarm, Home, and Bulletin:

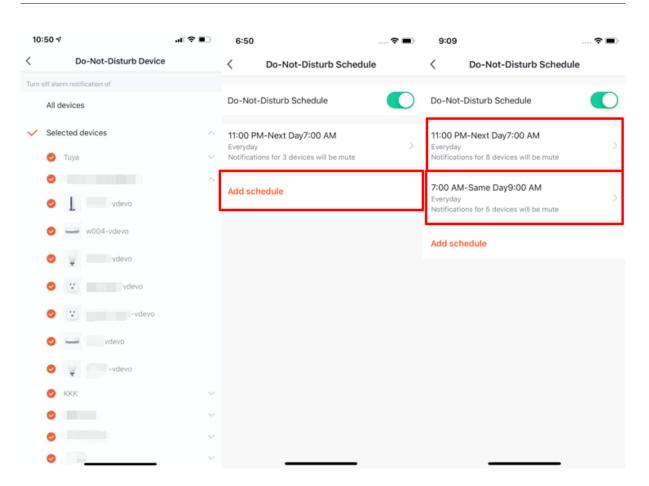

- 1. Alarms include device alarms, automation-related notifications, and alarms of scheduled execution failures.
- 2. Home-related messages include messages about adding or removing home members, removing a home, setting a home member as the administrator, adding devices, and sharing devices.
- 3. Bulletins include messages about status updates of user feedback and other push notifications from Tuya Smart.

```

shanghai.
2 myqcloud.com/goat/20210121/f4557f8dc8ac4638b0f41b70f0041bd1.png)
```

You can enable the do-not-disturb function for a specified period by performing the following steps:

- Tap Do-Not-Disturb Schedule on the Notification Settings page to go to the Add schedule page. If you enable this function for the first time, tap Do-Not-Disturb Device and select the devices for which you want to disable the notification function.
- 5. Tap the < icon in the top left corner to go back to the Add schedule page. On the Add Schedule page, set the repetition mode, specify a period of time, and tap **Save** in the top right corner. Then, the Do-Not-Disturb Schedule page appears. Enable the Do-Not-Disturb Schedule on this page.
- 6. To add another do-not-disturb schedule, tap Add schedule on the Do-Not-Disturb Schedule page. Set the repetition mode, specify desired devices and a period of time, and tap Save in the top right corner.

# tບງດື

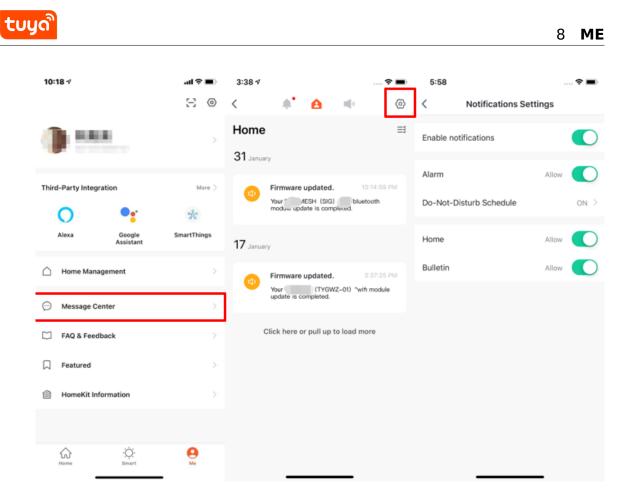

#### 8.3 Notification settings

You can use one of the following two methods to go to the Notification Settings page:

1. On the Me page, tap the settings icon in the top right corner. On the Settings page, tap **App Notification**.

#### 8.5 Featured

To use the featured services, go to the Me page and tap Featured. The following three value-added services are available on the Featured page:

1. Cloud Storage for Cameras: After you subscribe to and activate the service, video recordings are encrypted and uploaded to the cloud server. You can view uploaded video footage in the Tuya Smart app at any time. To use this service,

you must add one or more smart cameras to the Tuya Smart app. Previously uploaded videos cannot be downloaded.

- 2. Message Notification: After you activate the service and an event notification condition is triggered, an SMS message is sent to notify you of the event, which helps keep you and your family safe. SMS messages can be sent only to the phone number that is used to register your Tuya account. If you used an email address for account registration, you must add a phone number to receive SMS messages.
- 3. Phone Notification: After you activate the service and an event notification condition is triggered, you receive a phone call that notifies you of the event, which helps keep you and your family safe. Phone calls can be made only to the phone number that is used to register your Tuya account. If you used an email address for account registration, you must add a phone number to receive phone calls.

# 8.6 HomeKit information

- 1. Not all Tuya devices support Apple HomeKit. Devices that support Apple Home-Kit carry the HomeKit badge on their packages.
- 2. This function enables you to add devices that support Apple HomeKit to the Tuya Smart app. This way, these devices can be controlled together with other

devices added in the Tuya Smart app based on scene linkages.

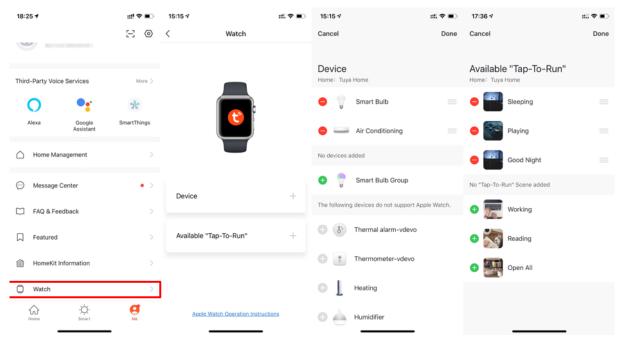

- 3. After you add HomeKit-compatible devices in the Tuya Smart app, these devices can be added again in the Home app for iOS.
- 4. After you remove HomeKit-compatible devices from the Tuya Smart app, these devices are not removed from the Home app for iOS.
- 5. The only way to remove a device that is added to the Tuya Smart app and the Home app is to press the reset button on the device.
- 6. If you add a HomeKit-compatible device to the Home app for iOS first, the device cannot be detected by the Tuya Smart app for Android and cannot complete pairing.

# 8.7 Watch

On the Me page, tap **Watch** to go to the Watch page. After you tap **Device**, the page displays all smart devices added to the app. A plus (+) icon before a device means that the device can be controlled with Apple Watch and is to be added to the device list. Devices that cannot be controlled with Apple Watch are displayed in

the **The following devices do not support Apple Watch** section. After you tap **Available "Tap-To-Run"**, the page displays all available tap-to-run scenes. You can tap the plus (+) icon before a tap-to-run scene to add the scene to the available tap-to-run scene list. All messages in the message center of the app will also be pushed to Apple Watch.

#### 8.8 About

For more information about the Tuya Smart app, tap the settings icon in the top right corner of the Me page. Then, tap **About** on the Settings page.

- 1. To rate the app in the app store, tap **Rate Us**.
- 2. To learn more about Tuya, tap **About TuyaSmart** to visit the Tuya official website.
- 3. To learn about the privacy policies of Tuya, tap **Privacy Policy**.
- 4. To learn about the user agreement, tap **User Agreement**.
- 5. To check the licenses of open source components, tap **Open Source Component License**.
- 6. To check the current version of the app, view version No. in the **Current Version** section.

#### 8.10 Delete account

To delete your account, perform the following steps:

- 1. Tap your profile photo on the Me page. On the Account page, tap **Account and Security**.
- On the Account and Security page, tap **Delete Account**. On the confirmation page that appears, tap **Confirm**. On the page that appears, tap **Get Verification Code** to obtain a verification code. Enter the verification code that you receive. On the page that appears, tap **Delete**.

Note:

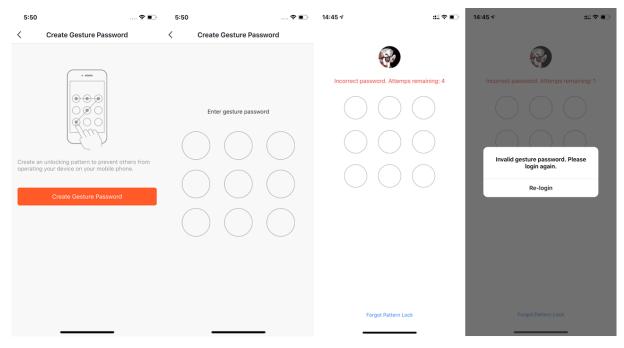

- 1. Your account will be deleted after seven days, and any data related to your account is also deleted.
- 2. If you log in to the app with your account within seven days after you complete the preceding steps, account deletion is terminated.

## 8.11 Pattern lock

To use the Pattern Lock function, tap **Pattern Lock** on the Account and Security page and create a gesture password. After you enable the Pattern Lock function, you must use the gesture password to open the app.

If you forget your gesture password, you can tap **Forgot Pattern Lock** at the bottom of the unlocking page. In the dialog box that appears, tap **Re-login** to go to the login page. Log in to the app again and create a gesture password again.
