Add Manually -wifi device - default mode NO.3.2.1

- proceed to the next step
- to view the instructions

1. The app supports two configurations: Default mode and AP mode. Click "AP Mode" at the top right corner of the "Default mode" page to switch between modes

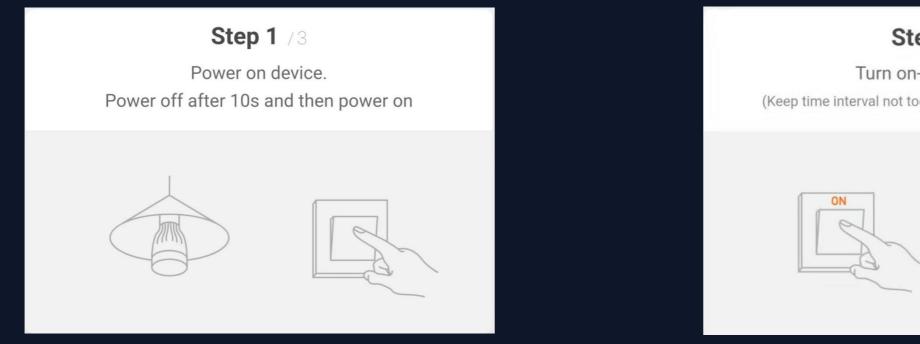

2. To select "Default mode", please make sure the indicator light on the smart device is flashing rapidly (blinking twice per second) and then click the button to

3. If the indicator light is not flashing rapidly, click "Help"

NO.3.2.1 Add Manually -wifi device - default mode

Notes: How to set indicator light to rapid flashing:

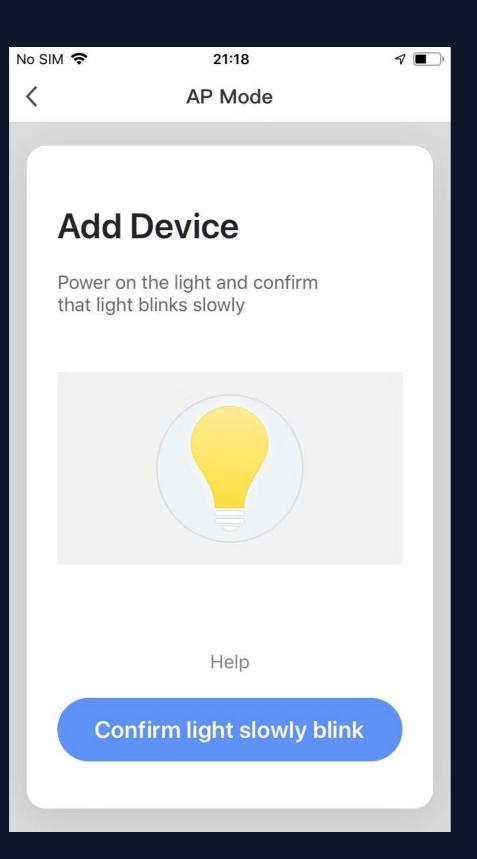

Step 2 /3

Turn on-off-on-off-on

(Keep time interval not too short, turn off after light is on)

Add Manually -wifi device - AP Mode NO.3.2.1

- sure the indicator light on the smart device is flashing slowly and then click the button to proceed to the next step.
- slowly, click "Help" to view the instructions.

1. To select "AP Mode", please make (blinking once every three seconds)

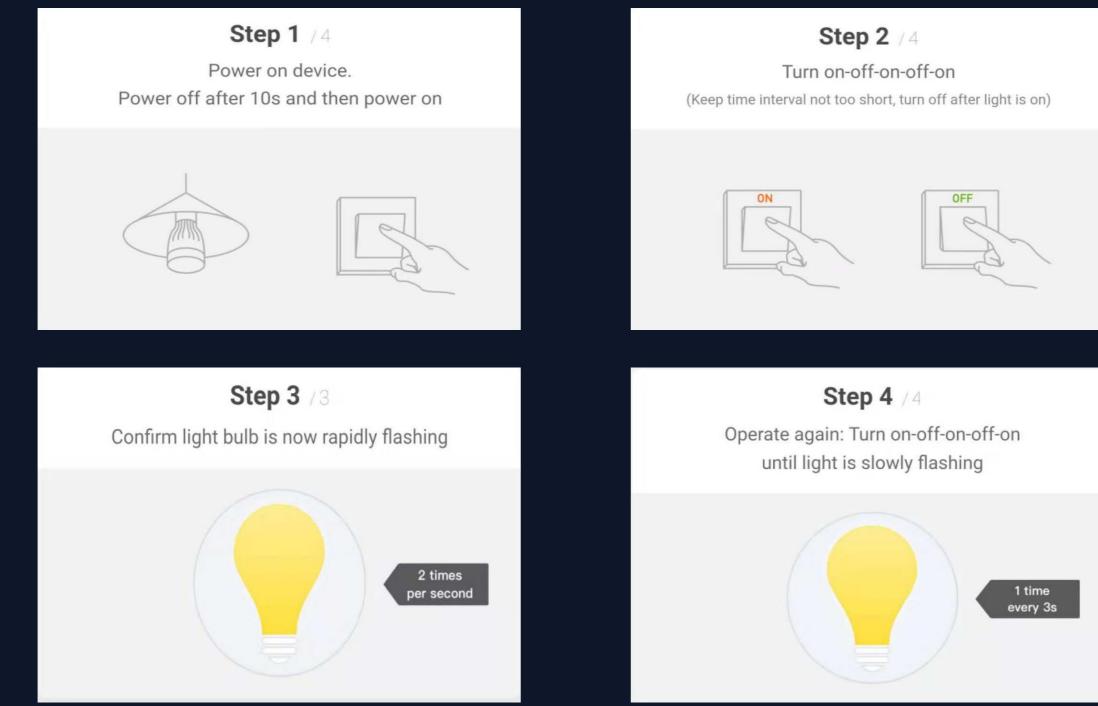

2. If the indicator light is not flashing

NO.3.2.1

Add Manually -wifi device - AP mode

Notes: How to set indicator light to slow flashing:

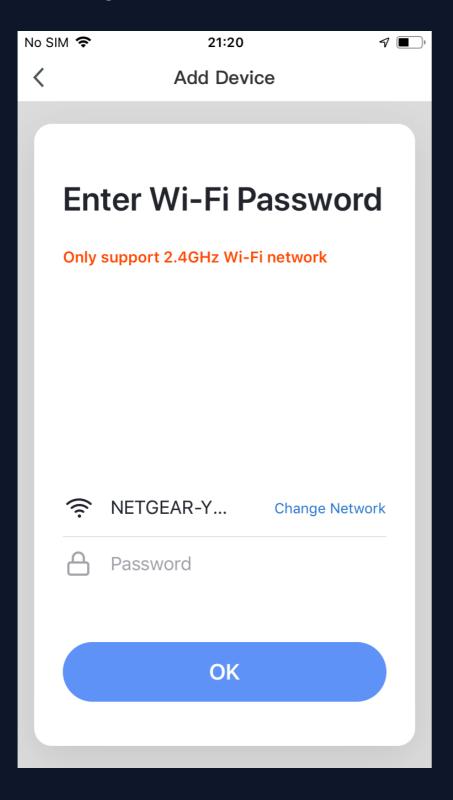

NO.3.2.1

Add Manually -wifi device - Enter wifi password

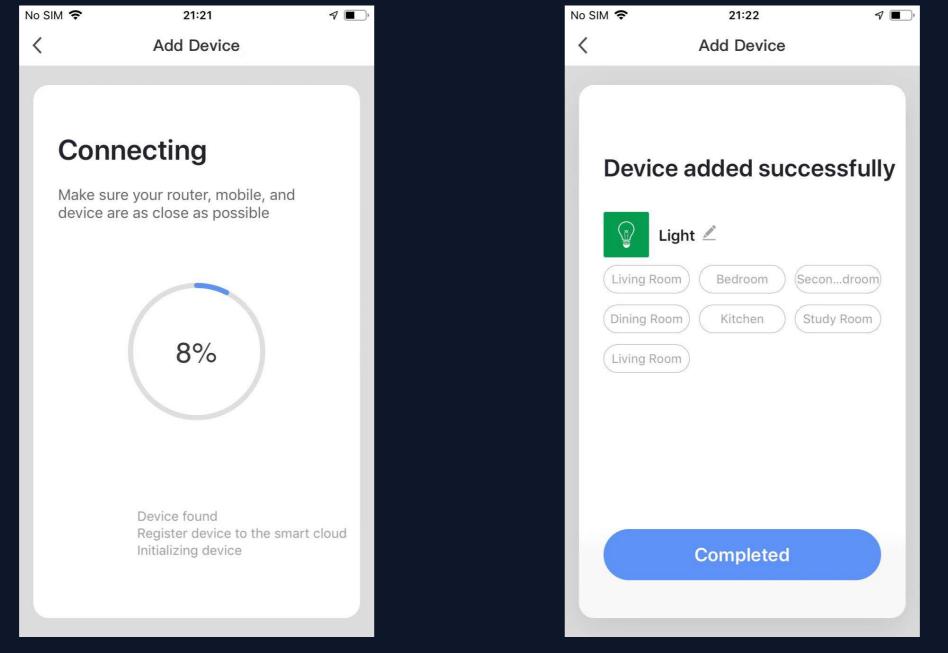

In a selected mode, clicking confirm button
on the page when the indicator light flashes
rapidly/slowly will bring up the page shown
in Fig. 1.
Select the Wi-Fi in the work area of a device
that can enable successful Internet
connection, enter the Wi-Fi password, and
click "OK" to proceed to configuration.

Add Manually– wifi device-Configuration NO.3.2

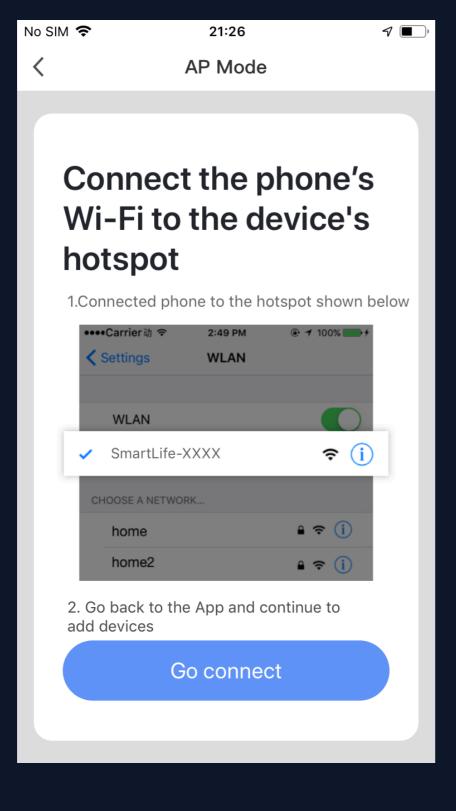

If default mode is selected, app configuration will be completed as shown in Fig. 1. Successful configuration will appear as shown in Fig. 2. Names of devices that have been configured successfully can be changed, and the locations of the rooms where the corresponding devices are can be selected.

NO.3.2.1

Add Manually -wifi device - Configuration

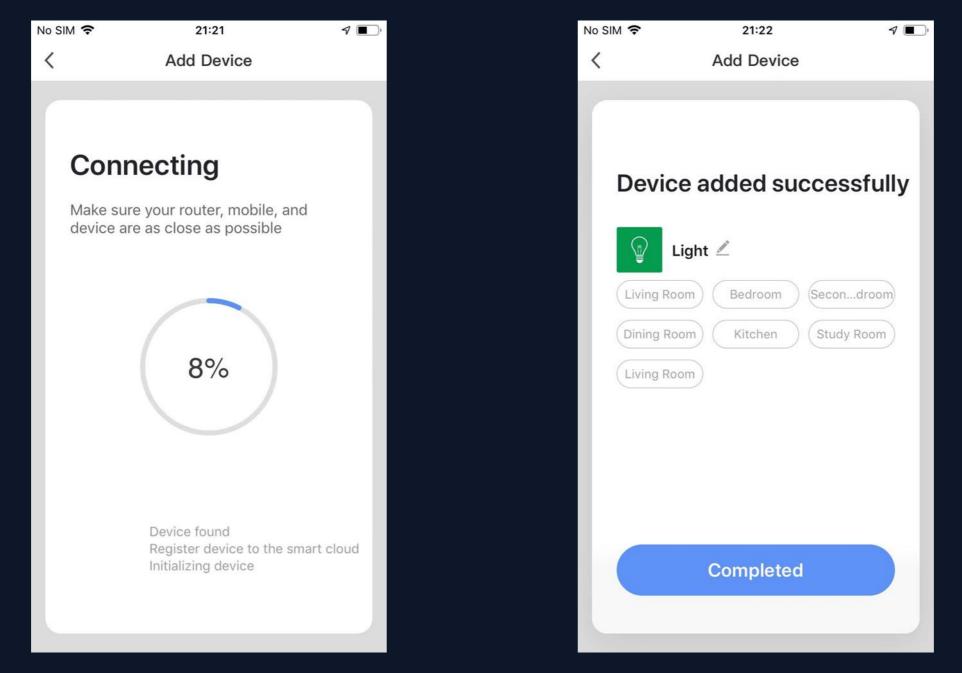

When in AP (slow flashing) Mode, you can select hotspot configuration, and connection must be made with the Wi-Fi hotspot whose name begins with "SmartLife", as shown in the figure Note: Some hotspot names may be user-defined

NO.3.2.1

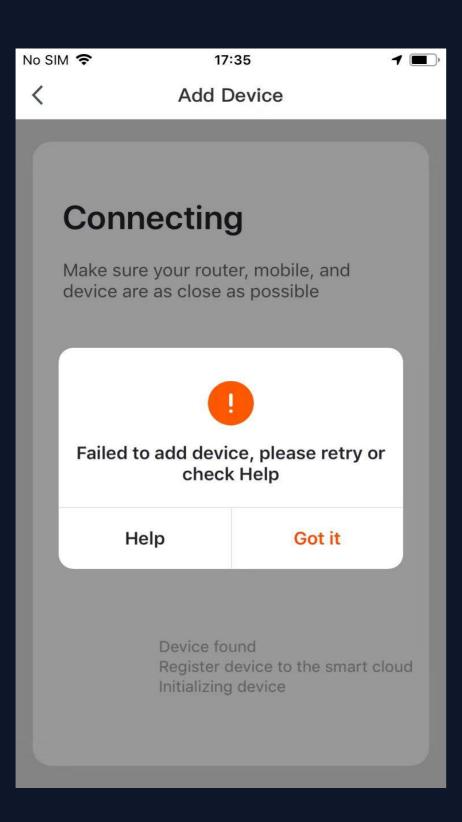

Add Manually -wifi device - Configuration

Connect to the specified hotspot and then return to the configuration menu to proceed with configuration. The process in the app will be completed, as shown in Fig. 1. Successful configuration will appear as shown in Fig. 2

Add Manually– wifi device-Failure NO.3.2

If configuration fails, it will appear as shown in the figure. You can choose to click "Got it" to add again or go to "Help" for troubleshooting assistance.

Add Manually -- ZigBee Device NO.3.2.2

When adding zigbee devices, gateway should be added first

- 1. Plug in a gateway and use a networking cable to connect to the router.
- 2. Make mobile phone and gateways under the same network environment.
- 3. Click the button of "Add Device" on the home page, as shown in figure 1. Click the "Gateway (ZigBee)" under the category of
- "Others". Confirm that the indicator for distribution turns green and click "Bind" to enter the adding process, as shown in figure 5

NO.5.1 Smart Features - Automation

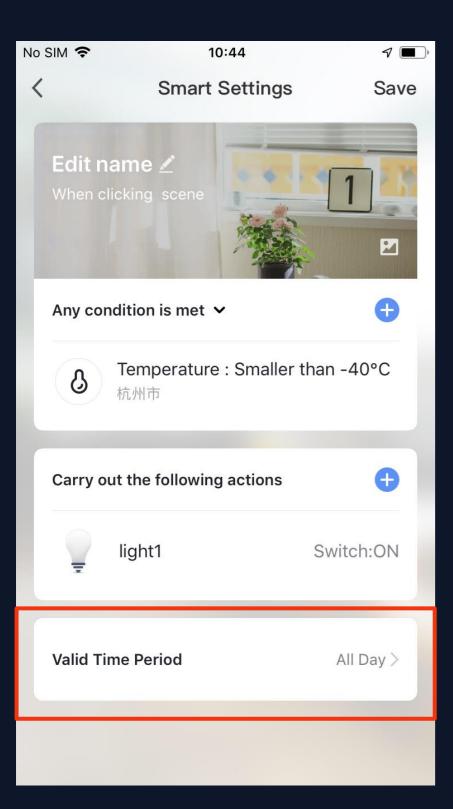

Add action:

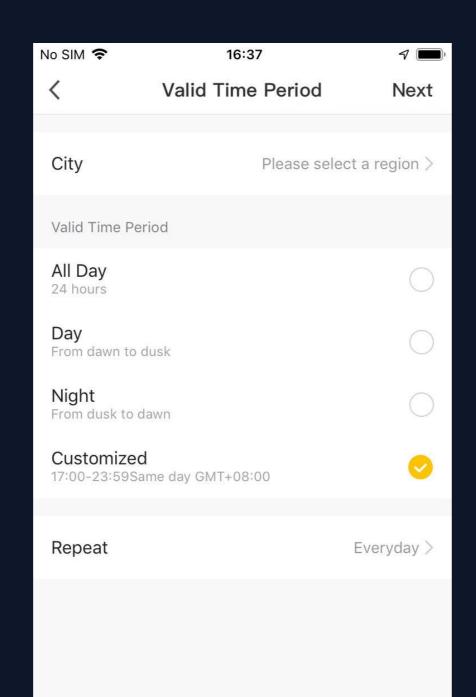

Click "Add action" or "+" at the top right corner to open the menu, as shown in Fig. 1. There are four types of actions: execute scene, trigger automation, send a reminder and time-lapse.

Smart Features - Automation

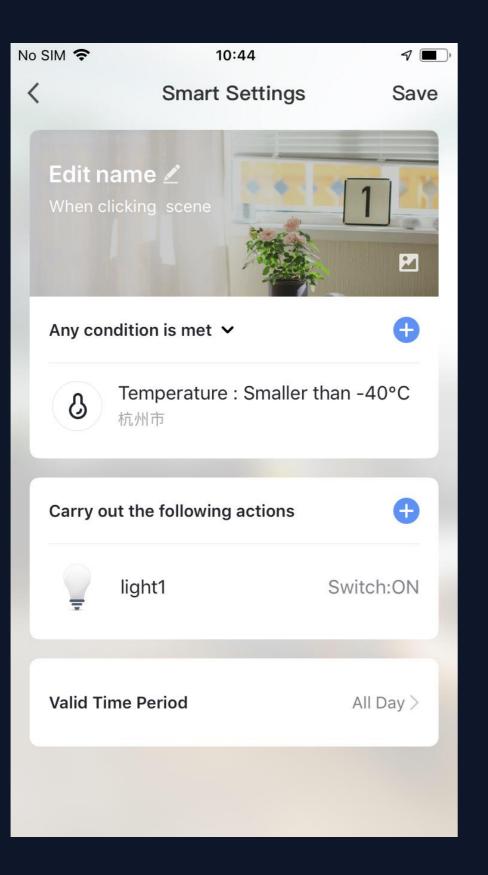

Valid Time Period:

you can set a valid time period for automation. For example, if you define a scene where the nightlight automatically lights up when the human motion sensor detects human presence, you can select "Night" as the valid time period. In this case, the nightlight will not automatically turn on in the daytime.

tuyo Tuya Smart

Smart Features - Automation NO.5.1

up as shown in Fig. 1. The system primarily supports three types of automation: the same time the A/C unit is turned on. **External environment and device** 2.

drawn automatically at 8:00 am every morning.

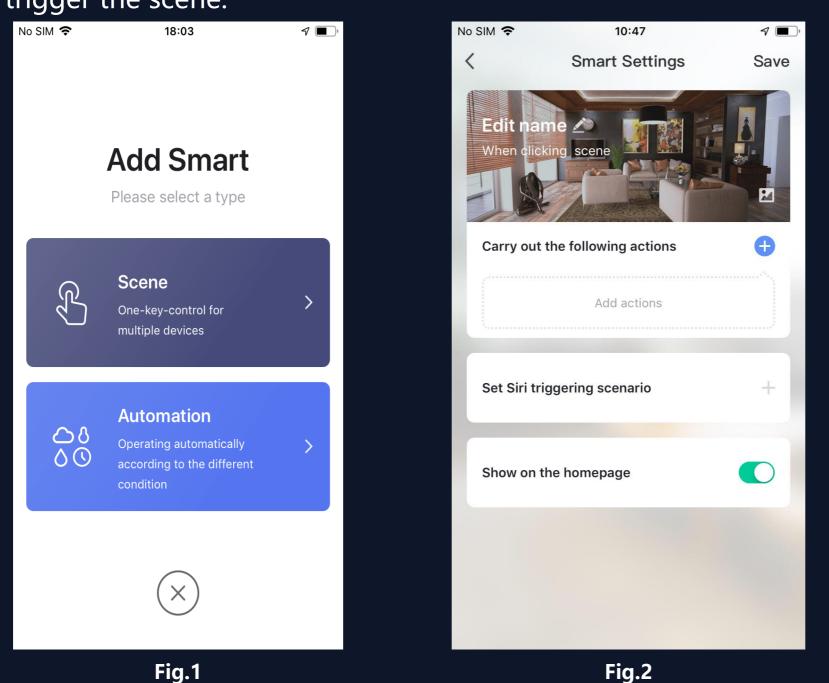

- Conditions and actions of automation can all be set
- Inter-device synchronization: such as turning on the aroma diffuser and air purifier automatically at
- **synchronization:** such as turning on the A/C unit
- automatically when the temperature falls below 0°C.
- 3. Timed actions: such as drawing back the curtains

NO.5.2 **Smart Features - Scene**

In figure 1, select the scene and enter the Settings page. As shown in figure 2, you can edit the scene name. Click "Add actions" or "+" in the top right corner to add the execution action. The action menu is shown in Fig. 3. Configuration is similar to that of automated devices. In addition, you can use siri to trigger the scene.

NO.7 Personal-Modify Login Password

Click "Gesture unlock" to set up a gesture password. Once a gesture password is activated, you will have to use the gesture to access the app. If you forgot your gesture password, click "Forgot the gesture password" to have an authentication code sent to your registered mobile phone number or your email. Enter the code and set up a new gesture password to continue.
